

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, AUGUST 29, 2005 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was light nationally with 146 fires reported. Four new large fires were reported, two in the Northern Rockies Area and one each in the Western Great Basin and Southern Areas. No large fires were contained. Very high to extreme fire indices were reported in Arizona, California, Idaho, Montana, Nebraska, Nevada, Oregon, South Dakota, Washington and Wyoming.

An Area Command Team (Rounsaville) has been tasked by the National Multi-Agency Coordinating Group to evaluate radio communications on incidents with consideration to training and education, maintenance and replacement of equipment, narrow banding, communication and coordination with cooperators, and usability.

NORTHWEST AREA INCIDENTS / LARGE FIRES:

DEER CREEK, Southwest District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Savage) is assigned. This fire is eight miles north of Cave Junction, OR in grass, brush and timber. Residences and other structures remain threatened. Steep terrain, heavy fuels, and hot and windy weather are hampering containment efforts. Active fire behavior was observed.

PARK, Central Oregon District, Oregon Department of Forestry. This fire is seven miles north of La Pine, OR in timber and grass. Numerous residences and state park facilities are threatened. Evacuations have been lifted and residents have been allowed to return home. The Deschutes River remains closed to river traffic. Smoldering, ground fire with open flames, and some interior torching were observed.

GRANITE COMPLEX, Wallowa-Whitman National Forest. A Wildland Fire Use Team (Cones) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is 30 miles east of Enterprise, OR in timber and grass. This complex is being managed to accomplish resource objectives. Structure protection remains in place for historic cabins in the area, and an area closure remains in effect. An increase in winds and lower relative humidity has caused an increase in surface fire spread with occasional short duration crown fire and short range spotting.

SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

BLAISDELL, San Bernadino National Forest. A Type 2 Incident Management Team (Garwood) is assigned. This fire is seven miles north of Palm Springs, CA in grass. The Palm Springs Tramway, a state park and wilderness area remain threatened. Steep rocky terrain, limited access and gusty winds are hampering containment efforts. Backing fire with slow to moderate rates of spread was observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN

NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:

SEEPAY, Flathead Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Cowin) is ordered. This fire is two miles southwest of Perma, MT in timber. A microwave communications site, structures and cultural sites are threatened. Area road closures are in effect. Running and crowning fire behavior were observed.

COTTONWOOD CREEK, Southern Land Office, Montana Department of Natural Resources and Conservation. This fire started on private land eight miles east of Columbus, MT in tall grass and timber. Residences, rangeland and cropland are threatened. Numerous snags are hampering containment efforts. Low rate of spread, smoldering and interior torching were observed. A reduction in acreage is due to more accurate mapping.

POWER, Southern Land Office, Montana Department of Natural Resources and Conservation. This fire started on private land 16 miles north of Billings, MT in grass. Residences and powerlines are threatened. Extreme fire behavior was observed with 15 to 20 foot flame lengths.

PROSPECT, Lolo National Forest. This fire is 12 miles south of Superior, MT in timber. Steep terrain and heavy fuels continue to hinder containment efforts. Structures, historic features and wildlife habitat remain threatened. Creeping and smoldering with open flames and group torching were observed.

SELWAY-SALMON COMPLEX, Bitterroot National Forest. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the El Capitan, Wapiti, Beaverjack, Reynolds Lake and numerous other fires, is 26 miles southwest of Hamilton, MT in timber. This complex, burning on both the Salmon-Challis and Bitterroot National Forests, is being managed to accomplish resource objectives. A ranch, campground, work center, historic ranger station, cabin and two lookouts remain potentially threatened, and structure protection remains in place. Magruder Corridor Road is closed to through traffic. Trail closures remain in effect in active fire areas. Active surface spread was observed with torching and short range spotting.

SIGNAL ROCK, Bitterroot National Forest. A Type 2 Incident Management Team (Turman) is assigned. The fire is 17 miles southwest of Philipsburg, MT in timber and is burning on both the Bitterroot and Beaverhead/Deerlodge National Forests. Crown runs and spotting were observed.

LONG BLACK COMPLEX, Clearwater National Forest. This complex, comprised of the Long Creek and Black Canyon fires, is 38 miles northeast of Pierce, ID in timber. Steep terrain, numerous snags and limited access continue to hamper containment efforts. Spotting, torching and short upslope runs were observed on the Black Canyon fire.

RED RIVER COMPLEX, Nez Perce National Forest. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Burnt, Center and several other fires is 23 miles southeast of Elk City, ID in timber. This complex is being managed to accomplish resource objectives. A fire lookout and trailhead facilities are threatened. Structure protection is in place. Torching and short runs were observed on several of the fires.

ERICKSON SPRING, Miles City Field Office, Bureau of Land Management. This fire is 15 miles southeast of Ashland, MT in grass and timber understory. Interior burning was observed. No further information was received.

