

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JULY 7, 2005 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was moderate nationally with 170 fires reported. Two new large fires were reported in the Southwest Area. Five large fires were contained, three in the Western Great Basin and one each in the Southern California and Southern Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Nebraska, New Mexico, Nevada, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

SOUTHWEST AREA INCIDENTS / LARGE FIRES:

CAVE CREEK COMPLEX, Tonto National Forest. A transfer of command from Oltrogge's Type 1 Incident Management Team to Philbin's Type 2 Incident Management Team will occur today for the North Zone. This complex, comprised of the Lousy, Broad and Cave Creek fires, is six miles northeast of Carefree, AZ in chaparral. Large interior islands continue to burn out, and heat was found near much of the fire's edge.

ROUND ROCK 3, Navajo Regional Office, Bureau of Indian Affairs. This fire is six miles north of Round Rock, AZ in grass. No new information was reported. This will be the last report unless new information is received.

DRAGON COMPLEX, Grand Canyon National Park. A Fire Use Management Team (Clark) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Dragon, Spine, Basin and Marble fires is being managed to accomplish resource objectives. The complex is 10 miles north of Grand Canyon Village, AZ in pine, aspen and dead and down fuel. The W1C road has been closed to the public. Isolated torching and short crown runs were reported.

EAGLE EYE, Arizona State. This fire is 20 miles west of Buckeye, AZ in grass. The head of the fire ran parallel to power lines, with moderate backing fire reported elsewhere.

SAWMILL 02, Navajo Regional Office, Bureau of Indian Affairs. This fire is one mile east of Old Sawmill, AZ in timber, sagebrush and grass. Isolated torching and spot fires were reported on the east flank of the fire.

MUDERSBACH, Kaibab National Forest. This previously reported lightning-caused Wildland Fire Use (WFU) incident, which began on 6/23, is being managed to accomplish resource objectives. The fire is burning 13 miles southwest of Tusayan, AZ in ponderosa pine, pinyon and juniper. Backing fire activity with some torching along the south flank was observed. This incident is being jointly managed with the North-Skinner incident. This will be the last narrative unless new information is received.

NORTH-SKINNER, Kaibab National Forest. This previously reported lightning-caused Wildland Fire Use (WFU) incident, which began on 6/27, is being managed to accomplish resource objectives. The fire is burning 10 miles southeast of Tusayan, AZ in hardwood litter and grass. A historic railroad logging camp is threatened. Spotting was observed on the northeast flank, and the fire was backing toward the southwest. Resources are being shared with the Mudersbach incident. This will be the last narrative unless new information is received.

WESTERN GREAT BASIN INCIDENTS / LARGE FIRES:

DELAMAR, Ely Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Whalen) is assigned. This fire is 10 miles east of Alamo, NV in grass, pinyon and juniper. Grazing allotments, cultural resources and wildlife habitat are threatened. Extreme fire behavior was reported, with major runs to the northeast.

SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

YORBA LINDA, Orange County Fire Department. This fire is one mile north of Yorba Linda, CA in brush and tall grass. A Unified Command has been established between California Department of

Forestry Type 1 Incident Command Team (Winton), Orange County Fire Authority and Chino Valley Independent Fire District. The communities of Sleepy Hollow and Los Serranos, structures, power transmission lines, a high pressure gas line, threatened and endangered species habitat and archeological sites are threatened. Access is difficult due to rain-damaged roads. Interior islands continue to burn out, contributing to short range spotting.

BARTON, San Bernardino National Forest. This fire is five miles east of Angelus Oaks in beetle killed timber. A Type 2 Incident Management Team (Kerr) is assigned. Watershed, threatened and endangered species habitat, historic properties, archeological sites, organizational camps and special use cabins are threatened. Precautionary evacuation orders will be lifted today. A few spot fires were reported, otherwise good progress was made. Reduction in acreage is due to more accurate mapping.

