

**INCIDENT MANAGEMENT SITUATION REPORT**  
**MONDAY JUNE 7, 2004 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 1**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 79 fires reported. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Florida, Kansas, Nevada, New Mexico, Oklahoma and Texas.

**SOUTHERN CALIFORNIA AREA LARGE FIRES:**

GAVIOTA, Santa Barbara County Fire Department. A California Department of Forestry and Fire Protection Type 1 Incident Command Team (Henson) is assigned. This fire is 15 miles west of Santa Barbara, CA in chaparral and grass. Inaccessible terrain and limited roads are major concerns. U.S. Highway 101 was reopened for limited traffic on the evening of 6/6. Holister Ranch evacuations are still in effect. The Tip-Top Ranch, an oil refinery and 150 residences are threatened.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
GAVIOTA	CA	SBC	7,553	20	UNK	1,013	31	72	15	4	329K

**SOUTHWEST AREA LARGE FIRES:**

PEPPIN, Lincoln National Forest. A Type 2 Incident Management Team (Bateman) is assigned. This fire is six miles northeast of Capitan, NM in timber. Steep terrain, poor accessibility, heavy fuel loading, prolonged drought and high winds continue to be major concerns. Higher relative humidity moderated fire behavior.

KP, Apache-Sitgreaves National Forest. This fire is 20 miles south of Alpine, AZ in brush and mixed conifer. Creeping was observed in unburned islands in the interior. Crews continued to improve and rehabilitate fireline.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
PEPPIN	NM	LNF	48,000	55	UNK	369	7	7	4	12	5.2M
KP	AZ	ASF	16,175	90	UNK	65	1	4	2	0	4.1M

## SOUTHERN AREA LARGE FIRES:

SANTA FE SWAMP, Florida Division of Forestry. This fire is six miles southwest of Keystone Heights, FL in dry swamp. No new information was reported. This will be the last report unless new information is received.

ROAD 1, Florida Division of Forestry. A Florida Division of Forestry Type 2 Incident Management Team (Jones) is assigned. This fire is 17 miles northwest of Macclenny, FL in pine. No new information was reported. This will be the last report unless new information is received.

YELVINGTON, Florida Division of Forestry. This fire is five miles east of East Palatka, FL in swamp. No new information was reported. This will be the last report unless new information is received.

ROCK ROAD, Florida Division of Forestry. This fire is 11 miles southeast of Bonita Springs, FL in pine, cabbage palm and cypress. No new information was reported. This will be the last report unless new information is received.

## WESTERN GREAT BASIN AREA LARGE FIRES:

MAIL SUMMIT, Ely Field Office, Bureau of Land Management. This fire is 41 miles west of Panaca, NV in grass, sage and pinyon-juniper. This fire is currently being managed in a confinement strategy and will be monitored by air and ground. This will be the last report unless significant activity occurs.

## OUTLOOK:

**Fire Weather Watch:** Fire Weather Watch for southern 2/3 of Nevada, excluding only Humboldt County, Elko County, northern Washoe, Lander and Eureka Counties, on Monday due to gusty winds and low relative humidity.

**Fire Weather Watch:** Fire Weather Watch for south east Utah for strong winds and low relative humidity.

**Red Flag Warning:** Red Flag Warning for high winds and low relative humidity for California's Mono and Alpine Counties.

**Red Flag Warning:** Red Flag Warning for most of central and southwest Utah and the Arizona Strip for strong winds and low relative humidity.

