

**INCIDENT MANAGEMENT SITUATION REPORT**  
**MONDAY, AUGUST 9, 2004 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 108 new fires reported. Five new large fires were reported, one each in Southern California, Northern California, Northern Rockies, Rocky Mountain and Eastern Great Basin Areas. Four large fires were contained, two in the Southern California Area and one each in Northern Rockies and Eastern Great Basin Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, and Wyoming.

**SOUTHERN CALIFORNIA AREA LARGE FIRES:**

TRINITY, San Bernardino National Forest. This fire is five miles northwest of Anza, CA in chaparral. High temperatures, low humidity, gusty winds and heavy fuel loading are major concerns. Active fire behavior with a rapid rate of spread and spotting was observed.

CALAVERAS COMPLEX, Tuolumne-Calaveras Unit, California Department of Forestry and Fire Protection (CDF). A CDF Type 1 Incident Command Team (Heil) is assigned. This complex, comprised of the Mineral fire and the previously reported Copper and Armstrong fires, is four miles southwest of Copperopolis, CA in brush. One spot fire was suppressed in the morning and some hot spots were located near containment lines. The Copper fire has been contained. All evacuations have been lifted.

MMU = Merced-Mariposa Unit, California Department of Forestry and Fire Protection

ANF = Angeles National Forest

**NORTHWEST AREA LARGE FIRES:**

POT PEAK/SISI RIDGE COMPLEX, Okanogan-Wenatchee National Forest. A Type 2 Incident Management Team (Furlong) is assigned. This complex, comprised of the Pot Peak, SiSi Ridge and Deep Harbor fires is 15 miles northwest of Chelan, WA in timber. Fire activity was minimal with some creeping and interior torching.

FREEZEOUT, Okanogan-Wenatchee National Forest. A Washington State Interagency Incident Management Team (Jennings/Perry) is assigned. This fire is 65 miles northeast of Bellingham, WA in timber. Minimal fire behavior with some creeping was observed.

RATTLESNAKE PEAK, Okanogan-Wenatchee National Forest. A Fire Use Management Team (Bonefeld) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located 40 miles west of Yakima, WA in timber, is being managed to accomplish resource objectives. Fire activity was minimal with creeping reported.

### EASTERN GREAT BASIN AREA LARGE FIRES:

MC CONKIE RANCH, Vernal Field Office, Bureau of Land Management. This fire is 13 miles northwest of Vernal, UT in logging slash and juniper. Wind-driven fire behavior and extremely dry fuels resulted in large fire growth.

HOME, Salt Lake Field Office, Bureau of Land Management. This fire is eight miles southwest of Woodruff, UT in sagebrush. No new information was received.

SCF = Salmon-Challis National Forest

### NORTHERN ROCKIES AREA LARGE FIRES:

CAPRI LAKE, Bitterroot National Forest. A Type 2 Incident Management Team (Carlson) is assigned. This fire is 14 miles south of Conner, MT in timber. Fire behavior was minimal. Reduction in acreage is due to more accurate mapping.

| INCIDENT NAME | ST | UNIT | SIZE | % CTN | EST CTN | TOTL PERS | CRW | ENG | HELI | STRC LOST | \$\$\$ CTD |

EAS = Eastern Land Office, Montana Department of Natural Resources and Conservation

### ALASKA AREA LARGE FIRES:

BOUNDARY, Fairbanks Area Forestry, Alaska Division of Forestry. This fire is 20 miles northeast of Fairbanks, AK in black spruce and tundra. Moderate fire behavior was observed in the headwaters of the Little Chena.

TAYLOR HIGHWAY COMPLEX, Tok Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Jandt) has been ordered. This complex, comprised of the Billy Creek, Gardiner Creek, Chicken and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. Canadian air tankers assisted suppression efforts. All fires in the complex were still active.

CENTRAL COMPLEX, Upper Yukon Zone, Bureau of Land Management. This previously reported complex, which began on 7/13, surrounds the community of Central, AK. This complex, comprised of the Crazy, Bolgen Creek and Wolf Creek fires, in spruce and hardwoods. The fires are within six miles of the community of Central, approaching from several directions. Significant runs with flame lengths up to 150 feet were observed.

### EASTERN AREA LARGE FIRES:

SECTION 33, Voyageurs National Park. A transfer of command from a Fire Use Management Team (Hall) to a Fire Use Management Team (Bird) will occur today. This lightning-caused Wildland Fire Use (WFU) incident, located 25 miles southeast of International Falls, MN in balsam, spruce and pine, is being managed to accomplish resource objectives.

## OUTLOOK:

**Weather Discussion:** A strong ridge of high pressure will bring hot and dry weather to most of the West except for cooler weather east of the Rockies. A few thundershowers can be expected over Colorado, Arizona and New Mexico. Warm and dry weather is also on tap for the central and eastern interior of Alaska.

### **FIRE NOT SCOUTED AND SIZED UP**

Watchout Situation #1 comes up during initial attack and every time resources arrive at a fire.

● Before taking action on the fire, the following considerations must be addressed:

- Can you personally observe the fire or must you use scouts? Describe ways you can scout and size up a fire.
- Do you know the location of the fire perimeter? Discuss situations in which the fire perimeter may not be obvious. (Spotty fires, etc.)
- Do you know the direction of fire spread? When isn't the direction of fire spread obvious? (Wind shifts, spotty fires, etc.)
- Does the direction of fire spread increase risk? Talk about situations where you may have to approach the head of the fire. (Hiking down from a helispot, approaching from an existing road, switching winds, etc.)
- Do you know the fuels and their condition? What kind of information will you assume from what you already know about fuel types? (Spot fires in fir, extreme fire potential in flashy fuels, etc.)

● Continued from above...

- Do topographic hazards exist? What can you assume from what kind of terrain the fire covers? (Slope, chimneys, aspect, etc.)
- Does enough information exist to establish a plan of attack? When do you have enough information to begin fighting fire? What do you need to know?
- Do other dangers exist? Have you talked about factors specific to the area you are working in? (Hunters in the woods, drought, snag patches, etc.)

● To reduce the risks:

- Post lookouts until the fire is sized up and escape routes and safety zones are established.
- Retreat if the situation is too complex. Review fires where you had to wait until the area in which you were assigned to work was scouted and sized up before you were allowed onto the fireline.
