

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY MAY 9, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally, with 58 new fires reported yesterday. Two new large fires were reported and contained in the Eastern Area. Very high to extreme fire indices were reported in Arizona, Colorado, Kansas, Massachusetts, Minnesota, New Mexico, Oklahoma, and Texas.

COLUMBIA RESPONSE, Federal Emergency Management Agency. A Type 2 Incident Management Team (Suwyn) is assigned to search operations near Modena, Utah. Crews have searched approximately seventy percent of the 865 acre area.

EASTERN AREA LARGE FIRES:

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
NELSON PRAIRIE	MN	DLR	1200	100	---	NR	0	0	0	0	1K
WHITE SMOKE	MN	MNS	500	100	---	NR	0	0	0	0	.1K

DLR = Detroit Lakes WMD

MNS = Minnesota Department of Natural Resources

OUTLOOK:

Red Flag Warnings: Northern and central New Mexico below 9,000 feet for strong southwest winds and low relative humidity, 15 percent and less.

Fire Weather Watches: Eastern Arizona, southern New Mexico and southwest Texas for strong west to southwest winds and low relative humidity, 15 percent and less.

Weather Discussion: An upper low pressure area over the Great Basin will generate dry, gusty winds to the Southwest states. A storm system over the Great Lakes will induce showers; thundershowers are expected over much of the northeast quarter of the country. In Alaska, a frontal system should produce showers over a good portion of the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHERN CALIFORNIA Scattered showers over the Sierra and Inyo, otherwise widely scattered.	35-55 mountains 58-68 valleys 55-80 deserts	45-60% Mountains 45-60% Valleys 20-35% Deserts	W-NW 15-30 mph over the mountains and deserts, and locally 20 mph over coastal valleys.
ROCKY MOUNTAIN AREA Southeast-South central Colorado: Partly cloudy.	Mountains: 55-65 Lower elevations: 70-75.	10%-16%	Southwest 15 to 25 mph.
SOUTHWEST AREA Windy with mostly sunny skies. A few sprinkles possible along northern border	50 s and 60 s mountains, 70 s to 90 s lower elevations.	5-20% except 15- 30% mountains of AZ and northern NM	W- SW 15-30 mph.

CONSTRUCTING LINE WITHOUT A SAFE ANCHOR POINT

When deciding where to build fireline, the following considerations must be weighed:

- Can you hold the line without the fire hooking under/around you? How do you protect against losing the line and ensure your safety if there is a danger of the fire hooking around you?
- Are there adequate safety zones and escape routes? Review what constitutes an adequate safety zone and escape route. Who has the responsibility to designate them and continue to make sure they are adequate?
- Can you develop your starting point into an anchor point? List some good anchor points. Describe how you would develop your starting point into an anchor point.
- Have you posted good lookouts? Where should the lookout(s) be posted? Who can be a lookout?
- Do you have good communications? Who do you need to be in contact with? If the communications are not good, what can you do to improve them?
- To reduce the risks, start the line in another location. Talk about fires where you have had to relocate the line because your anchor point did not hold the fire.