LAC = Los Angeles County Fire Department

NORTHWEST AREA INCIDENTS / LARGE FIRES:

SECOND HUD, Colville Agency, Bureau of Indian Affairs. A Washington Interagency Incident Management Team (Berndt/Lafavre) is assigned. This fire is six miles north of Omak, WA in grass, brush and scattered timber. Timber, wildlife habitat, and a watershed are threatened. Steep, rocky terrain is limiting access. The fire was relatively quiet, with only one portion reporting active burning in fuel pockets.

WEATHER STATION, Saddle Mountain National Wildlife Refuge, Fish and Wildlife Service. This fire is eight miles southeast of Mattawa, WA in grass and sagebrush. Smoldering with occasional flare-ups in heavier fuels was observed.

PEARRYGIN LAKE, Northeast Region, Washington State. A Washington Interagency Incident Management Team (Jennings/Perry) is assigned. This fire is eight miles north of Winthrop, WA in timber. Snags near the fire s perimeter are a concern.

ALASKA AREA INCIDENTS / LARGE FIRES:

KING COUNTY CREEK, Kenai-Kodiak Area Forestry, State of Alaska. A Type 2 Incident Management Team (Doty) is assigned. This fire started on Fish and Wildlife Service land 13

miles southeast of Sterling, AK in black spruce, mixed hardwoods and dead and down beetle killed spruce. Residences and cabins to the west of the fire and private inholdings to the east remain threatened. Heavy rain, wind and hail made it necessary to remove all personnel from the fireline. Torching, creeping, and isolated smokes were reported.

MISSION CREEK, Alaska Fire Service, Tanana Zone. This fire started on Alaska Native Claims Settlement Act land five miles northeast of Tanana, AK in black spruce and hardwoods. The community of Tanana, native allotments and cabins remain threatened. Fire activity was minimal.

CHAPMAN CREEK, Alaska Fire Service, Northern Field Office. This fire is eight miles south of Coldfoot, AK in black spruce and tundra. The community of Coldfoot remains threatened. Smoldering within the interior was reported.

SHEENJEK RIVER, Alaska Fire Service, Upper Yukon Zone. This fire started on Fish and Wildlife Service land six miles northeast of Ft. Yukon, AK in birch, aspen, black and white spruce. Cabins and allotments remain threatened. Crowning along the north perimeter and flare-ups within the interior were reported.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

THREE POINTS, Texas Forest Service. This fire started on private land 20 miles northwest of Ft. Davis, TX in pinyon, juniper and grass. The University of Texas McDonald Observatory remains threatened. The Texas Army National Guard is supporting suppression operations. Extreme fire behavior was reported. Helicopters and crews are working to contain a slopover on the east flank.

CHINATI, Texas Forest Service. This fire started on private land 35 miles southwest of Marfa, TX in grass and juniper. The fire is inaccessible from the ground and aerial resources will be utilized for suppression. No further information was received.

OUTLOOK:

Weather Discussion: High pressure covers much of the West. A weak trough over Nevada will continue the threat of isolated dry thunderstorms over the Great Basin. Low pressure over Alaska will bring scattered showers to much of the interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southwest Mostly sunny, hot, very dry and breezy Arizona and western half of New Mexico. Partly cloudy with isolated to scattered thunderstorms far eastern New Mexico and west Texas.	Mountains: 70 to 90. Lower elevations: 90 to 111.	2 to 15%. Eastern New Mexico and west Texas 15 to 35%.	West to southwest 10 to 20 mph with gusts to 25 mph in Arizona and western New Mexico. South to southeast 10 to 20 mph eastern New Mexico and west Texas.
Western Great Basin Sunny with isolated dry afternoon thunderstorms across parts of northeastern Nevada.	North Valleys: 84 to 102. South Valleys: 95 to 114. Mountains: 76 to 95.	North Valleys: 6 to 18%. South Valleys: 3 to 10%. Mountains: 10 to 25%.	South to west 5 to 15 mph with afternoon gusts to 25 mph along the Sierra Front.
Southern California Morning low clouds and fog coastal areas. Otherwise sunny.	Mountains: 80 to 95. Valleys: 90 to 102. Upper deserts: 95 to 105. Lower deserts: 110 to 118.	5 to 15%.	Southwest to northwest 5 to 15 mph.

