

**INCIDENT MANAGEMENT SITUATION REPORT**  
**THURSDAY, JUNE 30, 2005 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was moderate nationally with 160 fires reported. Eight new large fires were reported, four in the Southwest, one each in the Eastern Great Basin and Western Great Basin Areas, and two in the Southern Area. Four large fires were contained, two in the Southwest Area and one each in the Alaska and Southern Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Minnesota, New Mexico, Nebraska, Nevada and Texas.

**SOUTHWEST AREA INCIDENTS / LARGE FIRES:**

CAVE CREEK COMPLEX, Tonto National Forest. A Type 1 Incident Management Team (Whitney) is assigned to manage the South Zone. Another Type 1 Incident Management Team (Oltrogge) is assigned to manage the North Zone. This complex, comprised of the Lousy, Broad and Cave Creek fires is six miles northeast of Carefree, AZ in chaparral. The communities of Camp Verde, Pine and Strawberry, Cedar Bench Wilderness, the Agua Fria National Monument, riparian areas, endangered species habitat, archeological resources and high voltage power lines are threatened. Structure protection is in place for Childs Power Plant, and further structure protection assessments are ongoing in Camp Verde. The fire was very active with short range spotting observed. A three acre spot fire at Camp Verde and movement into the Pine Mountain Wilderness were reported. Planned burnout operations may impact Interstate 17.

SAND TANK, Phoenix Field Office, Bureau of Land Management. This fire is five miles southwest of Gila Bend, AZ in grass. A Department of Defense range with night aviation operations and unexploded ordnance is a safety concern. Large fire runs were reported.

GHOST, Tonto National Forest. This fire is five miles north of Apache Junction, AZ in grass and brush. Superstition Wilderness is threatened. Highway 88 was temporarily closed. Wind driven fire with flame lengths up to 40 feet in brush was reported.

BUCK, Arizona State. This fire is five miles southeast of Buckeye, AZ in grass. Fifty foot flame lengths were reported. No further information was received.

SNAKE RIDGE, Apache-Sitgreaves National Forest. This fire is 12 miles northeast of Clifton, AZ in grass. Steep terrain and limited access are impeding containment efforts. Aerial resources are being utilized to monitor and suppress hot spots.

MATUCK, Truxton Canon Agency, Bureau of Indian Affairs. This fire is 25 miles northeast of Peach Springs, AZ in pinyon, juniper, grass and yucca. The fire is smoldering and creeping. No further information was received.

HINDU, Truxton Canon Agency, Bureau of Indian Affairs. This fire is 20 miles northwest of Peach Springs, AZ in pine, juniper, grass and brush. No new information was received. This will be the last report unless new information is received.

MUDERSBACH, Kaibab National Forest. This lightning-caused Wildland Fire Use (WFU) incident is burning 13 miles southwest of Tusayan, AZ in ponderosa pine, pinyon and juniper. The fire is being managed to accomplish resource objectives. Fire is backing into prevailing winds with flame lengths up to two feet reported.

#### **EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:**

TWEEDY POINT, Arizona Strip Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Thomas) has been ordered. This fire is 32 miles from St. George, UT in grass, pinyon, juniper and sage. The previously reported Last Chance fire has merged with this fire. Desert Tortoise habitat is threatened. Anchor points are being established to prepare for burn out operations. Extreme fire behavior with running, spotting and torching was reported.

WESTSIDE COMPLEX, Cedar City Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Saleen) is assigned. This fire is 25 miles northwest of St. George, UT in grass, pinyon and juniper. Residences, power lines, gas lines and wildlife habitat are threatened. Partial closure of State Highway 18 occurred. New fires within the complex were reported. High winds, low relative humidity and steep terrain resulted in active fire behavior. The Hollow fire has been controlled.

HARRISBURG CREEK, Dixie National Forest. This fire is four miles west of Leeds, UT in pinyon, juniper and brush. Residences and private land are threatened. Burn out operations were successful.

