

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, NOVEMBER 14, 2003 – 1000 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light across the nation for the last three days. Nationally, 244 new fires were reported for the three day period ending November 14th. One new large fire was reported and contained during the week in the Rocky Mountain Area. Very high to extreme fire indices were reported in Arizona.

OUTLOOK:

Weather Discussion: Gusty winds and low humidity are expected over portions of Florida today in the wake of a cold front that passed through the area. In the West, a ridge of high pressure will build over Southern California next week for warmer and drier conditions along with gusty northeast winds over the mountains and passes Sunday through Tuesday.

HELICOPTER LANDING AREA SAFETY

The following points should be considered when operating around an unimproved landing site:

- Always wear your personal protective equipment (PPE) when working around an operating helicopter.
- Always get the approval of a flight crewmember or the pilot before approaching a starting or operating helicopter.
- Only approach and depart a helicopter as directed, in a slightly crouched position, and in full view of a crewmember.
- When approaching or departing an operating helicopter, never approach or depart uphill and do not hold equipment overhead.
- Always approach and depart an operating helicopter on the downhill side.
- Remove or secure loose articles when working around an operating helicopter.
- Be aware of the dust abatement conditions of the landing area, as blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous.
