

**INCIDENT MANAGEMENT SITUATION REPORT**  
**MONDAY MAY 12, 2003 - 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally, with 23 new fires reported yesterday. Very high to extreme fire indices were reported in Arizona, Minnesota, New Mexico, Oklahoma and Texas.

COLUMBIA RESPONSE, Federal Emergency Management Agency. A Type 2 Incident Management Team (Suwyn) is assigned to search operations near Modena, Utah. Crews have searched approximately 90 percent of the 1,161 acre area.

**SOUTHWEST AREA LARGE FIRES:**

WALKER, Lincoln National Forest. A Type 2 Incident Management Team (Raley) is assigned. This fire 15 miles east of Cloudcroft, NM is burning in juniper, ponderosa and pinyon pine. Isolated torching was observed yesterday. Holding and improvement of control lines is planned for today.

BOILER, Gila National Forest. This lightning caused Wildland Fire Use fire is ten miles northwest of Poverty Creek, NM and is being managed to accomplish resource objectives. Active fire behavior was observed in the north and west portions of the fire with backing and occasional individual tree torching observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
WALKER	NM	LNF	3,434	60	5/13	355	12	12	0	19	340K
BOILER	NM	GNF	19,525	NR	UNK	51	2	4	0	0	30K

**OUTLOOK:**

**Weather Discussion:** Look for warmer temperatures in the Southwest as high pressure strengthens over the area. High pressure building into the Southeast will cause gusty winds and low humidity from the Carolinas into northern Florida. Clouds and scattered showers are on tap for the interior and southern portions of Alaska.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>SOUTHWEST AREA</b> Partly to mostly sunny and warmer. Slight chance of a thunderstorm southeast NM and W. Texas.	50 s, 60s and 70s mountains and north, 80s to mid 90s lower elevations and south.	15-30% eastern NM and west TX, 5-15% remainder.	Light terrain driven winds in AZ and western NM. SE to SW at 5-20 mph eastern NM and Texas.

### **IN COUNTRY NOT SEEN IN DAYLIGHT**

Often firefighters arrive on a fire after dark. This is recognized as Watchout Situation #2. Before safely fighting fire in country not seen in daylight, firefighters must be able to answer the following questions:

- Can the resources you are replacing give you a thorough briefing? Identify whom you might get information from. Can you meet up with the departing crew/engine leaders?
- Can you observe the area/use scouts? List ways you could observe the area you need to work.
- Have escape routes and safety zones been thoroughly scouted and marked for night use? Talk about what constitutes an escape route and a safety zone; who would identify them; and in what ways might they be marked.
- Have potential dangers been located; can they be mitigated? What are the dangers associated with Watchout Situation #2? How can they be worked around?
- Reduce the risks by:
  - Posting lookouts.
  - Checking communications.
  - Retreat if you have doubts about your escape routes or safety zones or the situation becomes too complex. Give examples of arriving on a fire after dark and what was done to allow you to fight fire safely in country not seen in daylight.
