

**INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, SEPTEMBER 29, 2005 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was light nationally with 77 fires reported. Two new large fires were reported in the Southern California Area. One large fire was contained in the Eastern Great Basin Area. Very high to extreme fire indices were reported in California, Idaho, Montana, Nebraska, Oregon, and Washington.

A Presidential Disaster Declaration was issued for Hurricanes Katrina and Rita in Mississippi, Alabama, Louisiana and Texas. Three Area Command Teams are assigned (Williams-Rhodes, Zimmerman and Rounsville). A fourth Area Command Team (Ribar) has been ordered to replace Williams-Rhodes Team.

Williams-Rhodes Team is providing Incident Management Team coordination at the Regional Response Coordination Center in Atlanta, GA (FEMA Region IV). An additional Area Command Team (Ribar) has been ordered, and will replace Williams-Rhodes Team. Zimmerman's Team is located at the Louisiana Emergency Operations Center in Baton Rouge, LA and is coordinating relief operations in Louisiana (FEMA Region VI). Rounsville's Team is in San Antonio, TX, and is coordinating relief operations for Hurricane Rita in Texas (FEMA Region VI). The Marietta Mobilization Center in Georgia continues to house and in-brief Incident Management Teams and other resources prior to assignment.

A link to a map with resources mobilized for hurricane response is located at http://gacc.nifc.gov/sacc/predictive/intelligence/Resource_Map.pdf.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

HURRICANE KATRINA SUPPORT, Federal Emergency Management Agency. Emergency Support Function (ESF) #4 at the state Emergency Operations Centers in Jackson, MS, Baton Rouge, LA, and Austin, TX are staffed.

Three Type 1 Incident Management Teams (Krugman, Anderson and Wilcock) are assigned.

Krugman: Is managing the Jackson Support Base in the New Orleans French Quarter and supporting several satellite camps in southern Louisiana.

Anderson: Under unified command with New Orleans, New York City and Illinois fire departments, is providing fire and emergency response to the City of New Orleans.

Wilcock: Is engaged in hazard fuel mitigation and fire suppression for counties in southeast Mississippi.

Seven Type 2 Incident Management Teams (Smith, Thomas, Larsen, Furlong/Gormley, West, Johnson and Houseman) are assigned. Two Type 2 Incident Management Teams (Cowin and Dave Johnson) have been ordered.

Smith: Is managing receiving and distribution operations at Barron Point Camp north of Gulfport, MS.

Thomas: Is managing a base camp at the Naval Construction Battalion Center at Gulfport, MS.

Larsen: Is supporting the St. Gabriel Mortuary Support Camp at St. Gabriel, LA.

Furlong/Gormley: Is managing a mobilization center and base camp at Camp Beauregard, near Pineville, LA.

West: Is managing a staging area at Saints Support Base Camp in New Orleans.

Allen Johnson: Is managing five points of distribution in Hancock County from Stennis Space Center, MS.

Houseman: Is being assigned to Hammond, LA. No new information was reported.

Two Logistics Management Teams (LMT) (Floyd and Hayes) are assigned. The Teams are operating mobilization centers and trailer staging areas in Bossier City, LA, and Texarkana, AR. U.S. Fish and Wildlife Service teams are engaged in road clearing, community assistance, and supporting search and rescue operations in Louisiana and Texas.

HURRICANE RITA SUPPORT, Federal Emergency Management Agency. The Regional Response Coordination Center (RRCC) in Austin, TX, is staffed with Emergency Support Function #4 personnel. A Planning Section Team is in place at the RRCC.

Five Type 1 Incident Management Teams (Oltrogge, Sandman, Lohrey, Bennett and Sexton) are assigned. Another Type 1 Incident Management Team (Custer) has been ordered.

Oltrogge: Is operating a receiving and distribution center, and base camp at Lufkin, TX.

Sandman: Is managing a base camp and supporting several evacuee centers in San Antonio, TX.

