

**INCIDENT MANAGEMENT SITUATION REPORT**  
**THURSDAY, JULY 14, 2005 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 132 fires reported. Four new large fires were reported, one each in the Southwest, Southern California, Northern Rockies, and Alaska Areas. One large fire was contained in the Southern Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Michigan, Montana, Nebraska, New Mexico, Nevada, South Dakota, Texas, Utah, Washington and Wyoming.

**SOUTHWEST AREA INCIDENTS / LARGE FIRES:**

FLORIDA, Coronado National Forest. A Type 2 Incident Management Team (Raley) is assigned. A Type 1 Incident Management Team (Oltrogge) has been ordered. This fire is 11 miles southeast of Green Valley, AZ in brush, timber litter and understory. Evacuations are in effect for Madera Canyon. Structure protection is in place for the community of Madera Canyon, the Mt. Hopkins Observatory and the Florida Work Center. Spotted Owl, migratory bird habitat and the Mt. Wrightson Wilderness area remain threatened. The fire was less active due to higher relative humidity and cloud cover. The fire continued movement to the south.

DRAGON COMPLEX, Grand Canyon National Park. A Fire Use Management Team (Cones) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Dragon, Spine, Basin and Marble fires is being managed to accomplish resource objectives. The complex is 10 miles north of Grand Canyon Village, AZ in mixed conifer, ponderosa pine, aspen and dead and down fuel. Cloud cover contributed to decreased fire activity. Surface spread and torching in mixed conifer were reported.

NORTH GILA COMPLEX, Gila National Forest. A Fire Use Management Team (Hall) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Fork and Johnson fires, is being managed to accomplish resource objectives. The complex is 13 miles southeast of Reserve, NM in mixed conifer, grass and timber understory. Creeping and smoldering was observed on the Fork fire. The Johnson fire reported ground fire with isolated torching. Crews continue to monitor fire behavior and effects.

WAHOO, Gila National Forest. This fire is 21 miles northwest of Winston, NM in timber, brush, hardwood slash and litter. Creeping, flanking, backing and occasional torching were observed. The fire burned actively in heavy fuels on the north portion of the fire. The fire is in confinement status and will continue to be monitored.

CRATER, Phoenix Field Office, Bureau of Land Management. This fire is 18 miles northwest of Ajo, AZ in brush and grass. Access is limited on a military bombing range. Aerial resources are continuing to be utilized for suppression action. The fire perimeter was inactive with little visible smoke. The incident is coordinating efforts with the military.

ROMINE, Chama District, New Mexico State Forestry. This fire is 22 miles east of Farmington, NM in pinyon, juniper, sagebrush and grass. Several natural gas wells remain threatened. Fire activity was minimal. Crews are mopping up isolated smokes within the perimeter.

OSHA PARK, Carson National Forest. This fire is 10 miles east of Taos, NM in timber litter and understory. No further information was received.

MUDERSBACH, Kaibab National Forest. This lightning-caused Wildland Fire Use (WFU) incident, which began on 6/23, is being managed to accomplish resource objectives. The fire is 13 miles southeast of Tusayan, AZ in ponderosa pine, pinyon and juniper. The fire grew substantially due to high temperatures, low relative humidity and north winds that pushed the fire into unburned fuel. Crews used burnout operations to contain spotting across Forest Road 320.

NORTH-SKINNER, Kaibab National Forest. This lightning-caused Wildland Fire Use (WFU) incident, which began on 6/27, is being managed to accomplish resource objectives. The fire is 10 miles southeast of Tusayan, AZ in ponderosa pine litter and grass. Backing fire and torching were reported on the Skinner fire. This fire is being managed in conjunction with the Mudersbach WFU.

### ROCKY MOUNTAIN AREA INCIDENTS / LARGE FIRES:

MASON, Pike San Isabel National Forest and Grasslands. A Type 1 Incident Management Team (Krugman) is assigned. This fire is two miles south of Wetmore, CO in timber, heavy brush and hardwood litter. The communities of Beulah, Bears Head Ranch, the Siloam Road subdivision, and Billingsly Ranch remain threatened. Structure protection remains in place. Poor vehicle access, steep, broken terrain and drought stressed fuels continue to hamper containment efforts. Isolated torching, creeping and backing were observed. Crews continue to make significant progress on direct line construction.

RICCO, Black Hills National Forest. A Type 1 Incident Management Team (Martin) is assigned. This fire is two miles south of Piedmont, SD in ponderosa pine, logging slash and hardwood litter. The South Stagebarn Canyon Botanical Area and archeological sites remain threatened. Interior islands continue to burn out. Creeping and backing were also reported. Crews are reinforcing containment lines on all divisions.

