

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, AUGUST 30, 2005 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was light nationally with 136 fires reported. Eight new large fires were reported, five in the Eastern Basin and one each in the Western Great Basin, Southern and Southwest Areas. Six large fires were contained. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Montana, Nebraska, Nevada, Oregon, South Dakota, Washington and Wyoming.

An Area Command Team (Rounsaville) has been tasked by the National Multi-Agency Coordinating Group to evaluate radio communications on incidents with consideration to training and education, maintenance and replacement of equipment, narrow banding, communication and coordination with cooperators, and usability.

NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:

SEEPAY #2, Flathead Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Cowin) is ordered. This fire is two miles southwest of Perma, MT in timber. A microwave communications site, structures and cultural sites are threatened. Area road closures are in effect. Winds and low relative humidity enabled the fire to make major runs.

COTTONWOOD CREEK, Southern Land Office, Montana Department of Natural Resources and Conservation. This fire started on private land eight miles east of Columbus, MT in tall grass and timber. Residences, rangeland and cropland are threatened. Smoldering in heavy fuels was observed.

POWER, Southern Land Office, Montana Department of Natural Resources and Conservation. This fire started on private land 16 miles north of Billings, MT in grass. Smoldering fire behavior was observed. No further information was received.

PROSPECT, Lolo National Forest. This fire is 12 miles south of Superior, MT in timber. Steep terrain and heavy fuels continue to hinder containment efforts. Creeping with smoldering in interior islands was observed.

SELWAY-SALMON COMPLEX, Bitterroot National Forest. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the El Capitan, Wapiti, Beaverjack, Reynolds Lake and numerous other fires, is 26 miles southwest of Hamilton, MT in timber. This complex, burning on both the Salmon-Challis and Bitterroot National Forests, is being managed to accomplish resource objectives. A ranch, campground, work center, historic ranger station, cabin and two lookouts remain potentially threatened, and structure protection remains in place. Magruder Corridor Road remains closed to through traffic. Trail closures remain in effect in active fire areas. Active surface spread was observed with short range spotting and intense burning in heavy downed fuels on several fires. Other fires exhibited creeping and smoldering.

SIGNAL ROCK, Bitterroot National Forest. A Type 2 Incident Management Team (Turman) is assigned. The fire is 17 miles southwest of Philipsburg, MT in timber and is burning on both the Bitterroot and Beaverhead/Deerlodge National Forests. Highway 38 was closed as a safety precaution. Multiple crown runs and long range spotting were observed.

LONG BLACK COMPLEX, Clearwater National Forest. This complex, comprised of the Long Creek and Black Canyon fires, is 38 miles northeast of Pierce, ID in timber. Steep terrain, numerous snags and limited access continue to hamper containment efforts. Fire behavior moderated with cooler temperatures and higher relative humidity. Short range spotting was observed on the Black Canyon fire. The Long Creek Fire is being monitored by aircraft.

RED RIVER COMPLEX, Nez Perce National Forest. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Burnt, Center and 8 other fires is 23 miles southeast of Elk City, ID in timber. The complex is being managed to accomplish resource objectives. Isolated single tree torching and surface fire were observed.

ERICKSON SPRING, Miles City Field Office, Bureau of Land Management. This fire is 15 miles southeast of Ashland, MT in grass and timber understory. Smoke and open flames were observed in the interior. No further information was received.

ROCKIN, Bitterroot National Forest. This fire is 10 miles northwest of Darby, MT in timber. Narrow canyons, steep and rocky terrain continue to hamper containment efforts. Higher temperatures, lower humidity and windy conditions increased fire activity. Smoke and high winds prevented helicopter recon of the fire. Suppression operations were temporarily suspended until after passage of a cold front.

EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

BELL RAPIDS 2, Twin Falls District, Bureau of Land Management. This fire started on private land one mile north of Hagerman, ID in grass, sage, and riparian areas. Residences, transmission and power lines, cultural resources, and critical wildlife habitat are threatened. A powerline was damaged. Road closures are in effect. Rapid rates of spread with ten foot flame lengths were observed.

PATTERSON, Salmon-Challis National Forest. A Type 2 Incident Management Team (Thomas) has been ordered. This fire is two miles north of Patterson, ID in timber. Residences and commercial property remain threatened. Wind driven runs with crowning was observed.

NORTH NEOLA, Uintah and Ouray Agency, Bureau of Indian Affairs. This fire is two miles north of Neola, UT in timber. Structures and commercial property remain threatened; structure protection is in place. Area road closures remain in effect. Smoldering fire behavior was observed.

FRANK CHURCH, Payette National Forest. A Wildland Fire Use Management Team (Hahnenberg) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, comprised of the Bear Creek, Root Creek, West Fork/Joe, Missouri Ridge and several other fires is 50 miles northeast of McCall, ID in timber. The fire is being managed to accomplish resource objectives. Commercial property, residences and historical structures are threatened. Fire growth was observed on six of the fires. The West Fork/Joe fire experienced a six mile run.

