

**INCIDENT MANAGEMENT SITUATION REPORT**  
**TUESDAY, JANUARY 10, 2006 0530 MST**  
**NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 295 new fires reported. Five new large fires were reported, three in the Southern Area, and one each in the Rocky Mountain and Eastern Areas. Eight large fires were contained, six in the Southern Area, and one each in the Rocky Mountain and Eastern Areas. Very high to extreme fire indices were reported in Kansas, Nebraska, South Dakota and Texas.

**SOUTHERN AREA INCIDENTS/LARGE FIRES:**

NORTH CENTRAL TEXAS IA, Texas Forest Service. A Unified Command between two Type 1 Incident Management Teams (Quesinberry and Custer), a Florida State Type 2 Incident Management Team (Hill), and a Texas State Type 2 Incident Commander (Hannemann), representing the state of Texas, are in place in Granbury and Abilene, TX. The Unified Command is assisting local jurisdictions in managing existing fires and initial attack within the 220,000 square mile West Zone fire management response area. Six new fires were suppressed yesterday for a total of 100 acres. Figures in the table represent cumulative fire activity to date for the response area.

EAST TEXAS IA, Texas Forest Service. A Texas State Type 2 Incident Management Team (Rose) is assigned to assist local dispatch zones in managing existing fires and initial attack in east Texas. Five new fires were suppressed yesterday for 439 acres. Figures in the table represent cumulative fire activity to date for this response area.

MCNALLY FLAT, Oklahoma Division of Forestry. This fire is seven miles north of Featherston, OK in grass. Spotting ahead of the fire was reported. No further information was received.

HATSTACK CREEK, Oklahoma Division of Forestry. This fire, formerly named Haystack Creek, is 12 miles south of Sayre, OK in grass. No further information was received.

HENRYETTA, Oklahoma Division of Forestry. This fire is five miles southeast of Henryetta, OK in timber and grass understory. Evacuation contingency plans are in place. Indian burial grounds, structures, a communications tower and recreation site are threatened.

SOUTH PERRY, Oklahoma Division of Forestry. This fire is three miles west of Orlando, OK in grass and timber. No new information was reported.

PUMKIN CENTER, Oklahoma Division of Forestry. This fire is three miles northeast of Braggs, OK in grass. Brush piles continue to burn within the perimeter. Acreage increase is due to better mapping.

MULHALL, Oklahoma Division of Forestry. This fire is one mile north of Mulhall, OK in timber understory and grass. No new information was reported.

ROUND PRAIRIE, Texas Forest Service. This fire started on private land is 10 miles northwest of Huntsville, TX in pine plantation. Group torching and running were observed. Structure protection is in place for threatened residences.

STILLWATER 1, Oklahoma Division of Forestry. This fire is seven miles northwest of Perkins, OK in Eastern Red Cedar and grass. No new information was reported. This will be the last report unless new information is received.

INDIAN SPRINGS, Oklahoma Division of Forestry. This fire is 15 miles northwest of Guthrie, OK in grass and brush. No new information was reported. This will be the last report unless new information is received.

## OUTLOOK:

**Weather Discussion:** Cool weather will cover much of the Southern Plains today in the wake of a frontal system moving through the Mississippi River Valley. In Colorado, winds will be increasing over the Rockies and along the Front Range as a strong westerly flow develops over the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southern Area</b> Front passes across Oklahoma and Texas for rain and snow in eastern Oklahoma. Some rain possible in extreme east Texas.	Oklahoma: low to mid-fifties central; colder, 30 to 40s in east. Texas: mid-fifties to low 60s.	Oklahoma: 27 to 50% central, to 60% eastern portion. Texas: 25 to 35%.	Mainly west to northwest at 7 to 12 mph.
<b>Rocky Mountain Area</b> Southern and eastern Colorado: Partly cloudy.	50s, with 30s in the mountains.	10 to 20%.	West 8 to 18 mph with gusts to 25 mph in the lower elevations, with 10 to 20 mph and gusts to 35 mph in the foothills.
<b>Southern California</b> Areas of morning low clouds and fog, otherwise partly to mostly sunny.	45 to 60 mountains. 65 to 75 valleys. 55 to 65 upper deserts. 65 to 75 lower deserts.	15 to 30%.	Variable 5 to 15 mph.

## **SAFETY ZONES**

A safety zone is a location where the threatened firefighter can find adequate refuge from an approaching fire.

● What is the difference between a safety zone and a deployment site?

- The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.

● How do you identify a good safety zone?

- Consider the distance from the escaped fire as well as topography, winds, fire behavior, and fuels in the area.
- The best locations are usually "in the black;" those with a minimum of, or devoid of, ground/aerial vegetation; or large bodies of water.
- Size is sufficient for all present resources with a minimum distance from fire of at least four times the maximum flame length.
- Location is scouted and marked well for visibility at all times.
- Location has been reassessed in relation to line work progress, fatigue, changes in fire behavior, and arrival of additional resources.
