OUTLOOK:

Red Flag Warnings: For gusty north to northeast winds and low humidity through the morning for much of northern California including Sacramento Valley and surrounding foothills, coastal mountains and East Bay hills.

Weather Discussion: In central and northern California, early morning northeast wind will subside slowly today as the gradient producing the wind relaxes. The flow will become more onshore with higher relative humidity overnight. Over the rest of the west, high pressure will lead to warmer conditions with little chance of showers. The exception will be western Washington, where a cold front with light showers will move onto the coast. Hurricane Isabel will slowly move toward the east coast today, taking a turn toward the northwest.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