NINE SHOT, Salmon-Challis National Forest. This lightning-caused Wildland Fire Use (WFU) incident is 35 miles southwest of Salmon, ID in timber. The fire is being managed to accomplish resource objectives. This will be the last report unless new information is received.

WHITE CREEK, Salmon-Challis National Forest. This lightning-caused Wildland Fire Use (WFU) incident is 34 miles west of Challis, ID in timber. Short duration crown runs and spotting were observed. The fire is being managed to accomplish resource objectives. This will be the last report unless new information is received.

SOUTH FORK, Salmon-Challis National Forest. This lightning-caused Wildland Fire Use (WFU) incident is 35 miles west of Challis, ID in ponderosa pine and Douglas fir. Torching was observed. The fire is being managed to accomplish resource objectives. This will be the last report unless new information is received.

WESTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

CHANCE, Northern Region, Nevada Division of Forestry. A Type 2 Incident Management Team (Brunner) will assume command today. This fire is six miles northeast of Elko, NV in sagebrush, grass and juniper. Residences, power lines, and radio communication equipment are threatened. Steep rugged terrain and high winds are hampering containment efforts. Extreme fire behavior was observed with rapid rates of spread and spotting. Fire has jumped containment lines in numerous places.

GRASS SPRING, Humboldt-Toiyabe National Forest. The fire is three miles southeast of Austin, NV in grass, sagebrush, and pinyon/juniper. Residences, commercial property and cultural resources are threatened. Running and spotting fire behavior were observed.

NORTHWEST AREA INCIDENTS / LARGE FIRES:

DEER CREEK, Southwest District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Savage) is assigned. This fire started on private land eight miles north of Cave Junction, OR in grass, brush and timber. Residences and other structures remain threatened. Steep terrain, heavy fuels, and hot and windy weather are hampering containment efforts. Creeping and smoldering fire behavior were observed. Decrease in acreage is due to better mapping.

GRANITE COMPLEX, Wallowa-Whitman National Forest. A transfer of command from a Wildland Fire Use Team (Cones) to another Wildland Fire Use Team (Hall) will occur today. A Type 2 Incident Management Team (Morcom) will also assume command today. This lightning-caused Wildland Fire Use (WFU) incident is 30 miles east of Enterprise, OR in timber and grass. This complex is being managed to accomplish resource objectives. Structure protection remains in place for historic cabins in the area, and an area closure remains in effect. Torching with short uphill runs was observed prior to passage of a cold front. Fire behavior moderated with passage of the front.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

HURRICANE KATRINA SUPPORT, Federal Emergency Management Agency. Emergency Support Function #4 is staffed at the Regional Response Coordination Centers in Atlanta, GA and Denton, TX. Two Type 1 Incident Management Teams have been assigned. One team (Custer) will establish a base camp at Port Allen, LA and the other team (Quesinberry) will be at the logistics staging area in Meridian, MS. A third Type 1 Incident Management Team (Pincha-Tulley) will establish a base camp at Stennis NASA site in MS. A Planning Team has been activated to the Long Term Recovery Center in Orlando, FL. Three Logistics Management Teams have been mobilized to Meridian, MS, Maxwell Air Force Base, AL, and Beauregard, LA. Two more Logistics Management Teams will be mobilized to Meridian, MS and Barksdale Air Force Base, LA.

SHORT CREEK, Ouachita National Forest. This fire is 11 miles southeast of Mena, AR in timber. Fire behavior is moderate with less than 2 foot flame lengths reported. No further information was received.

OUTLOOK:

Fire Weather Watches: For southeast Wyoming and northern Colorado for winds, very dry relative humidity and fuels. For northeast Utah for strong winds and low relative humidity.

Red Flag Warnings: For low humidity and gusty winds for Mono and eastern Alpine Counties in California. In southern Idaho and western Utah for strong winds and low relative humidity. Red Flag Warning valid until 0600 Tuesday morning. Along and east of the entire Cascade-Sierra crest from Oregon to Lake Tahoe for strong gusty winds and low relative humidity. For the foothills surrounding the Sacramento Valley and in the north end of the valley tonight until Wednesday afternoon for strong gusty winds, low relative humidity, and poor overnight humidity recovery.

