

**INCIDENT MANAGEMENT SITUATION REPORT**  
**SATURDAY, JULY 16, 2005 0800 MDT**  
**NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 205 fires reported. Seven new large fires were reported, four in the Western Great Basin Area, one each in the Southwest, Rocky Mountain and Eastern Great Basin Areas. Three large fires were contained, one each in the Southern, Rocky Mountain and Northwest Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Michigan, Montana, Nebraska, New Mexico, Nevada, South Dakota, Texas, Utah and Wyoming.

**SOUTHWEST AREA INCIDENTS / LARGE FIRES:**

FLORIDA, Coronado National Forest. A Type 1 Incident Management Team (Oltrogge) is assigned. This fire is 11 miles southeast of Green Valley, AZ in brush, timber litter and understory. Evacuations are in effect for Madera Canyon. Structure protection is in place for the community of Madera Canyon, the Mt. Hopkins Observatory and the Florida Work Center. Spotted Owl, migratory bird habitat and the Mt. Wrightson Wilderness area remain threatened. The fire was active with short crown runs contributing to rapid rates of spread.

DRAGON COMPLEX, Grand Canyon National Park. A Fire Use Management Team (Cones) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Dragon, Spine, Basin and Marble fires is being managed to accomplish resource objectives. This complex is 10 miles north of Grand Canyon Village, AZ in mixed conifer, ponderosa pine, aspen and dead and down fuel. Increased activity on the east flank was reported.

NORTH GILA COMPLEX, Gila National Forest. A transfer of command from a Fire Use Management Team (Hall) back to the local unit will occur today. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Fork and Johnson fires, is being managed to accomplish resource objectives. This complex is 13 miles southeast of Reserve, NM in mixed conifer, grass and timber understory. Creeping and smoldering were observed on both fires.

WAHOO, Gila National Forest. This fire is 21 miles northwest of Winston, NM in timber, brush, hardwood slash and litter. Higher humidity and light precipitation minimized fire behavior. Fire is actively burning on the northeast side, mainly in heavier fuels.

CRATER, Phoenix Field Office, Bureau of Land Management. This fire is 18 miles northwest of Ajo, AZ in brush and grass. Access is limited on a military bombing range. This incident is coordinating suppression efforts with the military. No new information was reported. This will be the last report unless new information is received.

BRUSH, Gila National Forest. This fire is 25 miles northwest of Silver City, NM in hardwood litter and brush. Significant progress was made in line construction.

MESQUITE, Tonto National Forest. This fire is 14 miles northeast of Fountain Hills, AZ in chaparral. Aerial resources were used for suppression due to inaccessible terrain and strong winds.

### ROCKY MOUNTAIN AREA INCIDENTS / LARGE FIRES:

MASON, Pike San Isabel National Forest and Grasslands. A Type 1 Incident Management Team (Krugman) is assigned. This fire is two miles south of Wetmore, CO in timber, heavy brush and hardwood litter. Structure protection remains in place. Good progress was made in all divisions. Isolated torching, creeping and backing were observed.

RICCO, Black Hills National Forest. A transfer of command from a Type 1 Incident Management Team (Martin) back to the local unit will occur today. This fire is two miles south of Piedmont, SD in ponderosa pine, logging slash and hardwood litter. Interior islands continue to burn out. Crews continue with mopup and rehabilitation.

TRAIL EAST, San Juan Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Blume) has been ordered. This fire is nine miles southwest of Hesperus, CO in pinyon and juniper. No further information was received.

PACK TRAIL, White River Field Office, Bureau of Land Management. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire is 10 miles west of Meeker, CO in timber litter, brush and hardwood slash. Creeping with isolated torching was reported.

## WESTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

ABOUT TIME, Ely Field Office, Bureau of Land Management. This fire is six miles west of Lund, NV in pinyon, juniper, grass and sage. The fire was running with rapid rates of spread.

WILSON RESERVOIR, Nevada Division of Forestry, Northern Region. This fire is one mile north of Wilson Reservoir, NV in cheatgrass and sagebrush. Structure protection is in place. Wind-driven runs and spotting were reported.

