

**INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, SEPTEMBER 26, 2005 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was light nationally with 68 fires reported. No new large fires were reported. One large fire was contained in the Western Great Basin Area. Very high to extreme fire indices were reported in Arizona, California, Idaho, Montana, Nevada, Oregon and Washington.

A Presidential Disaster Declaration was issued on 8/29 for Hurricane Katrina in Mississippi, Alabama, Louisiana and Texas. Three Area Command Teams are assigned (Williams-Rhodes, Zimmerman and Rounsville).

Williams-Rhodes Team is providing Incident Management Team coordination in FEMA Region IV at the Regional Response Coordination Center in Atlanta, GA. Zimmerman's Team is assigned to the Louisiana Emergency Operations Center in Baton Rouge, LA and is coordinating relief operations in Louisiana. Rounsville's Team is in San Antonio, TX, and will be coordinating relief operations for Hurricane Rita in Texas. Both Zimmerman's and Rounsville's Teams are coordinating the activities of Incident Management Teams in FEMA Region VI. The Marietta Mobilization Center in Georgia continues to house and in-brief Incident Management Teams and other resources prior to assignment throughout the South.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

HURRICANE KATRINA SUPPORT, Federal Emergency Management Agency. Emergency Support Function 4 at the Regional Response Coordination Center in Atlanta, GA, and state Emergency Operations Centers in Tallahassee, FL, Montgomery, AL, Jackson, MS, Baton Rouge, LA and Austin, TX are staffed.

Five Type 1 Incident Management Teams (Pincha-Tulley, Gelobter, Krugman, Anderson, Wilcock) are assigned.

Pincha-Tulley: Is operating a base camp and six distribution points for relief supplies at Stennis Space Center in MS. Crews are rebuilding Camp Glenn following yesterday's severe weather.

Gelobter: Is providing logistical support to FEMA Branches I and II, and public school recovery projects, from Camps Gautier and Shriner at Gautier, MS, and Mobile, AL. Camp Shriner is closing, and a new camp for emergency workers is being established at Vancleave, MS.

Krugman: Is providing support to emergency responders and the military at the Jackson Support Base in New Orleans French Quarter and at several satellite camps in and around New Orleans and southern Louisiana.

Anderson: Under unified command with New Orleans, New York City and Illinois fire departments, is providing fire and emergency response within the City of New Orleans.

Wilcock: Is planning and implementing a hazard fuel mitigation and fire suppression plan for counties and adjoining areas in southeast Mississippi in cooperation with Mississippi state agencies.

Nine Type 2 Incident Management Teams (Smith, Thomas, Stanford, Paul, Furlong/Gormley, West, Beauchamp, Johnson and Houseman) are assigned.

Smith: Is re-establishing receiving and distribution operations at Barron Point, Forrest Camp and Camp Shelby in Mississippi. Storm damage repairs at the camp are ongoing.

Thomas: Is managing a base camp and supporting military and civilian first responders at the Naval Construction Battalion Center at Gulfport, MS.

Stanford: The Texas State Incident Management Team is relocating to Texas to support Hurricane Rita recovery operations.

Paul: Is supporting the Louisiana Interagency Emergency Support Base camp and St. Gabriel Mortuary Support Camp at St. Gabriel and Baton Rouge, LA. Minor damage repairs from Hurricane Rita are ongoing.

Furlong/Gormley: Is managing the distribution of relief supplies at Camp Beauregard, near Pineville, LA. Nearly 5,000 truck loads of supplies have been processed at the facility.

West: Is providing logistical and planning support to the FEMA Incident Support Team (IST), and is supporting emergency response and military personnel at Saints Support Base in New Orleans. The Team is helping to conduct searches in the communities of Union, Westlake and Sulphur, LA.

Beauchamp: The Florida State Team is assessing wildfire potential in hurricane stricken parts of southern Louisiana. The Team is conducting a fire risk review in coordination with Louisiana Forestry officials in St Tammany, Tangipahoe and Washington Parishes.

Johnson: The Team is traveling to Stennis Space Center to prepare for a transfer of command with Pincha-Tulley's Team.

Houseman: The North Carolina State Team is being assigned to Hammond, LA, to work with the state of Louisiana implementing a fire mitigation plan.

Two Logistics Management Teams (LMT) (Floyd and Hayes) are assigned. The Teams are operating mobilization centers and trailer staging areas in Bossier City, LA, and Texarkana, AR. A third LMT (O'Brien) has been ordered to replace Gelobter's Type 1 Incident Management Team. Two National Park Service All Risk Teams have been assigned to various areas to assist with hurricane recovery. Three U.S. Fish and Wildlife Service teams are engaged in road clearing, community assistance, and supporting search and rescue operations in Louisiana and Texas.

HURRICANE RITA SUPPORT, Federal Emergency Management Agency. The Regional Response Coordination Center (RRCC) in Austin, TX, is staffed with Emergency Support Function 4 (ESF4) personnel. A Planning Section Team has been ordered for the RRCC. Operations at the facilities have ramped up with the arrival of Hurricane Rita evacuees.

