

**INCIDENT MANAGEMENT SITUATION REPORT**  
**TUESDAY, JUNE 22, 2004 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 159 fires reported. Two new large fires were reported, one each in the Northwest and Northern California Areas. Two large fires were contained, one each in the Northwest and Southwest Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Nevada, New Mexico, Oklahoma, Oregon, Texas and Utah.

**ALASKA AREA LARGE FIRES:**

SOLSTICE COMPLEX, Alaska Fire Service-Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (Jandt) is assigned. This incident is 57 miles northwest of Fort Yukon, AK in black spruce and tundra. The complex consists of the Pingo, Winter Trail, Tsukon, Kokacho, Maggie Creek, Vundik Lake, Black Currant Lake, Chandalar River and Mud Lakes fires. Extreme fire behavior continues on the Pingo and Winter Trail fires due to high winds, dry fuel conditions and high temperatures.

CHICKEN, Tok Area Forestry, Alaska Division of Forestry. This fire is located 50 miles northeast of Tok, AK in black spruce and tundra. No new information was reported.

BOUNDARY, Fairbanks Area Forestry, Alaska Division of Forestry. This fire is 57 miles northeast of Fairbanks, AK in alpine tundra and black spruce. No further information was received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

CHICKEN	AK	TAS	9,000	0	UNK	13	0	4	1	0	182K
BOUNDARY	AK	FAS	6,084	0	UNK	38	2	2	1	0	NR

**SOUTHWEST AREA LARGE FIRES:**

THREE FORKS, Apache-Sitgreaves National Forest. This fire is 11 miles west of Alpine, AZ in ponderosa pine and mixed conifer. Minimal surface fire with some active burning in interior islands of fuel was observed. No further information was received.

PEPPIN, Lincoln National Forest. This fire is six miles northeast of Capitan, NM in timber. Minimal fire activity was observed. No further information was received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

BERNARDO	NM	N3S	354	100	---	42	1	5	1	3	NR

N3S = Socorro District, New Mexico State Forestry

### **WESTERN GREAT BASIN AREA LARGE FIRES:**

NICKEL, Las Vegas Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Whalen) is assigned. This fire is near Mesquite, NV in pinyon pine, brush and grass. Rough terrain and a lack of water for helicopter support are major concerns. Active surface fire with occasional small runs and interior torching was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
NICKEL	NV	LVD	8,300	90	6/23	472	13	3	5	0	608K

### **NORTHERN CALIFORNIA AREA LARGE FIRES:**

MOKE, Eldorado National Forest. This fire is 21 miles southwest of Markleeville, CA in brush and timber. Minimum impact suppression techniques are being used to contain the fire. Individual tree torching with long range spotting and runs in continuous brush was observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

## OUTLOOK:

**Weather Discussion:** Over much of the western United States conditions will continue to be dry and warm under the influence of a building high pressure system. The drying and warming trend is expected to continue through the end of the week. Some very isolated thunderstorms are possible along the northern Cascades and over portions of the Southwest due to afternoon heating. In Alaska, dry high pressure will be in control across eastern sections of the state.

<b>Geographic Area Weather</b>	<b>High Temperatures</b>	<b>Minimum Relative Humidity</b>	<b>Wind</b>
<b>WESTERN GREAT BASIN AREA</b> Partly to mostly sunny, isolated mainly dry thunderstorms possible from the Sierras eastward across central Nevada.	North Valleys: 85 to 95. South Valleys: 90 to 100. Mountains: 70s.	North Valleys: 5 to 15%. South Valleys: 5 to 15%. Mountains: 10 to 20%.	North: South at 5 to 15 mph. South: South at 5 to 15 mph.
<b>SOUTHWEST AREA</b> Mostly sunny, dry and most of Arizona. Partly cloudy all of New Mexico and eastern Arizona with widely scattered to scattered thunderstorms. Some dry storms likely from eastern Arizona into western and central New Mexico.	60s and 70s mountains, 80s and 90s lower elevations, 100 to 105 southwestern deserts.	5 to 15% for much of Arizona and western New Mexico, 15 to 30% from the Continental Divide to the central New Mexico mountain chain, 30%+ eastward.	West to southwest 10 to 15 mph with some gusts to 20 to 25 mph Arizona and western New Mexico. East to southeast 10 to 20 mph from central New Mexico eastward into west Texas. East to northeast 10 to 20 mph northeastern New Mexico into northern New Mexico.
<b>ALASKA AREA</b> <b>Interior</b> Mostly sunny in the east and partly to mostly cloudy with a chance of light rain showers in the west. Isolated dry thunderstorms in the north central and north. <b>South Central</b> Partly cloudy. <b>Southeast</b> Sunny.	<b>Interior</b> 68 to 86 in the central and east. 60s to low 70s in the west. <b>South Central</b> 70s to lower 80s. <b>Southeast</b> 60s coastal areas to lower 80s inland areas.	<b>Interior</b> 20 to 30% in the east. 30 to 45% in the west. <b>South Central</b> 40 to 50% except 15 to 25% in the Copper River Basin. <b>Southeast</b> 20 to 35%.	<b>Interior</b> Northwest to west 10 to 15 mph. <b>South Central</b> Southwest winds 10 to 15 mph. <b>Southeast</b> Light winds becoming southwest to 15 mph in the afternoon.
<b>SOUTHERN CALIFORNIA AREA</b> Areas of morning low clouds and fog into the coastal valleys. Isolated thunderstorms over central California from the Sierra Crest eastward. Otherwise sunny.	65 to 75 coastal areas. 70 to 85 mountains. 80 to 90 valleys. 90 to 100 upper deserts. 100 to 110 lower deserts.	12 to 25%.	Southwest to northwest 5 to 15 mph.
<b>ROCKY MOUNTAIN AREA</b> Decrease in thunderstorm activity, except isolated showers northern Wyoming, South Dakota and southern Colorado.	70s to 80s. 60s mountains.	Less than 20% across western Colorado, southern Wyoming into western Nebraska, with higher values elsewhere.	Northeast winds 8 to 20 mph over northern Wyoming and South Dakota, lighter winds elsewhere.

## **ENTRAPMENT AVOIDANCE**

Avoiding situations where firefighters become entrapped is the first concern when devising strategy and tactics. The following discussion points are among the things that should be considered.

- Review how LCES relates to the 10 Standard Fire Orders.

- Discuss safety zone, entrapment, and deployment area:

- Safety zone – a preplanned area of sufficient size and suitable location that is expected to prevent injury to fire to firefighters from known hazards without using fire shelters.
- Entrapment – when a firefighter is trapped between the oncoming fire and a safety zone, causing turnover with or without a fire shelter deployment.
- Deployment area – a selected topographical site that must be used when retreat to a safety zone is cut off by fire, has little or no fuel to cause flame impingement on the fire shelter, which will disintegrate it.

- Discuss escape routes:

- Escape route – the travel route or path that provides the safety margin allowing the firefighter a retreat to the safety zone before the flame front overtakes the firefighter
- Have multiple escape routes in case of cut off
- Scout and personally observe hazards (e.g., cliffs, loose soils, rocks, vegetation, steep slopes, etc.).
- Precut escape lanes to safety zones.
- Use predicted fire behavior to assess impact on escape routes.
- Time your escape routes before needing to actually use them. Account for slowest firefighters and or equipment. Know your escape time.
- Clearly mark escape routes.
- Do not locate escape routes near chimneys, saddles, narrow canyons or box canyons.
