

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, AUGUST 26, 2005 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was light nationally with 108 fires reported. Four new large fires were reported, one each in the Northwest, Northern Rockies, Northern California and Southwest Areas. Seven large fires were contained, two each in the Western Great Basin and Northwest Areas and one each in the Eastern Great Basin, Northern California and Southern Areas. Very high to extreme fire indices were reported in California, Idaho, Montana, Nevada, Oregon, Utah and Washington.

An Area Command Team (Roundsville) has been tasked by the National Multi-Agency Coordinating Group to evaluate radio communications on incidents with consideration to training and education, maintenance and replacement of equipment, narrow banding, communication and coordination with cooperators, and usability.

NORTHWEST AREA INCIDENTS / LARGE FIRES:

DEER CREEK, Southwest District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Savage) is assigned. This fire is eight miles north of Cave Junction, OR in grass, brush and timber. Three residences and several other structures have been destroyed. Steep terrain and hot, windy weather contributed to extreme fire behavior.

BURNT CABIN, Umatilla National Forest. This fire is 16 miles southeast of Milton-Freewater, OR in timber. Minimal fire behavior was observed. Road closures will be lifted today. No further information was received.

FLY, Wallowa-Whitman National Forest. A Type 2 Incident Management Team (Goheen) is assigned. This fire is 20 miles southwest of La Grande, OR in grass, timber and slash. Several private cabins remain threatened. Fire behavior was limited to creeping and smoldering, with consumption of heavy fuels.

GRANITE COMPLEX, Wallowa-Whitman National Forest. A Wildland Fire Use Team (Cones) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is 30 miles east of Enterprise, OR in timber and grass. This complex is being managed to accomplish resource objectives. Structure protection remains in place for historic cabins in the area. An area closure remains in effect. Active backing fire, moderate rates of spread and individual tree torching were observed.

NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:

PROSPECT, Lolo National Forest. A Type 2 Incident Management Team (Carlson) is assigned. This fire is 12 miles south of Superior, MT in timber. Poor access, steep terrain, and heavy fuels continue to hinder containment efforts. Structures remain threatened. The fire continues to creep and smolder in pockets of heavier fuels; isolated torching was observed. No further information was received.

SELWAY-SALMON COMPLEX, Bitterroot National Forest. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the El Capitan, Wapiti, Beaverjack, Reynolds Lake and numerous other fires, is 26 miles southwest of Hamilton, MT in timber. This complex, burning on both the Salmon-Challis and Bitterroot National Forests, is being managed to accomplish resource objectives. A ranch, campground, work center, historic ranger station, cabin and two lookouts are potentially threatened. Structure protection remains in place. Magruder Corridor Road is closed to through traffic. Trail closures remain in effect in active fire areas. Creeping and active surface fire were reported.

SIGNAL ROCK, Bitterroot National Forest. A transfer of command from a Type 2 Incident Management Team (Benes) to another Type 2 Incident Management Team is planned. The fire is 17 miles southwest of Philipsburg, MT in timber and is burning on both the Bitterroot and Beaverhead/Deerlodge National Forests. Moderate fire activity was observed with single and group tree torching mostly along the west and southwest flanks. Burn out operations are planned.

LONG BLACK COMPLEX, Clearwater National Forest. This complex, comprised of the Long Creek and Black Canyon fires, is 38 miles northeast of Pierce, ID in timber. Steep terrain, numerous snags and limited access continue to hamper containment efforts. The north and east flanks of the Black Canyon fire remain active, with isolated single and group tree torching in the interior. The Long Creek fire continues to be monitored by air.

RED RIVER COMPLEX, Nez Perce National Forest. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Burnt, Center and numerous other fires is 23 miles southeast of Elk City, ID in timber. This complex is being managed to accomplish resource objectives. Structure protection is being implemented for trail facilities and a lookout. Isolated hot spots and individual tree torching were observed. The team is also supporting prescribed burns on the Clearwater National Forest.

NORTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

BARREL, Northern California Resource Area, Bureau of Land Management. A Type 2 Incident Management Team (Giachino) is assigned. This fire is 13 miles northeast of Fort Bidwell, CA in brush and timber. Structures and wildlife habitat are threatened. Heavy fine fuel loading, rugged terrain, poor access, winds and low relative humidity are hampering containment efforts. The fire was active with torching and short runs in interior unburned fuels.

HARDING, Tahoe National Forest. A Type 2 Incident Management Team (Sinclear) is assigned. This fire is two miles northeast of Sierraville, CA in sagebrush and mixed conifer. A subdivision, rangeland and archeological sites are potentially threatened. Torching, sustained crown runs and spotting were observed.

EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

PELICAN POINT, Northwest State, Utah Division of Forestry, Fire & State Lands. This fire is ten miles southeast of Fairfield, UT in grass. Residences, communication towers, an explosives plant, a VHF omnidirectional range navigation beacon (VOR), and cultural resources are

potentially threatened. State Route 68 remains closed. Steep terrain, heavy fine fuel loading, and strong gusty winds are hampering containment efforts. Uphill runs with spotting were observed. FRANK CHURCH, Payette National Forest. A Wildland Fire Use Management Team (Hahnenberg) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, comprised of the Bear Creek, Root Creek, West Fork/Joe, Missouri Ridge and several other fires is 50 miles northeast of McCall, ID in timber. The fire is being managed to accomplish resource objectives. Commercial property, residences and historical structures are threatened; structure protection is in place. Three fires remain active with low rates of spread.

FIVE SPRING, Northwest State, Utah Division of Forestry, Fire & State Lands. This fire is 20 miles northwest of Evanston, WY in brush and slash. High winds were reported.

ALASKA AREA INCIDENTS / LARGE FIRES:

BEAVER CREEK, Alaska Fire Service, Upper Yukon Zone, Bureau of Land Management. This fire is 45 miles northwest of Fairbanks, AK in black spruce. All personnel will be demobilized today. This will be the last report unless new information is received.

COLEEN MOUNTAIN, Alaska Fire Service, Upper Yukon Zone, Bureau of Land Management. This fire is 40 miles northeast of Chalkyitsik, AK in black spruce, hardwoods and grasses. Native allotments and cabins at Canyon Village and Old Rampart are threatened. Structure protection measures are in place. Burn out operations are continuing at both locations. Backing, running and crowning fire behavior were observed.

TALBIKSOK, Alaska Division of Forestry, Southwest Area Forestry Dispatch. This fire started on Fish and Wildlife Service land 15 miles southeast of Russian Mission, AK in mature white spruce, birch and black spruce. Additional helispots were established along the perimeter to decrease crew shuttle times. Smoldering with minimal creeping was observed.

OUTLOOK:

