

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, SEPTEMBER 13, 2005 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4

CURRENT SITUATION:

Initial attack activity was moderate nationally with 231 fires reported. Three new large fires were reported, two in the Southern Area and one in the Southern California Area. Three large fires were contained, one each in the Southern California, Northern Rockies and Rocky Mountain Areas. Very high to extreme fire indices were reported in Arizona, Arkansas, California, Colorado, Idaho, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Utah and Wyoming.

A Presidential Disaster Declaration was issued on 8/29 for Hurricane Katrina in Mississippi, Alabama and Louisiana. Two Area Command Teams are assigned (Williams-Rhodes and Ribar). Williams-Rhodes Team is providing Incident Management Team coordination for FEMA Region IV at the Regional Response Coordination Center in Atlanta, GA for Hurricane Katrina Support. Ribar's Team is assigned to the Louisiana Emergency Operations Center in Baton Rouge, LA. The Team is coordinating activities of the Incident Management Teams in FEMA Region VI. Numerous resources have been mobilized as part of the relief effort.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

HURRICANE KATRINA SUPPORT, Federal Emergency Management Agency. Emergency Support Function #4 is staffed at the Regional Response Coordination Centers in Atlanta, GA and Denton, TX. Eight Type 1 Incident Management Teams (Custer, Quesinberry, Pincha-Tulley, Gelobter, Cable, Molumby, Wilcock and Anderson) are assigned. Custer's Team is managing an evacuation center and base camp, providing services to military, state, local and federal agencies at Louis Armstrong New Orleans International Airport in Kenner, LA. A transfer of command to a North Carolina State Type 2 Incident Management Team (Jenkins) will occur today. Quesinberry's Team is managing a mobilization center and receiving and distribution operations for FEMA at the Meridian Naval Air Station in MS. Pincha-Tulley's Team is operating a mobilization center and base camp, and supporting the receiving and distribution of relief supplies at Stennis Space Center in MS. Gelobter's Team is managing a base camp at Gautier, MS. Cable's team has relocated to Jackson Square and is managing facilities and services for relief workers in New Orleans and several satellite camps in southern Louisiana. Molumby's Team is engaged in managing a base camp in support of the Disaster Mortuary Operation Response Team at St. Gabriel, LA. A transfer of command to a Type 2 Incident Management Team (Paul) will occur today. Wilcock's Team has established an ICP in Selma, AL and is managing FEMA mobile trailer staging areas and supporting the allocation of trailers to stricken areas. Anderson's Team is awaiting assignment in Baton Rouge, LA.

Nine Type 2 Incident Management Teams (Mullenix, Smith, Thomas, Philbin, Stanford, Hildreth, Whalen, Sinclear and Paul) are assigned. Mullenix's Team is assisting with base camp operations in San Antonio, TX. Smith's Team is managing a base camp at Barron Point Camp, MS. Thomas Team is managing a base camp and supporting the military and civilian first responders at the Naval Construction Battalion Center at Gulfport, MS. Philbin's Team is managing an evacuee center in Phoenix, AZ. Stanford's Texas State Incident Management Team is operating the Hammond Receiving and Distribution Center and the Hammond and Harahan Regional Staging Areas in Hammond and Reserve, LA. Hildreth's North Carolina State Incident

Management Team has consolidated its mobile base camp at Shrine Brookley Field in Mobile, AL with Gelobter's operation in Gautier, MS. The Team is awaiting possible reassignment in Atlanta. Paul's Team will transition with a Type 1 Incident Management Team (Molumby) today, taking over base camp operations at St. Gabriel and Baton Rouge, LA. Two Type 2 Incident Management Teams (Whalen and Sinclear) are in Jackson, MS to clear roadways and support National Forest recovery operations in Mississippi. An additional Type 2 Incident Management Team (Furlong/Gormley) is currently staged.

Five Logistics Management Teams (Prevey, Humphrey, Lineback, Jenkins and Floyd) have been mobilized. Prevey's Team is at Maxwell Air Force Base, AL. Lineback's Team is in Pineville, LA, and Floyd's Team is in Bossier City, LA. Jenkins and Humphrey's Teams are in Meridian, MS. Jenkins Team has demobilized. Three National Park Service All Risk Teams have been assigned to various areas to assist with hurricane recovery. A U.S. Fish and Wildlife Service team is engaged in road clearing, community assistance, and supporting search and rescue work in LaCombe, LA.

JENNIFER, Kisatchie National Forest. This fire is 20 miles west of Winnfield, LA. Residences and other structures are threatened. Extreme fire behavior with crowning and torching was observed.

GREY ESTATE-2, Sabine National Wildlife Refuge. This fire is 24 miles east of Hackberry, LA in tall grass and peat. Minimal fire behavior was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN

GREY ESTATE-2	LA	SBR	3,540	10	9/20	8	0	1	1	0	6K	FWS

EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

VALLEY ROAD, Sawtooth National Forest. A Type 1 Incident Management Team (Sexton) is assigned. This fire started on private land seven miles south and east of Stanley, ID in timber. Wildlife habitat remains threatened. Cooler temperatures and higher relative humidity reduced fire activity to smoldering and creeping. Pockets of heavy fuels continue to burn out.

