

**INCIDENT MANAGEMENT SITUATION REPORT**  
**SATURDAY, JUNE 25, 2005 0800 MDT**  
**NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was moderate nationally with 216 new fires reported. Three new large fires were reported, two in the Eastern Great Basin Area and one in the Northern Rockies Area. Three large fires were contained, one each in the Southwest, Eastern Great Basin and the Northern Rockies Areas. Very high to extreme fire indices were reported in Alaska, Arizona, New Mexico, Nevada, Texas and Utah.

**SOUTHWEST AREA INCIDENTS / LARGE FIRES:**

CAVE CREEK COMPLEX, Tonto National Forest. A Type 1 Incident Management Team (Whitney) is assigned. This complex, comprised of the Lousy, Broad and Cave Creek fires is six miles northeast of Carefree, AZ in chaparral, oak, and grass. A road closure has been established at Bartlett Lake. Riparian areas, endangered species habitat, and archeological resources remain threatened. Steep topography, flashy fuels, and poor access are contributing to control problems. Active fire behavior along portions of the perimeter was reported.

PERKINS COMPLEX, Phoenix Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Reinarz) is assigned. This complex, comprised of the Salt, Pepper, Union and Chuey fires, is 34 miles north of Kingman, AZ in grass and shrubs. Structures and range resources remain threatened. Good progress was made on all fires.

THREE FIRE COMPLEX, Tonto National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This complex, comprised of the Three and Four fires, is eight miles northwest of Tonto Basin, AZ in chaparral and grass. An Arizona Game and Fish wildlife enclosure was lost. Recreation facilities on Roosevelt Lake, Four Peaks Wilderness Area and wildlife habitat remain threatened. State Highway 188 is intermittently closed. Wind-driven downhill runs continue to impede containment efforts. Light overnight precipitation was received.

HUMBUG, Arizona State. A Type 1 Incident Management Team (Oltrogge) is assigned. This fire is eight miles south of Crown King, AZ in grass and brush. The historical mining town of Crown King remains threatened. Backing with isolated flare ups was reported.

BIGHORN, Phoenix Field Office, Bureau of Land Management. This fire is 24 miles south of Aguila, AZ in brush and grass. Hummingbird Springs Wilderness Area, Big Horn Wilderness Area, and endangered wildlife habitat are threatened. Extreme fire behavior with rapid rates of spread was observed. Burnout operations were successful.

GOLDWATER, Phoenix Field Office, Bureau of Land Management. This fire is 16 miles north of Ajo, AZ in grass and brush. Native cultural resources and wildlife habitat remain threatened. A transfer of command back to the Department of Defense will occur today.

COTTONWOOD, Coronado National Forest. This fire is five miles east of Catalina, AZ in mesquite and grass. No new information was reported. This will be the last report unless new information is received.

AZTEC, Coronado National Forest. A Type 2 Incident Management Team (Raley) is assigned. This fire is four miles south of Patagonia, AZ in grass and brush. No new information was received.

NORTH GILA COMPLEX, Gila National Forest. A Fire Use Management Team (Hall) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Fork and Johnson fires, is 13 miles southeast of Reserve, NM in timber and grass. The complex is being managed to accomplish multiple resource objectives. Fire behavior was low to moderate with the Fork incident reporting the additional acreage.

### WESTERN GREAT BASIN INCIDENTS / LARGE FIRES:

GOODSPRINGS, Las Vegas Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Krugman) is assigned. This fire is 11 miles northwest of Jean, NV in juniper, brush and grass. Voluntary evacuations of Mt. Springs continue, and wildlife habitat remains threatened. Running, torching, and spotting were reported. Smoke is impacting Las Vegas.

SOUTHERN NEVADA COMPLEX, Las Vegas Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Suwyn) is assigned. This complex, comprised of the South Desert Complex (includes Halfway, Meadow Valley, Tule, Toquap and Duzak fires) and the Mesquite Complex (includes Bunkerville, Dryrock, Middle, Dry Lake, Lamb, Coyote and Wamp fires) is near Mesquite, NV in grass, pinyon and juniper. Wildlife habitat is threatened. Duzak and Meadow Valley fires were active on all fronts and exhibited extreme fire behavior. Mesquite Complex reported low to moderate fire activity.

COYOTE, DeSoto Valley National Wildlife Refuge. This fire is 19 miles north of North Las Vegas, NV in yucca, pinyon and juniper. Desert Tortoise habitat remains threatened. Running and spotting were observed.

### **SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:**

HACKBERRY COMPLEX, Mojave National Park. A Type 2 Incident Management Team (Walker) is assigned. This complex comprised of the Hackberry, Brant, Wildhorse and Ranch fires is 15 miles south of Essex, CA in grass and brush. Fourth of July Canyon was evacuated. The Seven IL Ranch, historical sites, archeological sites, wilderness values and wildlife habitat remain threatened. Runs on steep terrain and extreme fire behavior were observed.

PARADISE, California Department of Forestry and Fire Protection, San Bernardino Unit. A CDF Type 1 Incident Command Team (Paul) is assigned. This fire is one mile southwest of Morongo Valley, CA in chaparral, juniper, and sagebrush. Joshua Tree National Park, Morongo Valley, and Yucca Valley remain threatened. Excellent containment progress was made. Windy conditions remain a concern.

