

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, OCTOBER 13, 2003 0800 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was light nationwide. Nationally 37 new fires were reported. One large fire was contained in the Northern Rockies Area. Very high to extreme fire indices were reported in Arizona, California, Hawaii and Oregon.

NORTHWEST AREA LARGE FIRES:

NEEDLES, Okanogan/Wenatchee National Forest. This fire is in timber and heavy downed fuels, 12 miles northwest of Winthrop, WA. No new information was reported.

CRYSTAL CREEK, Okanogan/Wenatchee National Forest. This fire is in mixed conifer with dead and downed fuels, six miles southwest of Leavenworth, WA. No new information was reported.

ISABEL, Okanogan/Wenatchee National Forest. This fire is in timber, seven miles west of Conconully, WA. The fire was holding in heavy fuels and duff due to rain and snow which fell on the fire.

B&B COMPLEX, Deschutes National Forest. This complex, comprised of the Booth and Bear Butte fires, is in timber with heavy ground fuels 14 miles west of Sisters, OR. No new information was reported.

OUTLOOK:

RED FLAG WARNING: For the higher elevations in the north, the Sacramento Valley and surrounding foothills, and the bay area, for gusty northeast to east winds and low humidity. These warnings will end Monday afternoon.

Weather Discussion: Weather fronts which have been bringing cloud cover and showers to the Northwest and western section of the Northern Rockies is coming to an end early this week. This will result in drier conditions for the Northwest along with a trend of slightly warmer conditions. An offshore gradient will also set up today, allowing dry east to northeast winds to blow across Oregon southward into central sections of coastal California.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
NORTHERN CALIFORNIA AREA Mostly clear with a few high clouds.	60s and 70s near the coast and higher elevations with 80s lower inland areas.	10 to 20% with poor humidity recovery	Northeast to east 8 to 18 mph gusts 20 to 28 mph in the warning areas.
SOUTHERN CALIFORNIA AREA Morning low clouds and fog over the coastline, otherwise sunny.	70 to 80 coastal areas. 80 to 95 mountains. 85 to 95 valleys. 90 to 95 upper desert. 98 to 102 low desert.	8 to 15% desert. 8 to 15% mountains. 15 to 25% valleys. 40 to 55% coast.	Northwest to northeast 8 to 18 mph.

HAZARDOUS MATERIALS ENCOUNTERS

Employees who may encounter hazardous materials in the field should be trained as mandated by OSHA 1910.120 (q), First Responder Awareness Level. However, employees should always recognize that hazmat encounters require special precautions.

● Hazardous materials in the field include, but are not limited to:

- Clandestine drug waste – waste as a result of “meth” labs, etc., which may look like common household trash at first glance. Drug lab waste can be identified by the presence of gallon plastic jugs, large plastic bags, 5-gallon buckets, and laboratory equipment (tubes and beakers).
- Midnight dumping – may be recognized by the presence of barrels or other containers, discoloration of land, plants, or water, and/or dead vegetation and animals.
- Transportation accidents – truck, rail, or pipeline accidents may result in the spillage or release of hazardous materials that may result in danger to life, property, or resources.

● In all instances, self-protection is your primary responsibility.

● Respond to all encounters by implementing the Three Rs:

- Recognize: Attempt to identify the substance using the North American Emergency Response Guide, occupancy/location, placards/labels, container shapes/colors, and/or MSDS shipping papers.
- Retreat: Move upwind, upgrade, or upstream; isolate the material; and deny entry to the site. Guidelines for isolation distances include: 150 feet for a minor incident (1 drum, 1 bag, etc.); 500 feet for a major incident (more than 1 drum, etc.); 300 feet for a residential and light commercial incident; 1,000 feet for an open area; 2,500 feet for an incident with BLEVE potential; 2,500 feet for the staging area (must be upwind with vehicles in a headed-out position)
- Report: Notify your supervisor and agency dispatcher. Request hazmat assistance via a safe route.
