## OUTLOOK:

**Weather Discussion:** The cold front which entered the Northwest Area yesterday will continue to march east across the Great Basin and Northern Rockies today. Unstable afternoon conditions along and ahead of the front will once again lead to scattered thunderstorms. Winds will be strong today in the Northwest, Northern California, Northern Rockies and portions of the Great Basin. Wind will also be on the increase over Arizona today as the front dips toward the region. In Alaska, pressure gradients will keep windy conditions in place in central and northern parts of the state.
