

**INCIDENT MANAGEMENT SITUATION REPORT**  
**MONDAY, MAY 9, 2005 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 1**

**CURRENT SITUATION:**

Nationally, initial attack activity was light with 70 fires reported. No new large fires were reported. Very high to extreme fire indices were reported in Arizona, Minnesota and Wisconsin.

**EASTERN AREA INCIDENTS / LARGE FIRES:**

MISSISSIPPI MEADOWS, Chippewa National Forest. A Type 2 Incident Management Team (Hinds) is assigned. This fire is 22 miles west of Grand Rapids, MN in grass, timber and bog. Infrared flight detected one spot fire outside control lines.

COBIA	FL	FPR	518	40	5/13	10	0	4	1	0	NR

## OUTLOOK:

**Weather Discussion:** A low pressure system moving through the West will bring showers to much of the region except dry and windy conditions to the Southwest. An upper trough over the central U.S. will bring showers to the Great Lakes and Mississippi River Valley with mostly dry weather elsewhere.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southwest</b> Partly cloudy and a bit warmer most areas. Becoming breezy to locally windy western and northwestern AZ. A few showers or thunderstorms TX panhandle.	50 to 70 mountains, 75 to upper 80s lower elevations.	10 to 25% lower elevations, 25 to 40% mountains and TX panhandle.	Southwest 10 to 25 mph AZ and gusty, south to southwest 10 to 20 mph NM, south to southeast 10 to 20 mph eastern NM and west TX.

## CONSTRUCTING LINE WITHOUT A SAFE ANCHOR POINT

When deciding where to build fireline, the following considerations must be weighed:

- Can you hold the line without the fire hooking under/around you? How do you protect against losing the line and ensure your safety if there is a danger of the fire hooking around you?
- Are there adequate safety zones and escape routes? Review what constitutes an adequate safety zone and escape route. Who has the responsibility to designate them and continue to make sure they are adequate?
- Can you develop your starting point into an anchor point? List some good anchor points. Describe how you would develop your starting point into an anchor point.
- Have you posted good lookouts? Where should the lookout(s) be posted? Who can be a lookout?
- Do you have good communications? Who do you need to be in contact with? If the communications are not good, what can you do to improve them?
- To reduce the risks, start the line in another location. Talk about fires where you have had to relocate the line because your anchor point did not hold the fire.
