

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, JUNE 10, 2005 0530 MDT
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 70 new fires reported. Very high to extreme fire indices were reported in Alaska, Arizona, Colorado, Kansas, New Mexico, Oregon, and Washington.

SOUTHWEST AREA INCIDENTS / LARGE FIRES:

BOBBY, Arizona State. This fire started on state land ten miles south of Wickenburg, AZ in grass and shrub. Whispering Ranch community and local commercial property are threatened. Minimal fire behavior was observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
BOBBY	AZ	AZS	4,800	70	6/10	92	4	2	1	0	100K	ST
CONTINENTAL-WFU	NM	GNF	1,200	N/A	N/A	25	1	1	0	0	5K	FS

GNF = Gila National Forest

OUTLOOK:

Weather Discussion: A low pressure system will near the coasts of Washington and Oregon, providing a chance for showers and thunderstorms in the Northwest Area along with Idaho. A departing low pressure system in the Southwest will provide cooler conditions and an increase in clouds over northern New Mexico. Scattered to numerous showers and thunderstorms are expected from the Four Corners eastward, especially northern New Mexico, northwest Texas and Colorado. In Alaska, an intensifying low over the Yukon Flats will produce gusty east winds along with humidity values in the upper teens. In the Gulf of Mexico, Tropical Storm Arlene will pass over western Cuba and enter the central portion of the Gulf of Mexico. It is expected to make landfall Saturday as a tropical storm somewhere between New Orleans and Tallahassee.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Western Great Basin Partly sunny with scattered afternoon showers and thunderstorms across parts of the state. Partly to mostly sunny in the south.	North Valleys: 68 to 82 South Valleys: 80 to 92 Mountains: 55 to 70	North Valleys: 20 to 34% South Valleys: 13 to 26% Mountains: 20 to 40%	Northwest to southwest at 5 to 15 mph with localized gusts to 25 mph.
Southwest Mostly sunny to partly cloudy east and south, becoming partly to mostly cloudy west and north. Chance of afternoon thunderstorms eastern NM and west TX. Showers/ storms far northern AZ eastward into northern NM.	Mountains: 50 to 70 Lower elevations: 80 to 95	Southern/southeastern NM: 5 to 12%; 15 to 30% elsewhere. 30%+ rim region of AZ, higher mountains of northern NM, and west TX plains.	SW to W 10 to 20 mph many areas, more W to NW northern AZ into northern NM, SW to S 15 to 20 mph southern into southeastern NM and far west TX, S to SE 10 to 20 mph far eastern NM into west TX.
Southwest Colorado: Partly sunny with scattered afternoon thunderstorms and isolated dry lightning.	70s, with 60s in the mountains.	12 to 22%	Variable 5 to 15 mph.
Southern California Morning low clouds and fog to the lower coastal mountain slopes, otherwise mostly sunny.	Mountains: 65 to 75. Valleys: 70 to 80. Upper deserts: 75 to 85. Lower deserts: 90 to 100.	30 to 50%.	Southwest to northwest 10 to 20 mph.

SAFENET

SAFENET is a form, and process, that provides a method for reporting unsafe situations on, or off, the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

● Discuss the methods for filing a SAFENET.

- Electronically (Access site through NIFC web site)
- By hardcopy (self-addressed, stamped forms available through the cache system).
- By phone (1-800-670-3938)

● Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.

- Increase the chances of finding an immediate solution.
- Keeps supervisor "in the loop."

● Discuss using SAFENET in situations other than fire.

- Prescribed fire
- All-risk
- Training

● Where does a SAFENET go, and what response can you expect?

- SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. It is then given a document number and posted to the web.
- Every new SAFENET is then forwarded to the affected agencies digniated list of contacts, which usually includes the National or Regional Safety Officer.
- It is each agency's responsibility to insure that corrective actions are taken.

● Corrective actions can be filed by anyone at any time. They are automatically attached to the individual SAFENET on the database.

● Discuss using SAFENET to monitor safety issues other firefighters may be having.