SOBOBA, California Department of Forestry and Fire Protection, Riverside Unit. A transfer of command from a CDF Type 1 Incident Command Team (Henson) back to the local unit will occur today. This fire is one mile north of San Jacinto, CA in grass. Significant line construction was achieved. Spot fires remain a problem.

### **EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:**

WESTSIDE COMPLEX, Cedar City Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Saleen) has been ordered. This fire is 25 miles northwest of St. George, UT in grass, pinyon and juniper. A road closure is in effect for Ranch Road. High winds, low relative humidity, running and crowing were reported.

MT. BANGS COMPLEX, Arizona Strip Field Office, Bureau of Land Management. This complex, comprised of the Lead, Elbow and Hatchet fires, is 15 miles south of Mesquite, NV in grass and brush. A Boy Scout camp was evacuated. Desert Tortoise habitat is threatened. Rapid rates of spread were observed.

### ALASKA AREA INCIDENTS / LARGE FIRES:

SHEENJEK RIVER, Alaska Fire Service, Upper Yukon Zone. A Type 2 Incident Management Team (Kurth) is assigned. This fire started on Fish and Wildlife Service land 12 miles northeast of Ft. Yukon, AK in birch, aspen, black and white spruce. Cabins and outbuildings remain threatened. Short runs, single tree torching, smoldering and creeping were reported. Increase in acreage is due to more accurate mapping.

CHAPMAN CREEK, Alaska Fire Service, Tanana Zone. This fire is eight miles south of Coldfoot, AK in black spruce and tundra. The community of Coldfoot and various sites along the Alaska Pipeline are threatened. Backing fire and intermittent torching were reported.

BILLY HAWK CREEK 1, Alaska Fire Service, Galena Zone. This fire started on Fish and Wildlife Service land 30 miles northwest of Huslia, AK in black spruce and tundra. Few heat sources have been detected. This will be the final report unless significant events occur.

## OUTLOOK:

**Red Flag Warning:** Northwest Arizona for strong southwest winds and low humidity.

**Weather Discussion:** As an upper low approaches the California coast, gusty winds are expected over Nevada, Utah, western Arizona and southern California. Thunderstorm activity will also increase from the Sierras to the Rockies. In Alaska, a very weak upper level ridge will continue over the state with warm temperatures along with afternoon thunderstorms over portions of the interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southwest</b> Breezy to windy and drier conditions in western Arizona. Partly to mostly cloudy with scattered thunderstorms northeast half of Arizona and northwest half of New Mexico. Mostly sunny and hot remainder of Arizona, New Mexico and west Texas.	Mountains: 65 to 90. Lower elevations: 90 to 110.	Lower elevations: 5 to 20%. Higher terrain and west Texas 20 to 35%.	Western Arizona: southwest 10 to 25 mph with gusts 35 mph Eastern Arizona and western New Mexico: Southwest 10 to 15 mph with gusts 25 mph Eastern New Mexico and west Texas: south to southeast 10 to 20 mph.
<b>Southern California</b> Areas of morning low clouds and fog into the coastal valleys, otherwise partly cloudy with scattered thunderstorms over the Sierra and northern deserts.	Mountains: 65 to 80. Valleys: 75 to 85. Upper deserts: 80 to 90. Lower deserts: 95 to 105.	20 to 40%.	Southeast to southwest 10 to 20 mph.
<b>Alaska</b> Interior Partly cloudy to mostly sunny. Scattered afternoon showers and isolated thunderstorms in the central and southern interior.	Upper 60s and 70s.	Upper Yukon Valley: 16 to 30%. Otherwise 30 to 40%.	Northeast to southeast 10 to 15 mph.
<b>Rocky Mountain Area</b> Seasonal temperatures and scattered thunderstorms across Colorado and eastern portions of the region.	Eastern plains: Upper 80s to lower 90s. Higher elevations: 60s to lower 70s. Elsewhere: 80s.	Lower elevations of Wyoming: 15 to 20%.	South 10 to 25 mph over the Eastern Plains.

### **FIRE NOT SCOUTED AND SIZED UP**

Watchout Situation #1 comes up during initial attack and every time resources arrive at a fire.

● Before taking action on the fire, the following considerations must be addressed:

- Can you personally observe the fire or must you use scouts? Describe ways you can scout and size up a fire.
- Do you know the location of the fire perimeter? Discuss situations in which the fire perimeter may not be obvious. (Spotty fires, etc.)
- Do you know the direction of fire spread? When isn't the direction of fire spread obvious? (Wind shifts, spotty fires, etc.)
- Does the direction of fire spread increase risk? Talk about situations where you may have to approach the head of the fire. (Hiking down from a helispot, approaching from an existing road, switching winds, etc.)
- Do you know the fuels and their condition? What kind of information will you assume from what you already know about fuel types? (Spot fires in fir, extreme fire potential in flashy fuels, etc.)

● Continued from above...

- Do topographic hazards exist? What can you assume from what kind of terrain the fire covers? (Slope, chimneys, aspect, etc.)
- Does enough information exist to establish a plan of attack? When do you have enough information to begin fighting fire? What do you need to know?
- Do other dangers exist? Have you talked about factors specific to the area you are working in? (Hunters in the woods, drought, snag patches, etc.)

● To reduce the risks:

- Post lookouts until the fire is sized up and escape routes and safety zones are established.
- Retreat if the situation is too complex. Review fires where you had to wait until the area in which you were assigned to work was scouted and sized up before you were allowed onto the fireline.