Weather Discussion: A surface cold front will move across the Rockies today with much cooler temperatures in the Northwest and Great Basin. Strong gusty winds will spread from the western portion of the Rockies into the Eastern Great Basin today. Also, dry and windy conditions will develop in the northern Sacramento Valley. Mainly wet thunderstorms will accompany the front in the Rockies. Showers will continue in Alaska with greatest precipitation across the southern portion of the state. Remnants of Hurricane Katrina will move across western Kentucky, near Cincinnati, and into northwestern Ohio today with very heavy rainfall and strong winds.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
NORTHERN ROCKIES Upper level trough will move across geographic region with partly to mostly cloudy skies and much cooler temperatures. Scattered showers and isolated thunderstorms possible over higher terrain.	West of divide: 60 to 70. East of divide: 65 to 75. North Dakota: 80 to 90.	West of divide: 35 to 45%. East of divide: 30 to 40%. North Dakota: 30 to 40%.	West of divide: West 10 to 15 mph. East of divide: West/northwest 15 to 25 mph with locally higher gusts possible. North Dakota: Southeast 5 to 10 mph.
Northern California Sunny.	Warmest inland areas mid 80s to mid 90s.	8 to 18% inland areas.	Northwest to northeast 7 to 17 mph with gusts 25 to 35 mph in the Sacramento Valley and surrounding foothills. Northwest to northeast 5 to 15 mph with gusts to 25 mph elsewhere.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern California Morning low clouds and fog southern California coastal basin, otherwise mostly sunny.	80 to 95 mountains. 85 to 95 valleys. 95 to 100 upper deserts. 105 to 112 lower deserts.	5 to 15% except 15 to 30% southern California.	Northeast 8 to 20 mph except southwest to northwest 10 to 20 mph southern California.
Eastern Great Basin Idaho, Bridger-Teton: Partly cloudy and cooler. Northern Utah: Mostly sunny and cooler. Isolated afternoon mountain thunderstorms. Southern Utah, Arizona Strip: Mostly sunny.	Idaho, Bridger-Teton: 50 to -60 mountains, 60 to 75 valleys. Northern Utah: 58 to 66 mountains, 66 to 79 valleys. Southern Utah, Arizona Strip: 67 to 80 mountains, 80 to 101 valleys.	Idaho, Bridger-Teton: 30 to 38% mountains, 14 to 30% valleys. Northern Utah: 21 to 25% Southern Utah, Arizona Strip: 16 to 27% mountains, 14 to 20% valleys.	Idaho, Bridger-Teton: West/northwest 10 to 15 mph, gusting to 35 mph southeast Idaho. Northern Utah: West/northwest 15 to 25 mph, gusting to 35 mph in the east. Southern Utah, AZ Strip: South 20 mph.
Rocky Mountain Mainly dry, with only isolated afternoon thunderstorms in northern Colorado, and a few showers over northwest Wyoming.	Upper 80s to low 90s lower elevations, with 70s in the mountains, except 70s over northern portions of the RMA, with 60s in the mountains.	RH below 15% is expected across lower elevations of southern Wyoming and Colorado, with values of 15% to 30% elsewhere across the region.	West 15 to 25 mph over southern Wyoming and Colorado, with northwest winds of 15 to 30 mph in northern and eastern Wyoming into western South Dakota.
Northwest East of Cascades: Partly to mostly sunny. West of Cascades: morning clouds north, becoming partly sunny. Partly to mostly sunny south. Chance of showers north.	East of Cascades: 75 to 85, warmest on the lowlands. West of Cascades: in the 70s, but 60s coastal areas.	East of Cascades: 20 to 35%, but 40 to 50% in mountains. West of Cascades: 30 to 45%, but 45 to 60% near the coast.	West to northwest 5 to 15 mph except 15 to 20 mph on Washington Cascades, east slopes Washington Cascades, and in the Columbia Gorge.
Western Great Basin Mostly sunny skies.	North valleys: 80 to 91. South valleys: 84 to 112. Mountains: 65 to 85.	North valleys: 9 to 16%. South valleys: 10 to 18%. Mountains: 12 to 26%.	Northwest to northeast 5- to 15 mph with afternoon gusts 20 to 25 mph.

http://www.nifc.gov/sixminutes/dsp_sixminutes.php

ENTRAPMENT AVOIDANCE (cont...)

Avoiding situations where firefighters become entrapped is the first concern when devising strategy and tactics. The following discussion points are among the things that should be considered.

- Discuss the three types of safety zones and describe examples.
 - The burn
 - Natural features
 - Constructed sites

- Discuss the guidelines for distance separation to avoid radiant heat injury.
 - Four times the maximum flame height (20 feet-flame height x 4 = 80 feet radius from firefighters)

- Discuss heat impact factors that will affect the guidelines for distance separation.
 - Convection heat from wind and terrain features
 - Location relative to fire spread
 - Reburn potential of fuel in safety zone

- Discuss that firefighters have a right to know the location of their escape routes and safety zones at all times.
- Discuss that firefighter have a right to ask for clarification when faced with unclear instructions or fear of the unknown.
- Describe a basic procedure for identification of effective escape routes and safety zones.
 - Observe
 - Visualize
 - Identify
 - Time
 - Inform
 - Evaluate
