

**INCIDENT MANAGEMENT SITUATION REPORT**  
**TUESDAY, AUGUST 9, 2005 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was heavy nationally with 305 fires reported. Eleven new large fires were reported, four in the Northwest Area, two each in the Northern Rockies and Southwest Areas, and one each in the Rocky Mountain, Eastern Great Basin and Eastern Areas. Six large fires were contained, four in the Northwest Area and one each in the Southern and Rocky Mountain Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Idaho, Kansas, Michigan, Minnesota, Montana, Nebraska, Nevada, New Mexico, Oregon, South Dakota, Utah, Washington and Wyoming.

**NORTHWEST AREA INCIDENTS / LARGE FIRES:**

SCHOOL, Umatilla National Forest. A Type 1 Incident Management Team (Anderson) is assigned. This fire is 16 miles south of Pomeroy, WA in timber. Private residences, Tucannon Lookout Tower, Camp Wooten, cultural sites and wildlife habitat remain threatened. Structure protection is in place. Steep terrain and rolling debris is hampering containment efforts. Active torching and extreme burning conditions were observed.

BLOSSOM COMPLEX, Siskiyou National Forest. A Type 2 Incident Management Team (Paul) is assigned. A unified command has been established between the U.S. Forest Service and the Oregon Department of Forestry. This complex, comprised of the Blossom, Huggins and Solitude fires, is 25 miles northeast of Gold Beach, OR in timber. Wildlife habitat and private structures along the Rogue River are threatened. Inaccessible terrain continues to hamper containment efforts. Downhill backing fire, rolling debris and isolated torching were reported. Burn out operations continue.

DIRTY FACE, Washington State Department of Natural Resources - Southeast. A Washington Interagency Incident Management Team (Furlong/Gormley) is assigned. This fire is 25 miles northwest of Leavenworth, WA in timber. Steep, inaccessible terrain continues to hinder containment efforts. An evacuation notice is in effect for nearby residences. Structure protection remains in place. Private residences, historic sites, a state park and endangered species habitat remain threatened. Fire behavior included short upslope runs, occasional torching and downslope backing fire. Burn out operations continue.

BURNT BREAD, Washington State Department of Natural Resources Northeast. A Washington Interagency Incident Management Team (Johnson/Barnett) is assigned. This fire started on private land 17 miles southeast of Tonasket, WA in timber, grass and brush. Structures remain threatened. Steep terrain continues to hamper containment efforts. Occasional torching, smoldering and spotting were reported.

MULE PEAK, Wallowa-Whitman National Forest. A Type 2 Incident Management Team (West) is assigned. This fire is 20 miles southeast of La Grande, OR in timber and grass. Endangered species habitat remains threatened. Steep terrain and heavy subalpine fuels continue to impede containment efforts. Minimal fire behavior with creeping and smoldering was reported.

LICK CREEK, Washington State Department of Natural Resources Southeast. A Washington Interagency Incident Management Team (Berndt/LaFave) is assigned. This fire is six miles north of Cle Elum, WA in logging slash, brush understory, timber and grass. Private structures and wildlife habitat remain threatened. Isolated torching was reported. Burn out operations were completed.

TRYON COMPLEX, Wallowa-Whitman National Forest. A Type 2 Incident Management Team (Lunde) will assume command today. This fire is 20 miles north of Imnaha, OR in timber and grass. Steep terrain, limited access and rattlesnakes are hindering containment efforts. Possible archaeological sites are threatened. Rapid rates of spread, running and torching were observed.

RINEHART ROAD, Oregon Department of Forestry. This fire is 15 miles northeast of La Grande, OR in timber, brush and grass. Private residences and ranches remain threatened. Minimal fire behavior was observed.

GRANITE COMPLEX, Wallowa-Whitman National Forest. This lightning-caused Wildland Fire Use (WFU) incident is 30 miles east of Enterprise, OR in timber and grass. The fire is in monitor status, and is being managed to meet resource objectives.

## NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:

CAMP 32, Kootenai National Forest. A Type 1 Incident Management Team (Bennett) is assigned. This fire is nine miles southwest of Eureka, MT in timber. Private residences remain threatened. Active fire behavior with torching was reported.

I 90, Lolo National Forest. A Type 1 Incident Management Team (Sandman) is assigned. This fire is one mile south of Alberton, MT in timber, and includes the West Mountain, Tarkio, Fish and Alberton East fires. West Mountain community residents remain evacuated. Private residences, commercial properties and utility corridors are threatened. Structure protection is in place. River access points remain closed. Steep, rugged terrain and low visibility continue to impede containment efforts. Short sustained crown runs, intermittent torching, spotting and backing fire were observed.

PROSPECT, Lolo National Forest. Type 2 Incident Management Team (Cowin) is assigned. This fire is 12 miles south of Superior, MT in timber. Structures and historical sites are threatened. Poor access and heavy fuels are hindering containment efforts. Active fire behavior with torching, crowning, running and spotting was reported.

BARECASTLE, Bitterroot National Forest. A Type 2 Incident Management Team (Specht) is assigned. This fire is 20 miles southwest of Darby, MT in timber and grass. Barecone Lookout has been evacuated. Forest road 1303 and Castle Rock Trail remain closed. Steep terrain is impeding containment efforts. Independent crowning and running fire were observed.

ROCKIN, Bitterroot National Forest. A Type 2 Incident Management Team (Benes) is assigned. This fire, formerly named Rockin Complex, is 10 miles northwest of Darby, MT in timber. An area closure is in effect for the Rock Creek trailhead and the west end of Lake Como. Lick Creek Experimental Research and cultural sites are threatened. Narrow canyons, steep, rocky terrain and adverse weather conditions continue to hamper containment efforts. Group torching and spotting were observed.

KELLY POINT, Flathead National Forest. A Fire Use Management Team (Cook) will assume command today. This fire will be managed in conjunction with the Limestone Peak fire. The fire is 38 miles southeast of Bigfork, MT in timber. The fire will be managed with a confine suppression strategy. Black Bear administrative site is threatened; structure protection is in place. A closure order is in effect for the east side of South Fork Trail from Meadow Creek to Salmon Forks and for the west side of the South Fork Trail from Black Bear to Salmon Forks. Active fire behavior with crowning and spotting was reported.

LIMESTONE PEAK, Flathead National Forest. A Fire Use Management Team (Cook) will assume command today. This fire will be managed in conjunction with the Kelly Point fire using a confine suppression strategy. This fire, located in the Bob Marshall Wilderness, is 41 miles southeast of Bigfork, MT in timber, shrub and grass. Administrative cabin sites remain threatened.

LONG BLACK COMPLEX, Clearwater National Forest. A Type 2 Incident Management Team (Carlson) is assigned. This incident is 38 miles northeast of Pierce, ID in timber. Steep terrain and limited access are hindering containment efforts. Interior single tree torching, smoldering and backing fire were reported.

PAGET, Custer National Forest. This fire is 16 miles south of Ashland, MT in timber. Creeping was reported.

FROG POND, Beaverhead/Deerlodge National Forest. This fire is 25 miles southwest of Phillipsburg, MT in timber. Minimal fire activity was reported. No new information was received.

EL CAPITAN, Bitterroot National Forest. This lightning-caused Wildland Fire Use (WFU) incident is 19 miles southwest of Hamilton, MT in timber. The fire is being managed to accomplish resource objectives. Moderate growth rates and smoldering were observed. This will be the last narrative report unless significant activity occurs.

ELK LAKE, Bitterroot National Forest. This lightning-caused Wildland Fire Use (WFU) incident is 17 miles southwest of Hamilton, MT in timber. The fire is being managed to accomplish resource objectives. Smoldering and moderate growth rates were reported. This will be the last narrative report unless significant activity occurs.