BLUE SPRING, Dixie National Forest. A Type 2 Incident Management Team (Muir) is assigned. This fire is three miles north of Leeds, UT in grass, pinyon pine and oak brush. Wildlife habit and wilderness values remain threatened. Winds in the afternoon, accompanied by crown fire and torching were observed. Use of aerial resources allowed for successful initial attack on the 298 Anderson Junction fire.

MT. BANGS COMPLEX, Arizona Strip Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Blume) is assigned. This complex, comprised of the Cedar Wash and Hancock fires, is 15 miles south of Mesquite, NV in grass and brush. Desert Tortoise habitat and wilderness values remain threatened. Pending favorable weather conditions, burnout operations will occur in Elbow Canyon. Fire behavior was minimal today with the Cedar Wash fire being contained at 550 acres.

### WESTERN GREAT BASIN INCIDENTS / LARGE FIRES:

FORK, Las Vegas Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Krugman) has been ordered. This fire is 35 miles south of Mesquite, NV in grass, pinyon, pine and juniper. Lake Mead National Recreation Area, mining claim improvements, Lime Canyon and Jumbo Springs Wilderness areas, Million Hills Wilderness Study Area, communication sites, and Desert Tortoise habitat are threatened. Extreme rates of spread with flame lengths up to 20 feet at the head of the fire were reported.

SOUTHERN NEVADA COMPLEX, A Type 2 Incident Management Team (Suwyn) is assigned. This complex, comprised of the South Desert Complex and the Mesquite Complex is near Mesquite, NV in grass, pinyon and juniper. Structure protection for the town of Motoqua is in place. Caliente municipal watershed, a railroad, power lines, gas lines and wildlife habitat are threatened. The Meadow Valley fire is threatening Ella Mountain lookout and communication sites. The head of the fire is unapproachable and is exhibiting extreme rates of spread.

GOOD SPRINGS, Las Vegas Field Office, Bureau of Land Management. This fire is 11 miles northwest of Jean, NV in juniper, brush and grass. No new information was reported.

## ALASKA AREA INCIDENTS / LARGE FIRES:

KING COUNTY CREEK, Kenai Wildlife Refuge. A Type 2 Incident Management team (Doty) is assigned. This fire started on Fish and Wildlife Service land 13 miles southeast of Sterling, AK in black spruce, mixed hardwoods and dead and down beetle killed spruce. Residences and commercial property remain threatened. River traffic was closed on the Kenai River. Use of aerial ignition operations reduced fuel loading, which assisted with structure protection operations. Very active surface and crown fire were reported.

LOST HORSE CREEK, State of Alaska, Fairbanks Area Forestry. This fire is 25 miles north of Fairbanks, AK in black spruce, mixed hardwoods and tundra. Residences along Wickersham Creek and a military site remain threatened. The fire is not road accessible. Extreme fire behavior with flame lengths up to 150 feet was observed.

CHAPMAN CREEK, Alaska Fire Service, Northern Field Office. This fire is eight miles south of Coldfoot, AK in black spruce and tundra. The community of Coldfoot remains threatened. Torching and backing fire were reported.

LONG LAKE, Alaska Fire Service, Upper Yukon Zone. This fire started on Fish and Wildlife Service land 13 miles northwest of Beaver, AK in mixed hardwoods, black spruce and brush. The community of Beaver and Native corporate lands and allotments are threatened. Occasional torching was reported.

SHEENJEK RIVER, Alaska Fire Service, Upper Yukon Zone. This fire started on Fish and Wildlife Service land six miles northeast of Ft. Yukon, AK in birch, aspen, black and white spruce. Cabins and outbuildings remain threatened. Falling water levels in the Sheenjek and Porcupine Rivers continue to slow crew movement with boats. Isolated crowning and torching in Interior pockets of black spruce were reported.