Lohrey and Bennett: Are managing a base camp at Ford Park Arena, Beaumont, TX. The Teams are also supporting points of distribution centers and two Emergency Operations Centers in Beaumont and Port Arthur, TX.

Sexton: The Team is supporting the Lake Charles Regional Staging Area (RSA) and six points of distribution sites at Lake Charles, LA. The team is also assessing wildland fuels loading and wildfire potential for Calcasieu Parish.

Five Type 2 Incident Management Teams (Sinclair, Quesinberry, Saleen, Larsen and Rogers) are assigned.

Sinclair: The Team is operating a receiving and distribution center at Ft. Sam Houston in San Antonio, TX.

Quesinberry: The Team is awaiting assignment at Lufkin, TX. No new information was reported.

Saleen: Is managing a receiving and distribution center and base camp at Jennings, LA.

Larsen: Is establishing a receiving and distribution center in Lafayette, LA, and the St. Gabriel Mortuary Support Camp at St. Gabriel, LA.

Rogers: Is managing a base camp and receiving and distribution center at the Reliant Arena in Houston, TX.

CLINCH MOUNTAIN, Tennessee Division of Forestry. This fire is 15 miles northeast of Knoxville, TN in hardwood litter. No further information was reported. This will be the last report unless new information is received.

SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

TOPANGA, Los Angeles County Fire Department. This fire is located in Chatsworth, CA in chaparral. Residences, electrical and communication equipment, rail lines, and wildlife habitats are threatened. Evacuations and road and rail line closures are in place. High winds are hampering containment efforts. Extreme fire behavior with long range spotting was reported.

SAN TIMOTEO, Riverside Unit, California Department of Forestry & Fire Protection. This fire is six miles northeast of Moreno Valley, CA in brush and grass. Residences are threatened. Road closures and voluntary evacuations are in place. Difficult terrain and high winds are hampering containment efforts. Extreme fire behavior with rapid rates of spread was observed.

NORTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

WOOLEY, Klamath National Forest. A Type 2 Incident Management Team (Cones) is assigned. This timber fire is in the Marble Mountain Wilderness, 12 miles northeast of Somes Bar, CA. The fire is being managed under a confinement strategy. Cultural sites, fish and spotted owl habitat remain threatened. Inaccessible, steep terrain and heavy fuels continue to hamper containment efforts. An inversion moderated fire behavior causing airshed quality concerns in Siskiyou and Humboldt Counties.

OUTLOOK:

Fire Weather Watch: Fire weather watch for northeast Montana for windy conditions with low relative humidity.