PACK TRAIL, White River Field Office, Bureau of Land Management. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 10 miles west of Meeker, CO in timber litter, brush and hardwood slash. Creeping surface fire with single tree and isolated group torching were reported.

### **SOUTHERN AREA INCIDENTS / LARGE FIRES:**

HURRICANE DENNIS RESPONSE, Federal Emergency Management Agency (FEMA). A Type 1 Incident Management Team (Custer) and a Florida State All-Risk Incident Management Team (Koehler) are in place at Duke Field, Eglin Air Force Base, FL. Demobilization of the Type 1 Incident Management Team (Quesinberry) occurred yesterday. A Florida State All-Risk Incident Management Team (Hill) is in place at Saufley Field, Pensacola Naval Air Station, FL. A Type 1 Incident Management Team (Feser) is in place at Maxwell Air Force Base, AL. The Teams are establishing and managing receiving and distribution centers and Logistical Staging Areas, and are working in cooperation with the National Guard, Florida Division of Forestry, the Florida State Emergency Response Team, Alabama Department of Transportation and Emergency Management Agency, Army Corps of Engineers, American Red Cross, and the military.

### **NORTHWEST AREA INCIDENTS / LARGE FIRES:**

WEST OMAK LAKE, Colville Agency, Bureau of Indian Affairs. A Washington State Interagency Incident Management Team (Reed/Holloway) is assigned. This fire is 10 miles southeast of Omak, WA in timber grass and understory. Ranches and farms are threatened. One residence was evacuated and three additional residences were warned of potential evacuation. Strong, gusty winds contributed to major runs and spotting on the south and southwest portions of the fire. The fire was active on all flanks.

WEST OMAK LAKE	WA	COA	8,000	10	UNK	227	7	17	4	0	NR	BIA

### **SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:**

SAN CLEMENTE, Los Angeles County Fire Department. This fire is one mile northeast of Rancho Palos Verdes, CA in chaparral. Several residences are threatened. Structure protection is in place. Numerous road closures and evacuations are in effect. Frequent spotting, runs toward structures and intense burning were reported.

SAN CLEMENTE	CA	LAC	100	0	7/14	404	13	51	5	0	NR	PRI

### **NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:**

BRANDON COULEE, Charles M. Russell National Wildlife Refuge, Fish and Wildlife Service. This fire is 55 miles south of Malta, MT in sage and grass. Fire activity was moderate with some isolated torching and a major run in the morning hours.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
BRANDON COULEE	MT	CMR	1,230	60	7/15	43	2	1	0	0	NR	FWS

### **EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:**

DITTO, Salt Lake Field Office, Bureau of Land Management. This fire is nine miles south of Dugway, UT in sagebrush and cheatgrass. Access is restricted in the Dugway Proving Ground due to a bombing impact zone. Dozer line was constructed to contain the fire within the proving ground boundary. BLM resources will monitor the perimeter.

### **ALASKA AREA INCIDENTS / LARGE FIRES:**

BOUNDARY CREEK, Upper Yukon Zone, Alaska Division of Forestry. This fire started on Alaska Native Claims Settlement Act land six miles southeast of Eagle, AK in black spruce, hardwood litter and understory. Cabins and outbuildings are threatened. The fire made significant runs with crowning and torching. Backing fire activity was also observed.

FOX CREEK, Kenai-Kodiak Area Forestry, Alaska Division of Forestry. A Fire Use Management Team (Kurth) is assigned. The Team is also managing the Irish Channel incident. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is 35 miles southeast of Soldotna, AK in beetle-killed spruce, hardwoods, timber litter and understory. Fire activity included passive crowning, torching and spotting.

IRISH CHANNEL, Kenai-Kodiak Area Forestry, Alaska Division of Forestry. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire started on Fish and Wildlife Service land 20 miles southeast of Sterling, AK in hemlock, spruce, hardwoods, and deep timber litter. Fire monitors reported backing fire activity.

### OUTLOOK:

**Red Flag Warning:** For northeast Wyoming and the Black Hills for high winds, low relative humidity and high temperatures.