#### **EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:**

CADAGAN COMPLEX, Salmon-Challis National Forest. Type 2 Incident Management Team (Brunner) is assigned. This complex, comprised of the Hale Gulch and Bear Basin fires, is 15 miles west of North Fork, ID in Douglas fir and heavy dead and downed fuels. Private residences and commercial property remain threatened. Difficult access, rolling materials and steep terrain are hampering containment efforts. Precipitation temporarily moderated fire activity. Isolated torching, smoldering and creeping were reported.

TOE JAM, Boise District, Bureau of Land Management. This fire started on private land 10 miles east of Weiser, ID in grass and sage. Rocky terrain and limited access are impeding containment efforts. Active fire behavior was reported.

### ALASKA AREA INCIDENTS / LARGE FIRES:

NULATO #3, Alaska Fire Service, Galena Zone. A Type 2 Incident Management Team (Jandt) is assigned. This fire is four miles northwest of Nulato, AK in black spruce and tundra. Intermittent torching and backing fire were reported.

MISSION CREEK, Alaska Fire Service, Upper Yukon Zone. This fire started on Alaska Native Claims Settlement Act land nine miles west of Eagle, AK in black spruce and tundra. Smoldering with backing fire was observed. No further information was received.

BOUNDARY CREEK, Alaska Fire Service, Upper Yukon Zone, Bureau of Land Management. This fire started on Alaska Native Claims Settlement Act land six miles southeast of Eagle, AK in black spruce and hardwood litter. A portion of the fire is in Canada. Structures along the Taylor Highway near O'Brien and Dome Creeks remained potentially threatened. Continuous crown fire with 50-foot flame lengths, isolated torching and backing fire were observed.

### SOUTHERN AREA INCIDENTS / LARGE FIRES:

REREG COMPLEX, Ouachita National Forest. This complex is eight miles east of Broken Bow, OK in timber. Heavy fuel loads, extreme fire behavior and lightning storm activity are impeding containment efforts. Running, torching, crowning and spotting were observed.

KEYHOLE, Everglades National Park. This lightning-caused Wildland Fire Use (WFU) incident is 17 miles southwest of Florida City, FL in grass. The fire is being managed to accomplish resource objectives. No new information was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN

### SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

PINYON COMPLEX, Inyo National Forest. This complex, comprised of the Oak Creek, Pinyon and Hogback fires is six miles northwest of Independence, CA in timber and brush. The north and south forks of Sawmill Creek are in patrol status. Creeping with minimal fire behavior in the interior fuels continues.

COMB COMPLEX, Sequoia & Kings Canyon National Park. A Fire Use Management Team (Hall) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Comb and East Creek fires is 18 miles northeast of Grant Grove, CA in mixed conifer and chaparral. The fire is being managed to accomplish resource objectives. The Comb fire continues to back into Lewis Creek drainage.

NBF Nebraska National Forest

## OUTLOOK:

**Weather Discussion:** A warm and moderately moist air mass will remain over the West through mid-week under the influence of an upper level high pressure center. Moisture will continue to be imported from the southwest over the Great Basin and Northern Rockies the next few days for thunderstorms. Greatest threat for some dry thunderstorms in this region remains over eastern Oregon, northern Nevada, Idaho, and southwest Montana. In addition, a weather disturbance approaches the Pacific Northwest from the north today with a chance for mixed wet and dry thunderstorms across portions of northern Washington and the Idaho Panhandle. A very strong upper level high pressure ridge will remain over Alaska for dry weather and near record temperatures.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Northern California</b> Sunny, except low clouds and fog in coastal areas.	60s coast, 80s higher terrain, and 90s to 105 interior valleys.	40% or more coastal areas and 12 to 25% inland, except 7 to 15% east of the Cascade-Sierra crest.	Southwest to northwest 5 to 10 mph with gusts to 22 mph coastal areas and east of the Cascade-Sierra crest. Southeast to southwest 3 to 7 mph with gusts to 17 mph elsewhere.
<b>Rocky Mountain</b> Isolated to widely scattered thunderstorms over Wyoming and South Dakota, with scattered thunderstorms over Colorado and Nebraska.	Upper 80s to mid 90s over Colorado, Kansas, and Nebraska, with upper 70s to mid 80s in Wyoming and South Dakota.	25 to 35% in most locations.	North 10 to 20 mph across northern portions, and from the south at 10 to 20 mph over Kansas.
<b>Southern California</b> Morning low clouds and fog coastal areas, otherwise mostly sunny in the morning becoming partly to mostly cloudy in the afternoon with showers and thunderstorms over the Sierra and over the southern California mountains and deserts.	80 to 95 mountains. 90 to 105 valleys. 95 to 105 upper deserts. 95 to 105 lower deserts.	10 to 30% central California and 20 to 40% southern California.	Southeast to southwest 5 to 15 mph.