Weather Discussion: The upper level low pressure center will continue to move east over the northern Plains today. Warm and dry conditions will continue to move into the West. Isolated thunderstorms will be confined to the Southwest today. Showers in Alaska will be tapering off with some precipitation lingering in the southeast.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Northern Rockies A ridge of high pressure over western portions of the geographic area shifts east this weekend and will bring warmer and drier conditions to all areas. It will be warmer and drier Saturday.	West of divide: 85 to 95. East of divide: 80s. North Dakota: 70s.	West of Divide: 17 to 22%. East of Divide: 17 to 27%. North Dakota: 30 to 50%.	West of divide: West 5 to 15 mph. East of divide: Northwest 10 to 20 mph. North Dakota: Northwest 15 to 25 mph.
Northwest Sunny	West of Cascades: Coast: 60s and 70s. Inland: 70s north to 90s south. Eastside: mostly 80s and 90s.	West of Cascades: Coast: mostly above 50%. Inland: 30 to 35% north and 20 to 30% south. Eastside generally 15 to 25% except down to 10% in southeast	Mostly westerly 5 to 15 mph west of Cascades and variable 5 to 10 mph eastside.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
		Oregon desert.	
Northern California Sunny.	Mostly 80s and 90s, near 102 warmest inland valleys and 60s to mid 70s near the coast.	10 to 25%.	Southwest to northwest 5 to 12 mph with gusts to 22 mph coastal areas and east of the Cascade-Sierra crest.
Southern California Morning low clouds and fog coastal areas, otherwise mostly sunny.	80 to 95 mountains. 90 to 100 valleys. 90 to 100 upper deserts. 105 to 115 lower deserts.	10 to 20%.	Southeast to southwest 5 to 15 mph.
Western Great Basin Mostly sunny skies with some afternoon cumulus clouds.	North valleys: 84 to 97. South valleys: 88 to 108. Mountains: 72 to 90.	North valleys: 9 to 16%. South valleys: 10 to 18%. Mountains: 14 to 25%.	Southwest to northwest 5 to 15 mph.
Eastern Great Basin Idaho, Bridger-Teton: Mostly sunny Northern Utah: Mostly sunny. Southern Utah, Arizona Strip: Partly cloudy, isolated mountain thunderstorms.	Idaho, Bridger-Teton: 63 to 80 mountains, 80 to 93 valleys. Northern Utah: 71 to 82 mountains, 78 to 94 valleys. Southern Utah, Arizona Strip: 72 to 88 mountains, 88 to 100 valleys.	Idaho, Bridger-Teton: 20 to 30% mountains, 12 to 20% valleys. Northern Utah: 20 to 30% mountains, 15 to 22% valleys. Southern Utah, Arizona Strip: 22 to 32% mountains, 14 to 24% valleys.	Idaho, Bridger-Teton: West 10 to 15 mph. Northern Utah: Upslope/upvalley 4 to 8 mph. Southern Utah, Arizona Strip: Upslope/upvalley 4 to 8 mph.
Alaska Interior Alaska: Mostly cloudy with scattered to isolated rain and showers.	Upper 40s and 50s.	Above 40%.	Northwest 5 to 15 mph.

Roadside Incident Response

Nationally, the number of injuries and fatalities among emergency responders who are responding to roadside incidents is increasing at an increasing rate. Although most wildland fires occur in remote areas, there are situations where wildland fire personnel are responding to fires along rural country roads, jeep roads, or major highways; the risk still exists for our firefighters. Below is a checklist of considerations that should be utilized when responding to fires and other incidents along roadsides:

Considerations

- Firefighter and public safety will always be the number one priority.
- Utilize L.C.E.S. in all incident activities.
- Personal Protective Equipment will be used on all incidents.

Upon Arrival at the Scene

Size up incident- see Incident Response Pocket Guide

- What has happened?
- What is happening?
- What will or could happen?
- Is this a HazMat situation?

Risk Management Process-

- Decision Point, Go No Go. See the Incident Response Pocket Guide, page 1

Tactical Considerations

- Anytime traffic flow is affected by the incident, contact the jurisdictional law enforcement agency for assistance.
- Conduct all operations as far from traffic lanes as possible to provide for crew and public safety.
- Park units on the same side of the roadway when ever possible to avoid traffic congestion.
- Personnel do not exit the fire apparatus until instructed to do so by the module leader.
- Exit the fire apparatus away from the roadway or where hazard exposure is minimized.
- Exit the fire apparatus with full personal protective equipment.
- Post a lookout to watch for and control oncoming traffic.
- Utilize forward and rear spotters when visibility is impaired or road conditions warrant.
- Utilize and place road flares or other traffic warning signs when ever possible
- If equipment needs to be removed from the traffic side of the apparatus, one person will retrieve the equipment and a lookout will watch for oncoming traffic.
- Engine operators will operate pumps from the non-traffic side or from the cab of the apparatus when possible. Keep all hose, fire tools, and equipment out of traffic lanes when possible.
- During night operations utilize reflective clothing, vests and other safety equipment as necessary.
- All emergency responses on roadways will be concluded as quickly as possible to reduce personnel exposure.
- Cancel or demob unnecessary apparatus as soon as possible.

** Each agency emergency vehicle operator will follow their particular state laws and agency policies governing the operations of emergency vehicles.