**Weather Discussion:** A broad low pressure system will continue to develop over the northwest quadrant of the country today. The low will bring showers to Oregon, Washington and also northern Idaho. Winds will be very strong across the Great Basin as temperatures begin to fall. In the Southwest and southern California, dry and breezy conditions will be prevalent. Some strong winds and low relative humidity are also possible in southern Colorado in the afternoon. Central Florida will once again experience scattered thunderstorms today.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>SOUTHERN CALIFORNIA AREA</b> Patchy morning low clouds and fog coastal areas, otherwise sunny.	65 to 80 coastal areas 75 to 90 mountains 85 to 95 valleys 90 to 100 upper deserts 100 to 110 lower deserts	10 to 25%	Southwest to northwest 10 to 20 mph with higher gusts.
<b>SOUTHWEST AREA</b> Mostly sunny, hot and very dry most of Arizona and New Mexico. Partly cloudy eastern New Mexico and west Texas with widely scattered thunderstorms.	70s mountains 80 and 90s lower elevations 100 to 110 deserts	5 to 15% Arizona and most of New Mexico 15 to 30% remainder	Southwest to west 10 to 25 mph with higher gusts Arizona and western New Mexico. South to southeast 10 to 20 mph eastern New Mexico and west Texas.
<b>ROCKY MOUNTAIN AREA</b> Partly cloudy over most of the Rocky Mountain Area except for mostly dry isolated thunderstorms in southern Colorado Front Range and mixed wet/dry in Black Hills of South Dakota.	90 s lower elevations, 100 s southern plains 70 s to 80 s mountains	Less than 20% over most of the Rocky Mountain Area less than 10% in some low elevations	West wind 15 to 25 mph over west/central Wyoming and 12 to 22 mph in northwest Colorado. South winds 15 to 30 eastern sections of Rocky Mountain Area.
<b>WESTERN GREAT BASIN AREA</b> Mostly sunny and windy.	North: 80s to near 90 South: 80s to 100 Mountains: 70s to low 80s	North: 10 to 18% South: 4 to 12% Mountains: 12 to 21%	Northeast: Southwest to west at 15 to 25 mph. Northwest: Southwest to west at 10 to 20 mph with gusts to 35 mph. South: Southwest at 10 mph.
<b>EASTERN GREAT BASIN</b> <b>Idaho, Bridger-Teton:</b> Partly cloudy, cool, and breezy. Isolated to widely scattered showers over the mountains of central Idaho and western Wyoming. <b>Utah, Arizona Strip:</b> Hot, dry and breezy to windy.	<b>Idaho, Bridger-Teton:</b> 52 to 65 mountains 65 to 75 valleys <b>Utah and Arizona Strip:</b> 72 to 87 mountains 88 to 103 valleys	<b>Idaho, Bridger-Teton:</b> 21 to 32% valleys 27 to 42% mountains <b>Utah, Arizona Strip:</b> 3 to 16% valleys 8 to 23% mountains	<b>Idaho, Bridger-Teton:</b> Southwest to northwest 10 to 22 mph. <b>Utah, Arizona Strip:</b> Southwest 10 to 25 mph.

## HYDRATION

Studies conducted on wildland firefighters indicate that fire suppression activities generate about 7.5 calories of heat each minute worked or 450 kilocalories for each hour. Additional heat (about 180 kilocalories per hour) comes from the environment and the fire. The total heat load amounts to 580 kilocalories per hour ( $400 + 180 = 580$ ). Complete evaporation of 1 liter of sweat removes 580 kilocalories of heat. In order to maintain a healthy body temperature, the firefighter needs to evaporate about 1 liter (slightly more than 1 quart) of sweat during each hour of work.

- Maintaining body fluids is essential for sweating. You must hydrate before, during, and after work.
- Before work you should take extra fluids to prepare for the heat. Drink 1 or 2 cups of water, juice, or a sport drink before work. Avoid excess caffeine; it hastens fluid loss in the urine.
- While working drink at least 1 quart of fluid per hour. Drink as much as you can during the lunch break. Water is your greatest need during work in the heat.
- Providing a portion of fluid replacement with a carbohydrate/electrolyte sport beverage will help you retain fluids and maintain energy and electrolyte levels.
- After work it is important to continue drinking to replace fluid losses. Thirst always underestimates fluid needs, so you should drink more than you think you need.
- Rehydration is enhanced when fluids contain sodium and potassium, or when foods with these electrolytes are consumed along with the fluid.
- Unacclimatized workers lose more salt in the heat so they need to pay particular attention to salt replacement. Don't overdo salt intake; too much salt impairs temperature regulation. Excessive salt can cause stomach distress, fatigue, and other problems.
- Make potassium-rich foods like bananas and citrus fruits a regular part of your diet, and drink lots of lemonade, orange juice, or tomato juice.
- Limit the amount of caffeine drinks such as coffee and colas because caffeine increases fluid loss. Avoid alcoholic drinks. They also cause dehydration.
- You can assess your hydration by observing the volume, color, and concentration of your urine. Low volumes of dark, concentrated urine or painful urination indicate a serious need for rehydration. Other signs of dehydration include a rapid heart rate, weakness, excessive fatigue, and dizziness.
- Rapid loss of several pounds of body weight is a certain sign of dehydration. Rehydrate before returning to work; continuing to work in a dehydrated state can lead to serious consequences, including heat stroke, muscle breakdown, and kidney failure.
