

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, APRIL 13, 2006 0800 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was heavy nationally with 331 new fires reported. Three new large fires (*) were reported, two in the Southern Area and one in the Southwest Area. Nine large fires were contained in the Southern Area. Very high to extreme fire indices were reported in Colorado, Illinois, Indiana, Kansas, Missouri, and Ohio.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

FLATSIDE, Ouachita National Forest. A Type 1 Incident Management Team (Custer) is assigned. This fire is in Garland County, AR in mixed hardwood and pine. The fire is located within the Flatside Wilderness Area. Steep terrain and difficult access are hampering containment efforts. Heavy mortality of oak in patches up to five acres has added to the fuel loading. Backing and flanking fire with two foot flame lengths was reported. Burn out operations were successful.

WEST TEXAS IA, Texas Forest Service. A Texas State Type 2 Incident Management Team (Hanneman) is assigned in Midland, TX. The Team is assisting local jurisdictions with managing initial and extended attack fires within the 140 million acre fire management response area. The Team is also managing the Mobeetie North, Mobeetie South, and Canadian North fires. Acres, structure losses and costs represent cumulative fire activity for the response area.

STEELFIELD COMMAND, Florida Division of Forestry. This fire started on private land northwest of Panama City, FL in timber. Reduction in acreage is due to more accurate mapping. No further information was received.

BEAVER S BLUFF, Oklahoma Division of Forestry. This fire started on private land one mile north of Chewey, OK in hardwood litter. No new information was reported.

UNDERWOOD, Wewoka Agency, Bureau of Indian Affairs. This fire is four miles west of Cromwell, OK in timber. No new information was reported. This will be the last report unless new information is received.

EASTERN AREA INCIDENTS/LARGE FIRES:

TRAIL, Minnesota Department of Natural Resources. This fire started on private land one mile north of Trail, MN in grass, brush and aspen. No new information was reported.

WHITE OAK, Missouri Department of Conservation. The fire started on Department of Defense land ten miles east of Clinton, MO in hardwood litter. Remote location and difficult terrain are hampering containment efforts. Structures remain threatened. Extreme fire behavior was reported along White Oak Creek.

OUTLOOK:

Red Flag Warnings: Across the central Florida panhandle and the Big Bend for marginal durations of minimum humidities near the 35% threshold. No threshold relative humidity criteria was reported by RAWS yesterday. Dew points continue to increase.

Fire Weather Watch: For eastern Colorado, and central Nebraska for increasing winds and low relative humidity.

Weather Discussion: A low pressure trough off the California coast will bring increasing winds to the Southwest, Southern Plains and east slopes of the Rockies. The Southeast and Mid-Atlantic states will be warm and dry while the Great Lakes and Northeast expect scattered showers.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern Area West-Central Arkansas: Partly cloudy Central FL: Partly cloudy with showers	Near 85. Near 85.	Upper 40%. Mid-upper 30%.	Southwest to 10 mph. Northeast to 15 mph.
Southwest Area Partly cloudy, warm and dry with afternoon breezes. A few dry thunderstorms across central and southern New Mexico. Isolated wet thunderstorms across west Texas.	75 to 95 lower elevations and 55 to 75 higher elevations.	5 to 20%.	Southwest 15 to 25 mph across portions of northeast New Mexico and northwest Texas. South to southwest 10 to 20 mph across the remainder of the Southwest Area.
Rocky Mountain Area Partly sunny, dry and breezy.	Mid 70s to mid 80s in lower elevations of Colorado, Kansas Nebraska and southeast Wyoming. 50s in the mountains. 50s and 60s lower elevations of Wyoming.	10 to 20% eastern and extreme southwest Colorado and western Kansas. 25 to 35% elsewhere.	West to southwest winds 15 to 25 mph with higher gusts.
Eastern Area Mostly cloudy with a chance of showers and storms over the Northeast. Increasing clouds over the Great Lakes with isolated showers or thunderstorms. Fair weather elsewhere.	52 to 62 across the northern parts of the Great Lakes and Northeast. 80 to 90 over Missouri, southern Iowa, and western Illinois. 65 to 75 elsewhere.	30 to 40% across Missouri, Iowa, Illinois and Indiana. 40 to 50% northern Great Lakes and Northeast. 35 to 45% elsewhere.	South 14 to 24 mph becoming southwest to west across the eastern Northeast states. Southwest to west 10 to 20 mph over the western Northeast and Mid-Atlantic states. Southwest winds increasing to 12 to 22 mph over Missouri, Illinois, Indiana, Michigan and Wisconsin during the afternoon. South to southeast at 10 to 20 mph over Minnesota.
Southern California A few showers North Central California and along the immediate Central Coast. Partly cloudy elsewhere.	55 to 70 mountains. 70 to 85 valleys. 70 to 80 upper deserts. 88 to 95 lower deserts.	20 to 35%.	Southeast to southwest 10 to 20 mph with higher gusts.

MANAGING VEHICLE TRAFFIC IN SMOKE

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.

Identification of important, public roads that may be impacted by smoke

Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.

Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area

Identification of alternative traffic routes as part of the incident/project traffic plan

Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice

When potential smoke-related problems are identified:

- Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
- Notify local law enforcement units and highway departments of a potential problem.
- Implement preplanned actions such as posting smoke warning signs.
- Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