ROCKIN, Bitterroot National Forest. This previously reported fire is 10 miles northwest of Darby, MT in timber. Narrow canyons, steep and rocky terrain continue to hamper containment efforts. Higher temperatures, lower humidity and windy conditions increased fire activity. Active surface fire in unburned islands and single tree torching were observed.

NORTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

MANTON, Tehama-Glenn Unit, California Department of Forestry and Fire Protection. A CDF Type 1 Incident Command Team (Paul) is assigned. This fire is 30 miles northeast of Red Bluff, CA in grass, brush and timber. Roads have been reopened and evacuation orders have been lifted. Occasional surface fire was observed. The reduction in acreage is due to more accurate mapping.

BARREL, Northern California Resource Area, Bureau of Land Management. A Type 2 Incident Management Team (Giachino) is assigned. This fire is 13 miles northeast of Fort Bidwell, CA in brush and timber. Wildlife habitat is threatened. Heavy fine fuel loading, rugged terrain and poor access are hampering containment efforts. Low intensity fire behavior was observed.

HARDING, Tahoe National Forest. A Type 2 Incident Management Team (Sinclear) is assigned. This fire is two miles northeast of Sierraville, CA in sagebrush and mixed conifer. Rolling material and steep, rocky terrain are impeding containment efforts. Fire is smoldering with minimal fire activity reported.

WESTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

CHANCE, Northern Region, Nevada Division of Forestry. A Type 2 Incident Management Team has been ordered. This fire is six miles northeast of Elko, NV in sagebrush and grass. Residences, power lines, and radio communication equipment are threatened. A road closure is in effect for Boyd-Kennedy Road and Lamoille Highway. Extreme fire behavior was observed.

7J, Northern Region, Nevada Division of Forestry. This fire is 27 miles west of Mountain City, NV in sage, grass and hay. A structure is threatened. Interior smoldering was observed.

EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

NORTH NEOLA, Uintah and Ouray Agency, Bureau of Indian Affairs. This fire is two miles north of Neola, UT in timber. One residence was lost. Structures and commercial property are threatened; structure protection is in place. Area road closures are in effect. Moderate fire behavior was observed with single tree torching and interior burning. The increase in acreage is due to more accurate mapping.

FRANK CHURCH, Payette National Forest. A Wildland Fire Use Management Team (Hahnenberg) is assigned. This lightning-caused Wildland Fire Use (WFO) incident, comprised of the Bear Creek, Root Creek, West Fork/Joe, Missouri Ridge and several other fires is 50 miles northeast of McCall, ID in timber. The fire is being managed to accomplish resource objectives. Commercial property, residences and historical structures are threatened. Structure protection measures are in place. Active fire behavior was reported on the fires with moderate rates of spread reported.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

HURRICANE KATRINA SUPPORT, Federal Emergency Management Agency. Emergency Support Function #4 is staffed at the Regional Response Coordination Centers in Atlanta, GA and Denton, TX. Two Type 1 Incident Management Teams have been assigned. One team (Custer) will establish a base camp at Port Allen, LA and the other team (Quesinberry) will be at the logistics staging area in Meridian, MS. A third Type 1 Incident Management Team (Pincha-Tulley) has been ordered, and will be staged in Orlando, FL. A Planning Team has been activated to the Long Term Recovery Center in Orlando, FL. Logistics Management Teams have been mobilized to Tallahassee and Meridian, MS. Logistics Management Teams have been ordered for Camp Beauregard, LA and Jackson, MS.

SHORT CREEK, Ouachita National Forest. This fire is 11 miles southeast of Mena, AR in timber. Fire behavior is moderate with less than 2 foot flame lengths reported. Burn out operations are planned.

WF UNIT 11 2005, McFaddin National Wildlife Refuge. This fire is located 20 miles east of Winnie, TX in grass, peat and duff. Hot spots surfacing in the peat are a concern. Smoldering fire behavior was observed. No new information was reported. This will be the last report unless new information is received.

ALASKA AREA INCIDENTS / LARGE FIRES:

COLEEN MOUNTAIN, Alaska Fire Service, Upper Yukon Zone, Bureau of Land Management. This fire is 40 miles northeast of Chalkyitsik, AK in black spruce, hardwoods and grass. Native allotments and cabins at Canyon Village and Old Rampart are threatened. Structure protection measures are in place. Burn out operations are complete. This will be the last report unless new information is received.

OUTLOOK:

Fire Weather Watch: In the afternoon and evening over portions of Wyoming and western South Dakota for winds, very dry relative humidity and fuels.

Red Flag Warnings: Expect both watches and warnings for central Idaho and Montana for cold front passage with high winds, low humidity and dry lightning. Gusty winds and low relative humidity for the northern two-thirds of Nevada, east of and along the entire Cascade-Sierra crest from Oregon to Lake Tahoe.

