OUTLOOK:

Weather Discussion: Record warmth is on tap for the Southwest as strong high pressure persists over the area. A low pressure system in the Gulf of Alaska will keep a somewhat moist flow over the south-central and eastern interior portions of Alaska with drier weather in the central interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southwest Mostly sunny, hot and dry AZ and much of NM & southwest TX. Cooler with a slight chance of thunderstorms northeast NM and TX panhandle.	Upper 60s to upper 80s mountains, northeast NM and TX panhandle; upper 80s to near 112 across remaining lower elevations.	5 to 15%, except 15 to 30%+ northeast New Mexico and west TX.	W to SW 10 to 20 mph and gusty AZ and western and southern New Mexico, NE to SE at similar speeds northeast NM and west TX.
Alaska Partly sunny to mostly cloudy with scattered showers. A chance of thunderstorms in the southern interior.	Upper 60s to low 70s.	25% to 35%.	10 to 15 mph.