## OUTLOOK:

**Weather Discussion:** A dry westerly flow aloft will continue over the West. An upper level ridge will persist over northern Alaska with a low in the Gulf of Alaska feeding in some moisture into the southern and central interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southwest</b> Much drier, warmer and less windy with mostly sunny skies. Isolated to scattered thunderstorms northeast New Mexico to northwest Texas. Isolated thunderstorms in southwest Texas.	Mountains: 70 to 90. Lower elevations: 90 to 112.	2 to 15%. Highest mountain areas, Northeastern New Mexico and northwest Texas: 15 to 30%.	Southwest to west 5 to 15 mph with gusts 20 to 25 mph in Arizona. West to Northwest 5 to 15 mph with some gusts in New Mexico. South to southeast 10 to 20 mph west Texas. East to northeast 10 to 20 mph northeastern New Mexico, northwest Texas.
<b>Western Great Basin</b> Sunny and hot, a few afternoon cumulus buildups across the mountains of central Nevada.	North Valleys: 84 to 98. South Valleys: 95 to 112. Mountains: 76 to 95.	North Valleys: 8 to 23%. South Valleys: 4 to 10%. Mountains: 5 to 25%.	Southwest to northwest at 5 to 10 mph.
<b>Eastern Great Basin</b> Idaho, Bridger-Teton: Mostly sunny. Northern Utah: Mostly sunny. Southern Utah, Arizona Strip: Mostly sunny.	Idaho, Bridger-Teton: 62 to 80 mountains. Valleys: 75 to 91. Northern Utah: Valleys 85 to 92. Mountains: 69 to 85. Southern Utah, Arizona Strip: Valleys 87 to 105. Mountains: 75 to 87.	Idaho, Bridger-Teton: Mountains: 20 to 35%. Valleys: 15 to 24%. Northern Utah: Valleys: 14 to 22%. Mountains: 22 to 35%. Southern Utah, Arizona Strip: Valleys: 7 to 18%. Mountains: 18 to 24%.	Idaho, Bridger-Teton: Light and variable. Northern Utah: West 10 to 20 mph. Southern Utah, Arizona Strip: Light and variable.
<b>Southern California</b> Areas of morning low clouds and fog coastal areas, otherwise sunny.	80 to 95 mountains. 90 to 105 valleys. 95 to 105 upper deserts. 110 to 120 lower deserts.	5 to 15%.	Southwest to northwest 5 to 15 mph.
<b>Rocky Mountain</b> Scattered afternoon thunderstorms eastern Colorado and Kansas, otherwise dry.	North: upper 70s. South: lower 90s. Mountains: mid 60s and 70s.	Lower elevations western Colorado and southern Wyoming 10 to 20%. 25 to 35% elsewhere.	Northerly 15 to 30 mph eastern plains, otherwise westerly 10 to 20 mph.
<b>Alaska</b> Partly cloudy to mostly sunny with scattered afternoon showers and thunderstorms.	Interior: mid 70s to mid 80s. Southwest and South-Central: 70s to low 80s.	Interior 20% to 30%. South-Central: 25% to 40%.	5 to 15 mph.
<b>Northern California</b> Coastal fog and low clouds in the morning. Otherwise, sunny with cumulus over the mountains in the afternoon.	Near the coast: 60s to mid 70s. Mountains 70s and 80s. Inland valleys: 90s to 105.	Coast: 35 to 55%. Mountains: 20 to 35%. Inland valleys: 12 to 25%.	Northwest to northeast 5 to 15 mph and gusty in the morning, becoming upslope to up-valley 5 to 15 mph in the afternoon.

## ESCAPE ROUTES

An escape route is a preplanned and understood route to reach a safety zone.

- What are the primary concerns in choosing an escape route?
  - Select the closest, least obstructed route.
  - Plan for more than one escape route.
  - Avoid an uphill escape.
  - Scout and clearly mark the route for visibility (aids during smoky situations or night operational periods).
- - Determine escape time--consider slowest person, fatigue, and temperature factors.
  - Continuously reassess the situation with regard to work progress and additional resource arrivals.
  - Assure all line personnel are familiar with escape routes.
