### OUTLOOK:

**Red Flag Warning:** For southeast Kansas and southwest Missouri for winds and low relative humidity.

**Weather Discussion:** Dry conditions extend from southern California, across the Southwest, and into southeastern Colorado and portions of the southern Plains. Breezy winds extending from northeastern New Mexico to southwestern Missouri will elevate fire potential slightly. Dry conditions will develop over portions of Georgia and northern Florida today as high pressure builds in from the north. Warming conditions will develop in the West and rain will move across the Gulf Coast states this weekend.