FRANK CHURCH, Payette National Forest. A Fire Use Management Team (Reinarz) is assigned. This lightning caused Wildland Fire Use (WFU) incident, comprised of the Bear Creek, Root Creek, West Fork/Joe, Missouri Ridge and several other fires is 50 miles northeast of McCall, ID in timber. The fire is being managed to accomplish resource objectives. No further information was received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
VALLEY ROAD	ID	STF	40,786	65	9/27	597	18	1	8	3	5.0M	PRI
FRANK CHURCH WFU	ID	PAF	44,312	N/A	N/A	34	0	0	0	0	2.3M	FS

NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:

HEARTLAND, Lewistown Field Office, Bureau of Land Management. This fire is 45 miles southeast of Malta, MT in grass, shrubs and timber. Difficult terrain is hampering containment efforts. One residence and wildlife habitat remain threatened. Area closure is in place. Backing fire with isolated torching was reported. Acreage adjustment due to more accurate mapping.

SIGNAL ROCK, Bitterroot National Forest. The fire is 17 miles southwest of Philipsburg, MT in timber and is burning on both the Bitterroot and Beaverhead/Deerlodge National Forests. No further information was received.

THUNDER MOUNTAIN, Lewis and Clark National Forest. This fire is six miles southwest of Monarch, MT in timber litter and understory. Smoldering and creeping fire behavior was reported.

LONG BLACK COMPLEX, Clearwater National Forest. This complex, comprised of the Long Creek and Black Canyon fires, is 38 miles northeast of Pierce, ID in timber. Fire behavior was minimal due to cooler temperatures and precipitation. Single tree torching was observed. The Long Creek fire continues to be monitored by aircraft.

ROCKIN, Bitterroot National Forest. This fire is 10 miles northwest of Darby, MT in timber. No new information was reported

CMR - Charles M. Russell National Wildlife Refuge

SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

KINGSTON 3, California Desert District, Bureau of Land Management. This fire is 30 miles south of Pahrump, NV in chaparral. Wildlife habitat, historic sites, a mining facility and a watershed are threatened. Active fire behavior with rapid rates of spread was observed.

OUTLOOK:

Weather Discussion: A gradual warming trend is on tap for the West as high pressure slowly builds over the region. Most of the West will be dry except for some showers over Montana. Sunny weather is expected to continue along the Gulf Coast with highs mostly in the lower 90s.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Northern Rockies Upper level northwest flow will continue across the geographic region. Isolated morning showers are possible over higher terrain. Expect partly cloudy skies and drier conditions by afternoon. Temperatures will remain below normal.	West of divide: 60 to 65. East of divide: 60 to 70. North Dakota: 60 to 70.	West of divide: 35 to 45%. East of divide: 40 to 50%. North Dakota: 45 to 55%.	West of divide: West 5 to 10 mph. East of divide: West 10 to 15 mph. North Dakota: West 10 to 20 mph.
Northern California Mostly sunny inland with areas of fog along the coast.	58 to 68 near the ocean to 70s and 80s inland.	12 to 28% inland and 45% plus near the coast.	Light northwest to northeast in the morning hours, becoming mainly southwest to northwest 3 to 10 mph in the afternoon, with strongest gusts 20 mph in sea breezes of San Francisco Bay Area..
Southern California Morning low clouds and fog into the coastal valleys and coastal mountain foothills, otherwise mostly sunny.	65 to 80 mountains. 75 to 85 valleys. 80 to 90 upper deserts. 90 to 102 lower deserts.	20 to 35%.	Southwest to northwest 10 to 20 mph.
Eastern Great Basin Idaho, Bridger-Teton: Partly cloudy with isolated thunderstorms over central Idaho mountains. Northern Utah: Partly cloudy. Southern Utah, Arizona strip: Mostly sunny.	Idaho, Bridger-Teton: 45 to 60 mountains, 60 to 74 valleys. Northern Utah: 58 to 68 mountains, 68 to 78 valleys. Southern Utah, Arizona strip: 64 to 76 mountains, 76 to 89 valleys, 91 to 96 Lake Mead area.	Idaho, Bridger-Teton: 30 to 50% mountains, 16 to 30% valleys. Northern Utah: 30 to 38% mountains, 20 to 30% valleys. Southern Utah, Arizona strip: 23 to 34% mountains, 11 to 23% valleys.	Idaho, Bridger-Teton: Light and variable. Northern Utah: Upslope/upvalley 5 to 10 mph. Southern Utah, Arizona strip: Southwest 10 to 15 mph.
Western Great Basin Mostly sunny skies.	North valleys: 68 to 81. South valleys: 72 to 94. Mountains: 54 to 72.	North valleys: 10 to 22%. South valleys: 10 to 16%. Mountains: 16 to 35%.	Variable at 5 to 12 mph with afternoon gusts of 20 mph.

EXTREME FIRE BEHAVIOR (continued)

Extreme fire behavior has always been present in cases of shelter deployment. It is critical for firefighters to maintain situational awareness of live and dead fuel moisture conditions as well as predicted and current weather conditions. As fire behavior changes, it is critical to act decisively to the changing situation.

- Discuss how the following factors can contribute or lead to extreme fire behavior:
 - Frost Kill: Has there been a late or unusually extensive freeze? Is the loading of frost-killed fuels high?
 - Drought Conditions: Live Fuel Moistures Index, KBDI, Soil Moisture Index, low humidity, high temperatures
 - Slope: Increases fire spread uphill, preheats fuels by convection, may channel winds
 - Sea Breeze/Foehn: Wind direction may vary throughout the day, humidity changes may occur, strong wind velocities may drive fire behavior to extremes.
- To aid situational awareness, track NFDRS live and dead fuel moisture outputs.
- Take hourly weather observations and track the hourly changes. By tracking fuel moisture and weather observations and using "Table 74: Fire Severity Related to Fuel Moisture Chart," firefighters can be alerted to those conditions that can lead to situations where there is a high potential for extreme fire behavior.
