

INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY MAY 14, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally, with 54 new fires reported yesterday. Two large fires were contained, one each in the Southwest and Southern Areas. Very high to extreme fire indices were reported in Arizona, Colorado, Kansas, Minnesota, New Mexico, Oklahoma and Texas.

SOUTHWEST AREA LARGE FIRES:

A BAR, Coronado National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is 15 miles southwest of Sierra Vista, AZ. No fire spread occurred yesterday, and engines and crews will continue mopup operations today.

BOILER, Gila National Forest. This lightning caused Wildland Fire Use fire is ten miles northwest of Poverty Creek, NM and is being managed to accomplish resource objectives. Active fire behavior was observed in the north and west portions of the fire with backing and occasional individual tree torching observed. Continued monitoring and mapping of fire spread is planned for today.

OUTLOOK:

Weather Discussion: A low pressure trough moving into Southern California will lead to increasing winds for the Southwest states. High pressure over the Southeast should produce another day of low humidity from Florida through the Carolinas. Clouds and scattered showers will continue over Alaska as an upper trough remains parked over the area.

ATTEMPTING A FRONTAL ASSAULT ON A FIRE

Attempting a frontal assault on a fire is recognized as Watchout Situation #10 and is a potentially dangerous tactic.

- ➊ If your tactics include a frontal assault, the following checklist must be adequately addressed before engaging the fire:

- Has the fire been scouted and sized up? Who will scout and size up a fire and what are they looking for?
- Is your position defensible? List what makes a firefighter's position defensible. (Anchor points, safety zones, escape routes, etc.)
- Are escape routes and safety zones adequate? Review what constitutes an adequate safety zone and escape route.
- Do you have an anchor point? How would you establish an anchor point for a frontal assault on a fire?

- ➋ continued...

- Do you have adequate resources to complete the assault? Discuss things you need to consider; for example, if the frontal assault fails, do you have backup?
- Are you informed on strategy, tactics, and hazards? Consider what could happen if someone has a different approach than you; i.e., the IC has a burnout operation planned while you are attempting frontal assault.
- Is the terrain favorable to holding the fire? Discuss ways the terrain will influence where you will make a stand.

- ➌ In order to reduce the risks, reassess your tactics, post lookouts, identify situations in which firefighters may be enticed to attempt frontal assault on a fire. Review why this may or may not be a good idea.