Northwest Partly cloudy west of Cascades and mostly sunny east of the Cascades.	Mild 70 s and 80 s. Western Washington and northwest Oregon: 60 s and 70 s.	West of Cascades: North: above 50%. South: 30% to 50%. Eastside: Mostly 15 to 25%.	Generally west 5 to 15 mph except locally to 20 mph in parts of eastern Washington.
Alaska Partly to mostly cloudy with scattered showers and isolated thunderstorms, mainly in the afternoon and evening.	Upper 50 s to the mid 70 s.	Most locations: 35% or higher.	Variable 5 to 15 mph, mostly southwest to northwest.
Rocky Mountain Isolated to widely scattered afternoon thunderstorms in the eastern portions, with isolated dry lightning in the west.	Mid 80 s to mid 90 s. Mountains: 70 s to lower 80 s.	West: 5 to 15%. Elsewhere: 25 to 35%.	Southerly 10 to 20 mph in the eastern plains and variable 8 to 18 mph in the west.
Eastern Great Basin Partly cloudy with isolated late day thunderstorms, mainly northern Utah and southeast Idaho mountains.	Idaho, Bridger-Teton: Mountains: 70 to 84. Valleys: 82 to 94. Northern Utah: Mountains: 78 to 90. Valleys: 90 to 101. Southern Utah, Arizona Strip: Mountains: 75 to 96. Valleys: 98 to 105.	Idaho, Bridger-Teton: Mountains: 20 to 30%. Valleys: 10 to 20%. Northern Utah: 7 to 21%. Southern Utah, Arizona Strip: 7 to 14%.	Idaho, Bridger-Teton: West 8 to 12 mph. Northern Utah: Upslope/upvalley 5 to 10 mph. Southern Utah, Arizona Strip: Upslope/upvalley 5 to 10 mph.
Northern California Areas of coastal fog and low clouds, partially burning off by midday. Fair and warm inland, with some p.m. cumulus over the Sierra-Cascade crest.	Coastal areas: 60 s to low 80 s. Inland: mid 80 s to near 101.	Interior: 10 to 25%. Coastal areas: 40% or more.	Southwest to northwest 5 to 15 mph with gusts to 25 mph coastal areas, higher through coastal passes and straits. Southeast to southwest 5 to 10 mph with gusts to 20 mph in the interior.

NFDRS POCKET CARDS

An aid to identifying local fuels conditions that might contribute to severe fire behavior is the NFDRS Pocket Card. The Pocket Card displays a general assessment of the fire potential compared to local fire occurrence and historical fire danger. It is a tool that can be used to track daily outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season for a local area.

● The Pocket Card provides:

- A general indicator of the potential for extreme fire behavior and difficulty of control.
- A graph to show the trend and status of the current year's fire season.
- A comparison of current year's conditions to historical worst and average conditions.
- Fire danger values related to past large fires.
- Locally significant values for temperature, humidity, wind speed, and more.

● Discuss the following ways to use the Pocket Card:

- Use it primarily before fires occur, before arriving to a fire, and during initial stages of fire events, such as initial fire size-up, initial attack, and extended attack.
- Use the Pocket Card to track local fire danger and in so doing increase the safety of your firefighters through increased awareness of fire danger conditions. NOTE: If fire danger is running at or above seasonal highs, be alert to those weather conditions that can lead to extreme fire behavior; e.g., low RH, 1-hour fuel moisture less than 5%, high temperatures, moderate to high winds.
- Use it to track daily fire dangers so that there are no surprises when extreme fire behavior occurs.
- Use it to supplement local experience.
- Use the Pocket Card as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive your fire assignment outside your local area, visit the National Pocket Card website at <http://famweb.nwccg.gov/pocketcards/>. Click on the map and locate a Pocket Card for the area to which you are going.
- Put the Card in the Pocket of all your firefighters and keep a copy in your fire vehicle.
- Post the card in dispatch. Use them in briefings. Provide them to incoming crews.
- Do not use the PocketCard for site specific fire behavior predictions and fireline actions.