Four Type 1 Incident Management Teams (Oltrogge, Lohrey, Sexton, Sandman) are assigned. An additional Type 1 Incident Management Team (Bennett) has been ordered and will in-brief at Austin, TX.

Oltrogge: The Team is assigned at Longview, TX, operating a receiving and distribution center and base camp.

Sandman: Is managing base camp operations and long term support at several facilities in San Antonio, TX. The Team continues to provide assistance to the City of San Antonio in their mission to support and assist current Hurricane Katrina and Rita evacuees, as well as receive and place additional evacuees from Hurricane Rita.

Lohrey: Will establish and manage a receiving and distribution center at Beaumont TX.

Sexton: The Team is relocating to Lake Charles, LA, to establish a base camp and receiving and distribution center.

Five Type 2 Incident Management Teams (Sinclair, Quesinberry, Saleen, Larsen and Rogers) are assigned.

Sinclair: The Team is operating a receiving and distribution center at Ft. Sam Houston in San Antonio, TX.

Quesinberry: The Team is awaiting assignment in Lufkin, TX.

Saleen: Is being assigned to Lafayette, LA, to establish a receiving and distribution center.

Larsen: Is being assigned to Jennings, LA, to establish a receiving and distribution center.

Rogers: Is being assigned to the Astrodome in Houston to establish a base camp and receiving and distribution center.

EAST CANEY CREEK, Texas Forest Service. This fire is 38 miles south of Paris, TX in hardwood litter. No new information was reported. This will be the last report unless new information is received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
EAST CANEY CREEK	TX	TXS	110	50	UNK	20	0	6	0	0	NR	ST

NORTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

WOOLEY, Klamath National Forest. A Type 2 Incident Management Team (Cones) is assigned. This timber fire is in the Marble Mountain Wilderness, 12 miles northeast of Somes Bar, CA. The fire is being managed under a confinement strategy. A fire use module has been assigned. Cultural sites, fish and spotted owl habitat remain threatened. Inaccessible, steep terrain and heavy fuels continues to hamper containment efforts. The fire was more active, and spot fires were reported on the south side of Wooley Creek.

OUTLOOK:

Red Flag Warnings: A red flag warning is in effect until 1100 PDT Monday for very low relative humidity and gusty east winds in the upper slopes and ridges of eastern Humboldt, Del Norte, Mendocino and Trinity counties

Weather Discussion: A cut-off low pressure center off the central California coast will import moisture from the south for showers and thunderstorms over portions of California, western Nevada, and extreme southern Oregon. Remnants of Hurricane Rita will continue to produce heavy rainfall as it moves across the southeastern portion of the country.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Northern California Partly cloudy in the north and mostly cloudy in the south. A chance of showers and thunderstorms spreading from the far south early to the entire GACC by afternoon.	50s and 60s in the mountains, to mid 80s in the warmest interior valleys.	12 to 35% east of the Cascade-Sierra crest. Otherwise 20 to 40%.	Northeast to southeast 5 to 15 mph with gusts to 25 mph.
Southern California Partly cloudy with a slight chance of showers.	Mountains: 70 to 85. Valleys: 80 to 95. Upper deserts: 80 to 90. Lower deserts: 95 to 102.	15 to 30%.	Southeast to southwest 5 to 15 mph.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Northwest Partly cloudy far north Washington and far south Oregon. Otherwise, sunny. Isolated showers and thunderstorms along Oregon -Nevada border late in the afternoon.	East of Cascades: generally 70 to 83. West of Cascades: 60s along the coast. Highs in the 70s inland to lower 80s in southwest Oregon.	East of Cascades: generally 15 to 20%. West of Cascades: 20 to 35% inland, but 35 to 45% coast	Generally, north to northwest 5 to 10 mph. Over eastern Oregon, wind becoming southwest 5 to 10 mph in the afternoon.

FALLING SNAGS

Falling snags (dead, standing trees without leaves or needles in the crowns) present a significant hazard to wildland firefighters. Snags typically have much lower fuel moistures than live, green trees; and they burn more readily. In the process, they often throw spot fires far in advance of the main fire and often burn through more quickly than green trees, falling with little or no warning.

- The risk of injuries from falling snags increases during the night operational period when visibility is greatly reduced.
- While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags may limit the widespread use of crews at night in areas of dead and dying timber.
- Environmental conditions that increase risk from falling snags:

- Strong winds
- Night operations
- Steep slopes
- Diseased or bug-killed areas

- Things to consider when assessing the potential hazards of both snags and green trees:

- Trees have been burning for an extended period.
- High-risk tree species (those that are known for rot and shallow root systems) are in the area.
- Numerous downed trees
- Dead or broken tips and limbs overhead
- Accumulation of downed limbs
- Absence of needles, bark or limbs
- Leaning or hung-up trees

- Mitigation measures to take:

- Identify and flag all high-risk snags and green trees.
- Keep personnel out of the high-risk areas until the hazard has been removed.
- Establish lookouts.
