

**INCIDENT MANAGEMENT SITUATION REPORT**  
**FRIDAY, DECEMBER 16, 2005 1000 MST**  
**NATIONAL PREPAREDNESS LEVEL 1**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 217 new fires reported for the week. Three new large fires were reported and contained in the Southern Area. Very high to extreme fire indices were reported in Nebraska and South Dakota.

Presidential Disaster Declarations have been issued for Hurricanes Katrina and Rita in Mississippi, Alabama, Louisiana, Texas and Florida.

A link to a map with resources mobilized for hurricane response is located at [http://gacc.nifc.gov/sacc/predictive/intelligence/Resource\\_Map.pdf](http://gacc.nifc.gov/sacc/predictive/intelligence/Resource_Map.pdf).

**SOUTHERN AREA INCIDENTS/LARGE FIRES:**

HURRICANE RITA SUPPORT, Federal Emergency Management Agency.

A Type 1 Incident Management Team (Martin) is assigned. The Team is operating under a unified command with the Cameron Parish Sheriffs Department, Louisiana State agencies and federal agencies. The Team will closeout on 12/17, and demobilize on 12/19.

A Type 2 Incident Management Team (Adams) is providing fire prevention and suppression support to local fire service agencies in Hammond, LA.

**OUTLOOK:**

**Weather Discussion:** The overall weather pattern through the weekend will feature a high pressure ridge in the West and a low pressure trough over the central and eastern portions of the country. On-shore flow will begin in southern California by Friday evening bringing temperature and humidity levels near normal by Saturday; warmer and drier conditions will begin Sunday and continue through early next week. Dry conditions will remain in eastern Oklahoma for Friday. A trend of cooler temperatures and scattered precipitation will limit the fire threat in eastern New Mexico, Oklahoma, and Texas over the weekend. Dry conditions with near critical relative humidity levels will develop Friday over mainly northern portions of Florida, then a return of scattered showers for the weekend.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southern California</b> Mostly sunny.	45 to 60 mountains. 64 to 72 valleys. 52 to 62 upper deserts. 65 to 75 lower deserts.	15 to 30%.	Variable 5 to 15 mph.

## LOOKOUTS

Lookouts are often better situated to notice the cumulative changes of fire behavior.

● Fire Order #8 says, "Establish lookouts in potentially hazardous situations." Should you utilize lookouts at all times?

- Lookouts should be posted at all times.

● What are you looking for when you are selecting a lookout location?

- Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
- Utilize aircraft if they are available, but only as a complement to established lookouts on the ground. Never rely exclusively on aircraft as your lookout.

● What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?

- Experienced firefighter.
- Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.
- Good communicator--keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.
- Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.

● What is the necessary equipment for a lookout?

- PPE, radio with extra batteries, compass, binoculars, belt weather kit, IAP, map, food, and water.
