

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JANUARY 3, 2006 0530 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 10 new fires reported. Six new large fires were reported, five in the Southern Area and one in the Southwest Area. Three large fires were contained, two in the Southern Area and one in the Southwest Area. Very high to extreme fire indices were reported in Texas.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

NORTH CENTRAL TEXAS IA, Texas Forest Service. A Unified Command between a Type 1 Incident Management Team (Quesinberry) and a Type 2 Incident Commander (Hannemann), representing the state of Texas, is in place in Granbury, TX. The Unified Command will assist local resources in managing existing fires and initial attack within the established 220,000 square mile response area in Texas. A Type 1 Incident Management Team (Custer) has been ordered. A Type 2 Incident Management Team (Hill) has been ordered. Significant fires include Ringgold, Huckabay, Carbon, Cole, Airport, Hardwick, Rocker and Santa Anna. Figures in the table represent cumulative fire activity to date for the response area.

EAST TEXAS IA, Texas Forest Service. A Texas State Type 2 Incident Management Team (Rose) is assigned to assist local dispatch zones in managing existing fires and initial attack in east Texas. Figures in the table represent cumulative fire activity to date for the response area.

SHAMROCK, Okmulgee Field Office, Bureau of Indian Affairs. This fire is five miles south of Drumright, OK in grass and timber. Three residences and two outbuildings were destroyed. Highway 16 was temporarily closed. Evacuations of portions of Drumright occurred. Structure protection is in place. High winds produced extreme fire behavior.

GOAT HILL, Oklahoma Division of Forestry. This fire is four miles northeast of Counts, OK in brush. Four outbuildings are threatened. No further information was received.

MOLLYCOWEE WARREN, Tensas River National Wildlife Refuge. This fire is 7 miles west of Tallulah, LA in grass. No further information was received.

SHERWOOD FOREST, Wewoka Agency, Bureau of Indian Affairs. This fire, previously named Sherwood, is five miles south of Wewoka, OK in grass and timber. Two outbuildings were destroyed. No further information was received.

ACHILLE, Oklahoma Division of Forestry. This fire is nine miles south of Durant, OK in grass. Six residences have been destroyed. No new information was reported.

LITTLE RIVER 2, Wewoka Agency, Bureau of Indian Affairs. This fire is seven miles west of Wewoka, OK in grass understory and timber. No new information was reported.

DUCK HEAD, Buffalo National River, National Park Service. This fire is near Cozahome, AR in a designated wilderness area. No new information was reported.

WILLIS, Chickasaw Agency, Bureau of Indian Affairs. This fire is 20 miles south of Madill, OK in timber and grass. No new information was reported.

RUN #1 2006, Okmulgee Field Office, Bureau of Indian Affairs. This fire is two miles south of Holdenville, OK in grass and timber. No new information was reported.

DIXON RANCH, Chickasaw Agency, Bureau of Indian Affairs. This fire is 10 miles southeast of Ada, OK in grass and timber. No new information was reported.

PINE SPRINGS, Oklahoma Division of Forestry. This fire is ten miles north of Centerpoint, OK in grass and understory. No new information was reported. This will be the last report unless new information is received.

WESTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

05/06 FLOOD, Nevada Division of Forestry - Western Region. A State Type 2 Incident Management Team (Dondero) is assigned. The team is assisting with flood control and recovery efforts in Washoe, Carson City, Douglas, Lyon and Storey Counties. Numerous residences and commercial property remain threatened by continuing rain.

OUTLOOK:

Weather Discussion: A low pressure system moving through the central US will bring another round of gusty winds and low relative humidity to New Mexico, Texas, as well as the southern portions of Kansas and Missouri. A new storm system will move onshore into northern California and Oregon.

SAFENET

SAFENET is a form, and process, that provides a method for reporting unsafe situations on, or off, the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

- Discuss the methods for filing a SAFENET.
 - Electronically (Access site through NIFC web site)
 - By hardcopy (self-addressed, stamped forms available through the cache system).
 - By phone (1-800-670-3938)
- Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.
 - Increase the chances of finding an immediate solution.
 - Keeps supervisor "in the loop."
- Discuss using SAFENET in situations other than fire.
 - Prescribed fire
 - All-risk
 - Training
- Where does a SAFENET go, and what response can you expect?
 - SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. It is then given a document number and posted to the web.
 - Every new SAFENET is then forwarded to the affected agencies designated list of contacts, which usually includes the National or Regional Safety Officer.
 - It is each agency's responsibility to insure that corrective actions are taken.
- Corrective actions can be filed by anyone at any time. They are automatically attached to the individual SAFENET on the database.
- Discuss using SAFENET to monitor safety issues other firefighters may be having.