**Weather Discussion:** High pressure centered over the Great Basin is bringing very hot weather to much of the West along with increasing moisture in the Southwest and Great Basin. Weak high pressure will be building over Alaska.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Rocky Mountain</b> Dry except for isolated dry thunderstorms over Colorado and the Black Hills of South Dakota.	Mostly in the 90 s. Northeast Wyoming: mid 80 s. Mountains: upper 70 s and 80 s.	Western Colorado: 5 to 10%. Wyoming and southeast Colorado: 10 to 20%.	Northeast Wyoming and the Black Hills: northwest 15 to 30 mph. Elsewhere: Variable 5 to 15 mph.
<b>Southwest</b> Mostly sunny and hot in western Arizona. Partly cloudy elsewhere with a scattered mix of dry and wet thunderstorms across eastern Arizona and western New Mexico. Isolated wet storms in west Texas.	Mountains: 70 to 90. Lower elevations: 90 to 115.	Northern and western Arizona: 5 to 15%. Remainder of Arizona, New Mexico and west Texas: 15 to 30%.	Arizona and western New Mexico: west to southwest 5 to 15 mph with gusts to 25 mph. Eastern New Mexico and west Texas: south to southeast 10 to 20 mph

<b>Geographic Area Weather</b>	<b>High Temperatures</b>	<b>Minimum Relative Humidity</b>	<b>Wind</b>
<b>Eastern Great Basin</b> Mostly sunny and hot. Isolated afternoon mountain thunderstorms in Utah.	Idaho and Bridger-Teton: Mountains: 68 to 80. Valleys: 85 to 97. Northern Utah: Mountains: 74 to 91. Valleys: 90 to 103. Southern Utah and Arizona Strip: Mountains: 80 to 96. Valleys: 94 to 110. Deep southwest Utah and Arizona Strip: 112 to 118.	Idaho and Bridger-Teton: Mountains: 14 to 30%. Valleys: 11 to 20%. Northern Utah: Mountains: 15 to 25%. Valleys: 10 to 22%. Southern Utah and Arizona Strip: Mountains: 13 to 19%. Valleys: 8 to 14%.	Idaho and Bridger-Teton: West to northwest 10 mph. Northern Utah: Light and variable. Southern Utah and the Arizona Strip: Upslope/upvalley 5 to 10 mph.
<b>Western Great Basin</b> Sunny and hot with a slight chance for an isolated dry thunderstorm over the mountains.	North valleys: 93 to 108. South valleys: 98 to 118. Mountains: 80 to 97.	North valleys: 4 to 16%. South valleys: 3 to 8%. Mountains: 8 to 22%.	Generally upslope / upvalley 5 to 15 mph with southwesterly afternoon gusts to the low 20 s.
<b>Northern Rockies</b> Mostly sunny. Scattered showers and isolated thunderstorms in northeast Montana and northern North Dakota.	West of Continental Divide: low 80 s. East of Continental Divide: upper 80 s. North Dakota: upper 80 s to low 90 s. Mountains: 70 s.	West of Continental Divide: 22 to 26%. East of Continental Divide: 25 to 35%. North Dakota: 35 to 40%.	West of Continental Divide: Slope and valley winds 5 to 10 mph. East of Continental Divide: West to north 10 to 20 mph. Elsewhere: North 15 to 25 mph.
<b>Southern California</b> Areas of morning low clouds and fog in the coastal areas, otherwise partly cloudy with isolated showers and thunderstorms.	Mountains: 85 to 100. Valleys: 95 to 105. Upper deserts: 100 to 110. Lower deserts: 115 to 125.	10 to 20%.	Southeast to southwest 5 to 15 mph.
<b>Northern California</b> Fog along the coast. Partly cloudy with a 20% chance of afternoon thunderstorms over the higher terrain of the Northern Sierra Nevada, the east side and the northwestern mountains. Sunny elsewhere.	Coast: 65 to 80. Inland: 87 to 107.	East of the Cascade and Sierra Nevada crest: 8 to 18. Remainder of inland areas: 12 to 25%. Coast: 40%-plus. Poor to fair overnight relative humidity recovery inland from mid slope to above.	Northwest to northeast 3 to 10 mph in a.m. hours, with local Sacramento Valley gusts 15 to 25 mph. Afternoon sea breezes to 12 mph near the coast. Light slope type winds elsewhere.

## **TRANSFER OF COMMAND**

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for fatalities, serious injuries, or incidents with potential during transfer of command periods (some have occurred in the past). Be proactive in mitigating the risks by proper implementation of LCES—Lookout, Communications, Escape Routes, and Safety Zones.

● Factors for increased risks to fireline personnel during transition periods include:

- No, or poor, briefing of incoming personnel
- Lack of fire weather and behavior information, both forecast and observed
- Communications; face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- Initial attack resources may not have checked-in and the Incident Commander may not be aware of the number, type and location of all resources.
- Location of safety zones and escape routes may not be known and communicated to all resources.

● Mitigation actions to take:

- Lookouts: Post and maintain your own lookouts.
- Communications: Maintain existing communications with your own and adjacent resources, as well as your original supervisor, while you are developing communications with incoming adjacent resources and your new supervisor.
- Escape routes and safety zones: Identify escape routes and assure incoming resources are aware of their locations; be aware that your original escape routes and safety zones may no longer be accessible due to changing fire behavior or your increased distance from them.
