

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY MAY 31, 2003 - 0800 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally, with 177 new fires reported yesterday. No new large fires were reported. One large fires was contained in the Southern Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Nevada, New Mexico, Oklahoma, Texas, and Utah.

ALASKA AREA LARGE FIRES:

TOK RIVER, State of Alaska. A Type 2 Incident Management Team (Reed) is assigned. The fire is burning in black spruce, tundra, and mixed hardwoods five miles southeast of Tok, AK. Minimal fire activity was observed as a result of precipitation received yesterday. Resources will continue to contain spot fires today.

TOK RIVER	AK	STA	2,750	30	6/4	80	8	0	1	0	350K

NORTHERN CALIFORNIA AREA LARGE FIRES:

DEL PUERTO, California Department of Forestry-Santa Clara Unit. This fire is burning in grass, brush, and scattered timber fifteen miles west of Patterson, CA. Minimal fire activity was observed yesterday. Steep terrain and rolling material are presenting safety concerns. Mopup and patrol actions are planned for today.

LUHI, Hawaii Volcanoes National Park. This fire was started by lava from the Kilauea Volcano. The fire is burning in grass, brush, and rainforest. There was no significant increase in fire size yesterday. Resources will continue mopup today and take suppression action around unburned islands.

OUTLOOK:

Red Flag Warnings: Dry thunderstorms in the eastern and south-central interior Alaska Saturday afternoon

Weather Discussion: High pressure over the West weakening as a disturbance tracks across the Northern Rockies today. Drier air is spreading into California, Nevada and Arizona as well as portions of the Great Lakes area. Gusty winds and low humidity are also on tap for portions of northern and central Florida. An upper low in the Gulf of Alaska will spread increasing moisture into the south and interior portions of Alaska.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHERN CALIFORNIA Morning low clouds and fog into the coastal valleys, otherwise mostly sunny.	70-90 Mountains 80-95 Valleys 90-110 Deserts	20-30% Mountains 30-40% Valleys 10-20% Deserts	SW-NW 5-15 mph.
ALASKA Mostly cloudy in the south with scattered showers. Partly cloudy in the central and north. Isolated showers and dry afternoon thunderstorms in the central and southern interior.	60 s to lower 70 s	25% to 40%	Southeast to southwest 5-15 mph
SOUTHWEST AREA Partly cloudy. Scattered thunderstorms eastern AZ, northern and western NM and the TX panhandle.	Upper 60s to low 80 s mountains, 80s and 90s lower elevations, 100 to 110 in the AZ deserts.	15-25%, except 25-35% mountains and 10-15% AZ deserts.	Variable 5-15 mph, except south to southeast 10-15 mph west Texas and eastern NM.

AVIATION COMMUNICATIONS

Discuss the following information in terms of effective communication with aircraft.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.
- Consider using national air-to-ground frequencies.
- Discuss Guard frequencies:
 - How they work.
 - What frequencies are established for aircraft in your area?
- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to.
- Do not use local slang.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.
- Know what you want to say before you key the microphone.
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- Give only meaningful information on the radio.
- Give accurate and descriptive ground information when describing a specific place on the ground.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
