

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, NOVEMBER 21, 2003 – 1000 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was moderate in the Southern Area and light elsewhere. Nationally, 680 new fires were reported for the week ending November 21st. Six large fires were reported, two each in the Rocky Mountain and Southern Areas and one each in the Eastern and Northern Rockies Areas. Five large fires were contained during the week, two in the Southern Area and one each in the Eastern, Rocky Mountain and Northern Rockies Areas. Very high to extreme fire indices were reported in Arizona and Colorado.

ROCKY MOUNTAIN AREA LARGE FIRES:

MILL ROAD, South Dakota Division of Forestry. A South Dakota State Incident Management Team (Lehmann) is assigned. This fire is in grass and Ponderosa pine, six miles north of Rapid City, SD. Running, spotting and single tree torching were observed. Good progress on containment efforts was achieved due to rain and snow.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
MILL ROAD	SD	SDS	1,000	95	UNK	30	0	9	0	0	NR

FHA = Flathead Agency

OUTLOOK:

Weather Discussion: Strong winds and low humidity is on tap for Arizona, New Mexico and west Texas ahead of a cold front which should reach northern Arizona Friday and into Texas on Sunday. In the Southeast, low humidity will prevail over portions of northern Florida Friday. High pressure over the area will give way to a cold front moving through the area Sunday and Monday.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern California Scattered showers with snow above 3,000 feet.	55-65 coastal areas. 30-50 mountains. 55-65 valleys. 50-60 upper desert. 60-70 low desert.	30-40% desert. 40-60% mountains. 35-55% valleys. 50-60% coast.	Southwest to northwest 15 to 30 mph with higher gusts over the mountains and deserts and 10 to 20 mph elsewhere.

UNBURNED FUEL BETWEEN YOU AND THE FIRE

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical to direct attack a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- To reduce the risks:
 - Post lookouts
 - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