CONTACT, Elko Field Office, Bureau of Land Management. This fire is 20 miles south of Jackpot, NV in cheatgrass and sagebrush. The fire reported rapid spread and spotting.

GOLD QUARRY MINE, Nevada Division of Forestry, Northern Region. This fire is 10 miles north of Carlin, NV in grass, sage, pinyon and juniper. Rough terrain makes this fire inaccessible to engines. No further information was received.

## EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

WEST GILSON, Richfield Field Office, Bureau of Land Management. This fire is 21 miles southwest of Nephi, UT in cheatgrass. The fire experienced major runs due to thunderstorm cells, low humidity and high temperatures.

SMITH MESA #3, Southwest State, Division of Forestry, Fire and State Lands. This fire is 6 miles north of Virgin, UT in grass. Structures are threatened. Active fire behavior with running and spotting was reported.

## ALASKA AREA INCIDENTS / LARGE FIRES:

BOUNDARY CREEK, Upper Yukon Zone, Alaska Division of Forestry. This fire started on Alaska Native Claims Settlement Act land six miles southeast of Eagle, AK in black spruce, hardwood litter and understory. Cabins and outbuildings are threatened. The fire spread to the west and south. Smoldering, creeping, torching, running and spotting were observed.

FOX CREEK, Kenai-Kodiak Area Forestry, Alaska Division of Forestry. A Fire Use Management Team (Kurth) is assigned. The Team is also managing the Irish Channel incident. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire is 35 miles southeast of Soldotna, AK in beetle-killed spruce, hardwoods, timber litter and understory. Isolated torching, backing and flanking were reported.

IRISH CHANNEL, Kenai-Kodiak Area Forestry, Alaska Division of Forestry. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire started on Fish and Wildlife Service land 20 miles southeast of Sterling, AK in hemlock, spruce, hardwoods, and deep timber litter. Isolated torching, flare-ups and backing on the west side were observed.

## **SOUTHERN AREA INCIDENTS / LARGE FIRES:**

HURRICANE DENNIS RESPONSE, Federal Emergency Management Agency (FEMA). A Unified Command between a Type 1 Incident Management Team (Custer) and a Florida State All-Risk Incident Management Team (Koehler) is in place at Duke Field, Eglin Air Force Base, FL. A Florida State All-Risk Incident Management Team (Hill) is in place at Saufley Field, Pensacola Naval Air Station, FL. A Type 1 Incident Management Team (Feser) is in place at Maxwell Air Force Base, AL. The Teams are managing receiving and distribution centers, points of distribution and Logistical Staging Areas. The teams are working in cooperation with the National Guard, Florida Division of Forestry, the Florida State Emergency Response Team, Alabama Department of Transportation and Emergency Management Agency, Army Corps of Engineers, American Red Cross, and the military. A National Park Service All-Risk Incident Management Team (Panko) is managing the rehabilitation and recovery work at Gulf Islands National Seashore, FL.

## OUTLOOK:

**Red Flag Warnings:** High winds for the Tanana Flats in Alaska. Gusty winds and low relative humidity in northern Nevada, southwest Idaho and much of southeast Montana.

**Fire Weather Watches:** For gusty winds and low relative humidity in western and central Nevada, southeast Idaho, Utah's west deserts, northeast California and extreme northwest Nevada.