<b>Western Great Basin</b> Chance of morning showers in the north otherwise sunny to partly cloudy skies. In the afternoon, mostly cloudy with scattered showers and thunderstorms in the far south. More isolated showers and thunderstorms in central Nevada.	North valleys: 86 to 105. South valleys: 90 to 100. Mountains: 76 to 94.	North valleys: 7 to 20%. South Valleys: 20 to 30%. Mountains: 12 to 38%.	North: southwest to west at 5 to 10 mph with gusts to 25 mph. South: variable at 5 to 10 mph with afternoon northeasterly gusts to 20 mph.
<b>Eastern Great Basin</b> Partly cloudy with isolated thunderstorms western Idaho, and scattered showers and thunderstorms southeast Idaho and the Bridger-Teton and Utah.	Idaho, Bridger-Teton: 72 to 85 mountains, 85 to 96 valleys. Northern Utah: 75 to 85 mountains, 85 to 97 valleys. Southern Utah, Arizona Strip: 71 to 85 mountains, 85 to 97 valleys.	Idaho, Bridger-Teton: 18 to 28% mountains, 10 to 25% valleys. Northern Utah: 22 to 35% mountains, 15 to 25% valleys. Southern Utah, Arizona Strip: 35 to 55% mountains, 19 to 35% valleys.	Idaho, Bridger-Teton: West to northwest 10 mph. Northern Utah: Upslope/upvalley 5 to 10 mph. Southern Utah, Arizona Strip: Upslope/upvalley 5 to 10 mph.
<b>Alaska</b> Sunny.	70s to mid 80s.	25 to 35%.	South to southwest 10 to 15 mph.

### **FIRE NOT SCOUTED AND SIZED UP**

Watchout Situation #1 comes up during initial attack and every time resources arrive at a fire.

● Before taking action on the fire, the following considerations must be addressed:

- Can you personally observe the fire or must you use scouts? Describe ways you can scout and size up a fire.
- Do you know the location of the fire perimeter? Discuss situations in which the fire perimeter may not be obvious. (Spotty fires, etc.)
- Do you know the direction of fire spread? When isn't the direction of fire spread obvious? (Wind shifts, spotty fires, etc.)
- Does the direction of fire spread increase risk? Talk about situations where you may have to approach the head of the fire. (Hiking down from a helispot, approaching from an existing road, switching winds, etc.)
- Do you know the fuels and their condition? What kind of information will you assume from what you already know about fuel types? (Spot fires in fir, extreme fire potential in flashy fuels, etc.)
- Do topographic hazards exist? What can you assume from what kind of terrain the fire covers? (Slope, chimneys, aspect, etc.)
- Does enough information exist to establish a plan of attack? When do you have enough information to begin fighting fire? What do you need to know?
- Do other dangers exist? Have you talked about factors specific to the area you are working in? (Hunters in the woods, drought, snag patches, etc.)

● To reduce the risks:

- Post lookouts until the fire is sized up and escape routes and safety zones are established.
- Retreat if the situation is too complex. Review fires where you had to wait until the area in which you were assigned to work was scouted and sized up before you were allowed onto the fireline.