Weather Discussion: High winds across Montana today with dry offshore flow continuing over portions of Oregon and California. An upper level weak low pressure center will remain over the Four Corners region with scattered showers and thunderstorms. Another weather system is moving into the Northwest today with showers mainly over portions of Washington and extreme northern Idaho.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Eastern Great Basin Idaho, Bridger-Teton: Mostly sunny. Northern Utah: Mostly sunny. Southern Utah, Arizona strip: Partly cloudy with scattered showers and thunderstorms southeast corner.	Idaho, Bridger-Teton: Mountains: 63 to 77. Valleys: 75 to 83. Northern Utah: Mountains: 61 to 70. Valleys: 70 to 80. Southern Utah, Arizona strip: Mountains: 61 to 69. Valleys: 70 to 92.	Idaho, Bridger-Teton: Mountains: 16% to 23%. Valleys: 10% to 20%. Northern Utah: Mountains: 20% to 30%. Valleys: 15% to 25%. Southern Utah, Arizona Strip: Mountains: 35% to 45%. Valleys: 15% to 35%.	Idaho, Bridger-Teton: Upslope/upvalley 5 to 10 mph. Northern Utah: Upslope/upvalley 5 to 10 mph. Southern Utah, AZ strip: Upslope/upvalley 5 to 10 mph.
Western Great Basin Sunny.	North valleys: 74 to 89. South valleys: 80 to 96. Mountains: 65 to 80.	North Valleys: 8% to 20% South Valleys: 10% to 15%. Mountains: 10 % to 30%.	Upslope and upvalley winds.
Rocky Mountain Dry in the north. Scattered showers and isolated thunderstorms in the southern Colorado.	70 to 75. Mid 50s to 60s in the mountains.	Relative humidity around 15% to 30% in the northern portions with 30% to 45% in the south.	Southwest 10 to 20 mph in the eastern plains. Otherwise, variable 5 to 15 mph.
Northern Rockies Very windy, warm and mostly dry conditions will prevail across the geographic area. Northwest Montana may see rain showers as pacific moisture moves through the upper level zonal flow.	West of divide: 70 to 75. East of divide: 75 to 80. North Dakota: 70 to 75.	West of divide: 20% to 30%. East of divide: 20% to 35%. North Dakota: 25% to 35%.	West of divide: West 5 to 15 mph. East of divide: West 20 to 30 mph with locally higher gusts. North Dakota: West 10 to 20 mph.
Northern California Clear and warm with gusty Northeast winds.	Mountains: 60 to 80. Valleys: 90.	10% to 20% driest inland areas and 15% to 30% coast and mountains.	Northeast to Southeast 5 to 15 mph with gusts to 25 mph, diminishing in the afternoon.
Southern California Sunny.	Mountains: 75 to 85. Valleys: 90 to 102. Upper deserts: 85 to 95. Lower deserts: 95 to 105.	10% to 20%.	Northeast 15 to 20 mph in the morning, becoming mostly onshore by afternoon.

http://www.nifc.gov/sixminutes/dsp_sixminutes.php

Wildland Urban Interface Hazards

Firefighters in the wildland urban interface may encounter hazards other than the fire itself, such as hazardous materials, utility lines and poor access.

Hazardous Materials

- Common chemicals used around the home may be a direct hazard to firefighters from flammability, explosion potential and/or vapors or off-gassing. Such chemicals include paint, varnish and other flammable liquids; fertilizer; pesticides; cleansers; aerosol cans, fireworks, batteries and ammunition. In addition, some common household products such as plastics may give off very toxic fumes when they burn. Stay OUT of the smoke from burning structures and any unknown sources such as trash piles.

Illicit Activities

- Marijuana plantations or drug production labs may be found in wildland urban interface areas. Extremely hazardous materials such as propane tanks and flammable/toxic chemicals may be encountered, as well as booby traps.

Propane tanks

- Both large (household size) and small (gas grill size) liquefied propane gas (LPG) tanks can present hazards to firefighters, including explosion. See the "LPG Tank Hazards" discussion for details.

Utility lines

- Utility lines may be located above and below ground and may be cut or damaged by tools or equipment. Don't spray water on utility lines or boxes.

Septic tanks and fields

- Below-ground structures may not be readily apparent and may not support the weight of engines or other apparatus.

New construction materials

- Many new construction materials have comparatively low melting points and may "off-gas" extremely hazardous vapors. Plastic decking materials that resemble wood are becoming more common and may begin softening and losing structural strength at 180° F, though they normally do not sustain combustion once direct flame is removed. However, if they continue to burn they exhibit the characteristics of flammable liquids.

Pets and livestock

- Pets and livestock may be left when residents evacuate and will likely be highly stressed, making them

more inclined to bite and kick. Firefighters should not put themselves at risk to rescue pets or livestock.

• Evacuation occurring

- Firefighters may be taking structural protection actions while evacuations of residents are occurring. Be very cautious of people driving erratically. Distraught residents may refuse to leave their property, and firefighters may need to disengage from fighting fire to contact law enforcement officers for assistance. In most jurisdictions firefighters do not have the authority to force evacuations. Firefighters should not put themselves at risk trying to protect someone who will not evacuate!

• Limited access

- Narrow one-lane roads with no turn-around room, inadequate or poorly maintained bridges and culverts are frequently found in wildland urban interface areas. Access should be sized-up and an evacuation plan for all emergency personnel should be developed.
