

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY NOVEMBER 4, 2005 1000 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was moderate nationally with 437 new fires reported for the week. Seven new large fires were reported, six in the Southern Area and one in the Rocky Mountain Area. Two large fires were contained, one each in Southern and Rocky Mountain Areas. Very high to extreme fire indices were reported in California, Arizona, Kansas, Nebraska, and South Dakota.

Presidential Disaster Declarations have been issued for Hurricanes Katrina, Rita and Wilma in Mississippi, Alabama, Louisiana, Texas and Florida. The Marietta Mobilization Center in Marietta, GA continues to house and in-brief resources prior to assignment.

A link to a map with resources mobilized for hurricane response is located at http://gacc.nifc.gov/sacc/predictive/intelligence/Resource_Map.pdf.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

HURRICANE WILMA SUPPORT, Federal Emergency Management Agency. An Emergency Operations Center is staffed in Tallahassee, FL. The Center is scheduled to close on 11/6.

Two Type 1 Incident Management Teams (Pincha-Tulley and Gelobter) and one Type 2 Incident Management Team (Jones) are assigned.

Pincha-Tulley: Terminated operations and is demobilizing from Homestead Air Reserve Base, FL.

Gelobter: managing the Jacksonville Federal Operational Staging Area at Jacksonville, FL, and overseeing the receiving and distribution of relief supplies. The Team is scheduled to demobilize on 11/6.

Jones: managing a logistics staging area at West Palm Beach, FL. The Team is scheduled to demobilize on 11/7.

HURRICANE KATRINA SUPPORT, Federal Emergency Management Agency. Emergency Support Function (ESF) #4 at the state Emergency Operations Centers in Jackson, MS and Baton Rouge, LA are staffed.

One Type 2 Incident Management Team (Morcom) is assigned. The Team is managing a base camp at the Naval Construction Battalion Center in Gulfport, MS.

ERICK, Oklahoma Division of Forestry. This fire started on private land five miles north of Erik, OK in grass. Extreme fire behavior with flame lengths over 20 feet was reported along the head of the fire.

WEBBER FALLS, Oklahoma Division of Forestry. This fire started on private land four miles southwest of Webber Falls, OK in hardwood timber. Rapid Rates of spread with flame lengths up to 20 feet were reported early in the fire.

TEXANA, Oklahoma Division of Forestry. This fire started on private land nine miles southeast of Checotah, OK in grass and scrub oak. Smoldering fire behavior in the heavier fuels was reported.

PEACEABLE ROAD, Oklahoma Division of Forestry. This fire is one mile west of Blanco, OK in grass. No further information was reported.

ARNOLD, Okmulgee Field Office, Bureau of Indian Affairs. This fire is one mile northwest of Hanna, OK in hardwood litter. Residences and oil wells are threatened. Running, torching and spotting along with 12 foot flame lengths were reported.

OUTLOOK:

Weather Discussion: A frontal system moving across the central U.S. today will bring gusty winds from Colorado and New Mexico to the Southern Plains. Dry weather will prevail through the middle of next week from Southern California to the Southeast states.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern California Areas of morning low clouds and fog to the lower coastal slopes, otherwise partly to mostly cloudy with isolated to scattered showers over the northern part of Central California.	45-60 mountains. 65-75 valleys. 60-70 upper deserts. 75-85 lower deserts.	30-50%.	Southwest to northwest 10 to 20 mph.

FREQUENT SPOT FIRES ACROSS THE LINE

There are few lookout situations that state more clearly how much potential your fire has for rapid, uncontrolled growth. Consider the following questions if you are getting spot fires across your line:

- Can you handle increased spotting? List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.)
- Do you have a plan for long-range spotting? In what fuel type and under what conditions will you likely have long-range spotting? What types of plans can you think of for handling long-range spotting?
- Is help available if necessary? What kinds of resources will you have in place or order to handle spot fires?
- If fire behavior increases, is your position still defensible? Discuss what type of action you might take if a spot fire takes off.
- Do you have more than one safety zone in case one gets cut off? Describe how you might have multiple safety zones.
- Do the primary lookouts have a good view of the situation? Discuss who might be acting as a lookout (e.g., crew member, air resources, etc.) and how you will get good information from that person. (Are you relying on an air attack who is busy with airtankers?)
- Is the primary burning period ending? Talk about how your tactics may vary from finding spot fires early in the day to later into the evening. Review Probability of Ignition (PIG) and what it can tell you about spotting potential.
- To reduce the risk, be ready to retreat. Keep your guard up even if spotting has not occurred for a few hours. Review fires where you have had frequent spot fires and what you learned about controlling them.