**Weather Discussion:** High pressure will continue over the Great Basin and Southwest, while a cold front tracks across the Pacific Northwest and into the Northern Rockies. A low pressure system moving into western Alaska will begin spreading moisture into the interior of the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southwest</b> Partly to mostly sunny. A widely scattered mix of dry and wet thunderstorms across Arizona and western New Mexico. Isolated wet storms in eastern New Mexico and west Texas.	Mountains: 70 to 90. Lower elevations: 90 to 115.	Arizona and western New Mexico: 5 to 20%. Eastern New Mexico and west Texas: 20 to 35%.	Arizona and western New Mexico: West to northwest 5 to 15 mph with gusts to 25 mph. Eastern New Mexico and west Texas: south to southeast 10 to 20 mph.
<b>Eastern Great Basin</b> Idaho: Isolated afternoon mountain showers and thunderstorms. Utah: Isolated afternoon valley thunderstorms and scattered mountain thunderstorms.	Idaho-Bridger-Teton: Mountains: 67 to 80. Valleys: 87 to 99. Northern Utah: Mountains: 79 to 95. Valleys: 91 to 101. Southern Utah and Arizona Strip: Mountains: 83 to 95. Valleys: 94 to 110. Deep southwest Utah and Arizona Strip: 110 to 115.	Idaho, Bridger-Teton: Mountains: 15 to 30%. Valleys: 12 to 19%. Northern Utah: Mountains: 20 to 31%. Valleys: 10 to 20%. Southern Utah and Arizona Strip: Mountains: 12 to 16%. Valleys: 7 to 13%.	Idaho, Bridger-Teton: West to northwest 15 to 20 gusting to 30 to 40 mph. Northern Utah: South to southwest 15 mph. Northwestern Utah: west winds gusting to 30 mph. Upslope/upvalley: 4 to 8 mph. Southern Utah, Arizona Strip: Southwest 20 mph, gusting in the west to 30 mph.

<b>Western Great Basin</b> Mostly sunny and hot, slight chance of isolated	North Valleys: 93 to 107.	North Valleys: 5 to 16%. South Valleys: 5 to	Northern 1/3 of state: westerly 10 to 20 mph
---	---------------------------	--	--

thunderstorms near the Sierras.	South Valleys: 98 to 118. Mountains: 80 to 97.	10%. Mountains: 8 to 22%.	with occasional gusts to 30 mph. Southern 2/3 of state: southwest to northwest 3 to 8 mph with afternoon gusts near 20 mph.
<b>Northern Rockies</b> Partly cloudy with strong gusty winds and scattered dry becoming wet thunderstorms.	West of Divide: 75 to 85. Central Montana: 82 to 92. Eastern Montana Plains: 92 to 108. North Dakota: 94 to 101 Mountains: 70s.	West of Divide: 15 to 30%. East of Divide: 20 to 32%. North Dakota 28 to 43%.	West of Divide: W 10 to 20 mph. East of Divide: S-W 15 to 30 mph. with higher gusts North Dakota: S 15 to 30 mph with higher gusts.
<b>Southern California</b> Areas of morning low clouds and fog along the coast, otherwise partly cloudy over the eastern deserts with a slight chance of a thunderstorm. Mostly sunny elsewhere.	85 to 100 mountains. 95 to 105 valleys. 95 to 105 upper deserts. 110 to 120 lower deserts.	8 to 18% inland and 25 to 45% coast.	Southeast to southwest 5 to 15 mph.
<b>Northern California</b> Continued sunny and hot.	Mostly 90s to 105.	8-25% with areas of poor nighttime recovery upper slopes and ridges.	Afternoon wind westerly 5-12 mph, locally 6-18 mph and gusty east of the Sierra Cascade crest.
<b>Alaska</b> Partly to mostly cloudy with a chance of showers or isolated thunderstorms.	70s to low 80s.	Generally 35% or higher except 20% to 30% in the eastern interior.	East to southeast 5-15 mph. Winds south 20 gusting to 30 mph through Alaska Range passes and on the Tanana Flats.

### INITIAL ATTACK FIRE SIZEUP/SAFETY

Having a good sizeup is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting.

- Use the following reporting factors for sizeup. Discuss others that may be used.
  - Fire name and location
  - Terrain (slope, aspect, elevation) and position of fire on the slope
  - Size of fire
  - Fuel type, anticipated control problems, and spread potential
  - Values threatened
  - Weather conditions (wind speed and direction)
  - Fire behavior
  - Resources on the fire and those needed
  - Estimated containment and control times
  - Cause (known, suspected, under investigation)
  
- After your initial sizeup of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.
  - Have you sized up the fire and relayed the information to dispatch?
  - Is the observed fire weather consistent with the forecast?
  - Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?
  - Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?
  - Are lookouts in place or can you see all of the fire area?
  - Can you communicate with everyone on the fire and with dispatch?
  - Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
  - Are safety and the standard fire orders being followed?
  - Do you have a complete list of what resources have been ordered for the fire?
  - Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?
