

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, OCTOBER 25, 2005 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally with 69 new fires reported. Two new large fires were reported, one each in the Southern and Eastern Great Basin Areas. Very high to extreme fire indices were reported in California, Montana and Arizona.

Presidential Disaster Declarations have been issued for Hurricanes Katrina, Rita and Wilma in Mississippi, Alabama, Louisiana, Texas and Florida. An Area Command Team (Williams-Rhodes) is coordinating relief operations in Louisiana and Texas (FEMA Region VI). The Marietta Mobilization Center in Marietta, GA continues to house and in-brief resources prior to assignment.

A link to a map with resources mobilized for hurricane response is located at http://gacc.nifc.gov/sacc/predictive/intelligence/Resource_Map.pdf.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

HURRICANES KATRINA AND RITA SUPPORT, Federal Emergency Management Agency. Emergency Support Function (ESF) #4 at the state Emergency Operations Centers in Jackson, MS and Baton Rouge, LA are staffed.

Six Type 2 Incident Management Teams (Morcom, Goheen, Stewart, Floyd, Carlson and LaFave) are assigned.

Morcom: managing base camps at Gulfport and Vancleave, MS. Preparation to demobilize Vancleave Camp is in progress.

Goheen: managing a mobilization center and base camp at Camp Beauregard, near Pineville, LA.

Stewart: is assessing timber damage and assisting with wildfire suppression at Hammond, LA. No new information was reported. This will be the last report unless new information is received.

Floyd: managing a receiving and distribution center at Barksdale Air Force Base, Bossier City, LA.

Carlson: managing the Jackson Support Base in the New Orleans French Quarter and supporting several satellite camps in southern Louisiana.

LaFave: managing receiving and distribution sites in Hancock County from a Stennis Space Center, MS.

HURRICANE WILMA SUPPORT, Federal Emergency Management Agency. The Regional Response Coordination Center is currently staffed in Atlanta, GA. An Emergency Operations Center is staffed in Tallahassee, FL.

Two Type 1 Incident Management Teams (Pincha-Tulley and Gelobter) are assigned. A third Type 1 Team (Wilcock) has been ordered.

Gelobter: initiated command for an operational staging area at Jacksonville, FL, to begin receiving and distributing supplies to southern Florida.

Pincha-Tulley: will be assigned to Homestead, FL, to establish and manage a base camp and receiving and distribution center.

RICE, Texas Forest Service. This fire started on private land 25 miles northwest of Houston, TX, in pine and hardwood forest. Crowning and torching were reported. Dense undergrowth, low relative humidity and high winds are hampering containment efforts.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
RICE	TX	TXS	240	90	UNK	20	0	2	0	0	NR	PRI

EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

ELK MOUNTAIN, Northwest State, Utah State Division of Forestry Fire & State Lands. This fire is two miles east of Mountain Green, UT, in oak brush. Steep terrain and difficult access are hindering containment efforts. Moderate fire spread was reported. No further information was received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
ELK MOUNTAIN	UT	NWS	700	50	10/25	37	2	4	0	0	20K	ST

OUTLOOK:

Weather Discussion: Dry conditions persist along most of the Gulf Coast region. An upper level low pressure system will approach the Pacific Northwest coast. Another weather system will move across southern California and the Southwest with showers and isolated thunderstorms.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern California Morning low clouds, fog, and some drizzle or light showers west of the coastal mountains of southern California. Elsewhere, partly cloudy in the morning, mostly sunny in the afternoon.	58 to 68 mountains. 62 to 72 valleys. 70s upper deserts. 80s lower deserts.	40 to 60%.	West to northwest 10 to 20 mph.

PROPER USE OF TRIGGER POINTS

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of firefighters. Keeping an eye out for the 18-Watchout Situations and establishing operational / environmental limits ("trigger points") ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of support resources (airtankers, helicopters, etc.)
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, etc.)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is appropriate. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan
