OPERATIONAL BRIEFINGS

Operational briefings are critical to safe fire operations. To ensure a consistent and effective briefing, a standardized briefing checklist should always be used. The following checklist is printed on the cover of the NWCG Incident Response Pocket Guide:

- Situation:
 - Fire name, location, map orientation, other incidents in the area
 - Terrain influences
 - Fuel type and conditions
 - Fire weather (previous, current, and expected)
 - Fire behavior (previous, current, and expected)
- Mission/Execution:
 - Command (Incident Commander/immediate supervisor)
 - Commander's intent
 - Specific tactical assignments
 - Contingency plans
- Communications:
 - Communication Plan (tactical, command, air/ground frequencies, cell phone numbers, etc.)
 - Medivac Plan
- Service/Support:
 - Other resources that may be working adjacent to you and those available to order
 - Aviation operations
 - Logistics (e.g., transportation, supplies, equipment)
- Risk Management:
 - Identify known hazards and risks
 - Identify control measures to eliminate hazards and reduce risk

- Identify trigger points for disengagement or reevaluation of operational plan