Weather Discussion: Hurricane Katrina will make landfall early today as a major hurricane of category 4 strength on the southeast Louisiana coast. An upper level low pressure system will move across the Northwest today with a surface cold front moving across the western portions of Montana, Idaho, and Nevada. Although the front will bring cooling conditions with increasing relative humidity, along and ahead of the front will be very dry and windy conditions extending from the Rockies through the Great Basin and into northeastern California. Showers and thunderstorms should be confined mainly behind the front across Washington, western Oregon, central Idaho, and into the western portion of the Northern Rockies. In Alaska, showers will move east across the state today with best precipitation amounts across the south.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Northern Rockies Strong cold front and associated upper level trough will move across the geographic area. Isolated dry thunderstorms and gusty winds ahead and behind the front can be expected. Temperatures will fall 10 to 15 degrees behind the front.	West of divide: 65 to 75. East of divide: 90 to 98. North Dakota: 80 to 90.	West of divide: 40 to 45%. East of divide: 15 to 25%. North Dakota: 30 to 40%.	West of divide: West 15 to 25 mph with locally higher gusts possible. East of divide: South 15 to 25 mph with locally higher gusts possible. North Dakota: Southeast 10 to 20 mph with higher gusts possible.
Northern California Coastal low clouds and fog, otherwise sunny.	85 to 95 warmest inland areas.	12 to 25% inland, except 8 to 18% east of the Cascade-Sierra crest.	Southwest to northwest 7 to 17 mph with gusts to 35 to 40 mph along and east of the Cascade-Sierra crest. Southwest to northwest 5 to 15 mph with gusts to 25 to 30 mph elsewhere.
Southern California Patchy low clouds and fog lower coastal areas, otherwise mostly sunny.	85 to 100 mountains. 95 to 102 valleys. 95 to 105 upper deserts. 110 to 120 lower deserts.	5 to 15%.	Southwest to northwest 10 to 20 mph.
Rocky Mountain Mainly dry, with only isolated afternoon thunderstorms in southern Colorado, and northwest Wyoming.	Upper 80s to low 90s lower elevations, with 70s in the mountains.	RH below 15% is expected across lower elevations of Wyoming and western South Dakota, with values of 15 to 30% elsewhere across the region.	West 15 to 25 mph over Wyoming, and 10 to 20 mph in western South Dakota. Variable 5 to 15 mph elsewhere.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Northwest East of Cascades: Partly to mostly cloudy. Scattered showers and wet thunderstorms. West of Cascades: mostly cloudy with scattered showers and maybe a few wet thunderstorms.	East of Cascades: Mostly 75 to 85, with warmest lowlands. West of Cascades: Mostly 65 to 75, with coolest on coast.	East of Cascades: 20 to 35% lowlands, but 35 to 50% mountains. West of Cascades: generally 50 to 65%.	East of Cascades: Gusty west to northwest at 15 to 25 mph with gusts 30 to 45 mph, with strongest over higher terrain. Westside: Generally northwest 5 to 15 mph.
Western Great Basin Partly to mostly cloudy skies in the north, mostly sunny skies in the south.	North valleys: 84 to 99 South valleys: 88 to 112 Mountains: 70 to 92	North valleys: 8 to 16% South valleys: 10 to 18% Mountains: 12 to 25%	North: Southwest 15 to 30 mph with afternoon gusts of 40 mph. Far south: Southwest 5 to 15 mph with gusts to 25 mph.

ENTRAPMENT AVOIDANCE

Avoiding situations where firefighters become entrapped is the first concern when devising strategy and tactics. The following discussion points are among the things that should be considered.

- Review how LCES relates to the 10 Standard Fire Orders.
- Discuss safety zone, entrapment, and deployment area:
 - Safety zone – a preplanned area of sufficient size and suitable location that is expected to prevent injury to firefighters from known hazards without using fire shelters.
 - Entrapment – when a firefighter is trapped between the oncoming fire and a safety zone, causing burnover with or without a fire shelter deployment.
 - Deployment area – a selected topographical site that must be used when retreat to a safety zone is cut off by fire, has little or no fuel to cause flame impingement on the fire shelter, which will disintegrate it.
- Discuss escape routes:
 - Escape route – the travel route or path that provides the safety margin allowing the firefighter a retreat to the safety zone before the flame front overtakes the firefighter
 - Have multiple escape routes in case of cut off
 - Scout and personally observe hazards (e.g., cliffs, loose soils, rocks, vegetation, steep slopes, etc.).
 - Precut escape lanes to safety zones.
 - Use predicted fire behavior to assess impact on escape routes.
 - Time your escape routes before needing to actually use them. Account for slowest firefighters and or equipment. Know your escape time.
 - Clearly mark escape routes.
 - Do not locate escape routes near chimneys, saddles, narrow canyons or box canyons.
