

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, APRIL 6, 2006 0800 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally with 199 new fires reported. Five new large fires were reported, three in the Southern Area and one each in Southwest and Northern Rockies Areas. Three large fires were contained one each in the Southern, Rocky Mountain, and Northern Rockies Areas. Very high to extreme fire indices were reported in Illinois, and Indiana.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

WEST TEXAS IA, Texas Forest Service. A Texas State Type 2 Incident Management Team (Hanneman) is assigned in Midland, TX. The Team is assisting local jurisdictions with managing initial and extended attack fires and a fire prevention program within the 140 million acre fire management response area. Acres, structure losses and costs represent cumulative fire activity for the response area.

LONG WAY IN, Florida Division of Forestry. This fire is three miles north of Fort Mead, FL in grass and palmetto. There is potential for the smoke to drift on to highway 98. Spotting fire behavior was observed.

LEWIS MOUNTAIN, Shenandoah National Park. This fire is four miles east of Grottoes, VA in leaf litter. Some trails have been closed. Backing fire behavior was reported.

LONE STAR, Talihina Agency, Bureau of Indian Affairs. This fire is six miles northeast of Coalgate, OK in timber and grass. No new information was reported.

HAPPY HOLLOW, Arkansas Forestry Commission. This fire is four miles southeast of Timbo, AR in timber. No new information was reported. This will be the last report unless new information is received.

OUTLOOK:

Red Flag Warning: Central and northeast New Mexico and northwest Texas for strong winds and low humidity.

Fire Weather Watch: For southern Texas and northeast Florida. Southern New Mexico and southwest Texas for strong winds and low humidity.

Weather Discussion: A low pressure system moving through the West will produce dry, windy weather in eastern New Mexico, southeast Colorado, west Texas, Kansas and western Oklahoma. In the East, high pressure will continue to bring dry weather to a large area stretching from West Virginia southward to Florida.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern Area Northeast NC: Partly Cloudy Friday. (thunderstorms return Saturday). Northern VA: Mostly cloudy with a 40% chance for thunderstorm.	Lower 80s. Lower 70s.	30 to 40%. 45 to 55%.	Southwest 10 to 15 mph Southwest 8 to 14 mph.
Southwest Area Very windy and dry eastern New Mexico and west Texas. Partly cloudy with a few rain and higher elevation snow showers northern New Mexico into northeast Arizona. Fair and dry with winds slowly diminishing across the remainder of New Mexico and Arizona.	60 to near 80 lower elevations and 40 to 60 across the higher elevations of the Southwest Area.	8% to 20% across the lower elevations and 20 to 40% across the higher elevations of the Southwest Area.	West 20 to 40 mph and gusty New Mexico and west Texas. Westerly 10 to 20 mph across Arizona.
Eastern Area Partly to mostly sunny over the central and eastern Mid to Atlantic states. Mostly cloudy with a good chance of showers and thunderstorms across the Big Rivers and southwestern Great Lakes. Some of the storms may be severe over the Big Rivers, especially across western Iowa and Missouri.	50 to 60 over the southern Great Lakes, 60 to 70 across the northern Big Rivers, 70 to 80 across the southern Big Rivers. 63 to 73 across the southwestern Mid to Atlantic states.	35 to 45% across northern Minnesota. 27 to 37% over the Mid to Atlantic states. 28 to 38% over southern Illinois and Indiana as well as the Mid to Atlantic states.	East to southeast wind at 15 to 25 mph across southern Minnesota, Wisconsin, Iowa, and northern Illinois. South to southwest winds at 15 to 25 mph over Missouri, and southern Illinois.
Southern California Area Partly cloudy.	45 to 60 mountains. 60 to 70 valleys. 60 to 70 upper deserts. 70 to 80 lower deserts.	35 to 50%.	Variable 5 to 15 mph.
Northern Rockies Area No information Reported.			
Rocky Mountain Area No information Reported.

INITIAL ATTACK FIRE SIZEUP/SAFETY

Having a good sizeup is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting.

Use the following reporting factors for sizeup. Discuss others that may be used.

- Fire name and location
- Terrain (slope, aspect, elevation) and position of fire on the slope
- Size of fire
- Fuel type, anticipated control problems, and spread potential
- Values threatened
- Weather conditions (wind speed and direction)
- Fire behavior
- Resources on the fire and those needed
- Estimated containment and control times
- Cause (known, suspected, under investigation)

After your initial sizeup of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.

- Have you sized up the fire and relayed the information to dispatch?
- Is the observed fire weather consistent with the forecast?
- Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?
- Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?
- Are lookouts in place or can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed?
- Do you have a complete list of what resources have been ordered for the fire?
- Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?
