

**INCIDENT MANAGEMENT SITUATION REPORT**  
**SUNDAY, JUNE 25, 2006 – 0800 MDT**  
**NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 85 new fires reported. Six new large fires (\*) were reported, two each in the Western Great Basin and Rocky Mountain Areas and one each in the Northern California and Southwest Areas. One large fire was contained in the Western Great Basin Area. Very high to extreme fire indices were reported in Arizona, California, Montana, Utah, Colorado, New Mexico, Nevada, Texas and Wyoming.

**SOUTHWEST AREA INCIDENTS/LARGE FIRES:**

An Area Command Team (Loach) is assigned to manage the Reserve, Skates, and Bear fires on the Gila National Forest.

BRINS, Coconino National Forest. A Type 1 Incident Management Team (Broyles) is assigned. This fire is two miles northeast of Sedona, AZ in brush, chaparral and timber. Numerous residences, structures, commercial resources, endangered species, the Oak Creek watershed and Scenic Highway remain threatened. Evacuation orders for 75 homes were lifted and the northern portion of highway 89A was reopened to residents. Backing, short range spotting, single tree torching and short runs were observed. Burn out operations are planned.

BEAR, Gila National Forest. A Type 1 Incident Management Team (Dietrich) is assigned. This fire is 15 miles northeast of Glenwood, NM in mixed conifer. Numerous residences, wildlife habitat and historical cabins remain threatened. Portions of the fire received precipitation which enabled crews to make good progress in line construction. The southwest corner of the fire remains very active. Isolated and group torching was observed in Willow Creek.

WARM, Kaibab National Forest. A Fire Use Management Team (Hahnenburg) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. Due to the increased complexity of this incident a Type 2 Incident Management Team (Reinarz) has been ordered. The fire is burning three miles south of Jacob Lake, AZ in ponderosa pine and hardwood litter. The Jacob Lake development area, administrative sites, a historical Ranger Station and private & public campgrounds remain threatened. Highway 89A is closed from Jacob Lake east to the Kaibab National Forest boundary and Arizona highway 67 is also closed from Jacob Lake to the Forest boundary. The fire behavior was plume dominated with rapid rates of spread.

RIVERA MESA, Las Vegas District, New Mexico State Forestry. A Type 2 Incident Management Team (Lineback) is assigned. This fire is five miles northeast of Ocate, NM in timber, grass and scrub oak. County Road 21 remains closed. Aerial ignition was completed on 3000 acres of unburned islands within the perimeter. Moderate fire behavior with group torching and short runs was reported.

SKATES, Gila National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This fire is 12 miles northeast of Silver City, NM in timber. Smoldering and creeping fire behavior were observed.

RESERVE COMPLEX, Gila National Forest. A Type 2 Incident Management Team (Lund) is assigned. This complex, comprised of the Wilson and Martinez fires, is located near Reserve, NM in ponderosa pine, pinyon pine, juniper and grass. The fire received wetting rain which moderated fire behavior to smoldering and creeping.

BEAR PAW, Sante Fe National Forest. A Type 2 Incident Management Team (Raley) has been ordered. This fire started on state land two and a half miles northeast of Regina, NM in ponderosa pine and litter. Voluntary evacuations for Bear Paw and Cuba, NM are in effect. Numerous residences, 345 kilovolt powerlines and the community of Bear Paw are threatened. Extreme fire behavior with group torching, short crown runs and spotting up to a half mile was reported.

EICKS DRAW, Socorro District, New Mexico State Forestry. This fire is 35 miles south of Animas, NM in grass, juniper and mixed conifer. Steep rocky terrain is hampering containment efforts. Fire access roads were impassible due to muddy conditions. The fire activity was minimal after receiving some precipitation.

BARTLETT, Cimarron District, New Mexico State Forestry. This fire is five miles north of Raton, NM in ponderosa pine, pinyon pine, juniper and grass. Erratic winds and rugged terrain are hampering containment efforts. The Raton watershed is threatened. Smoldering fire behavior was observed.

BEAVERHEAD, Apache-Sitgreaves National Forest. This fire is 15 miles south of Alpine, AZ in timber. No new information was reported. This will be the last report unless new information is received.

POTATO COMPLEX, Apache-Sitgreaves National Forest. This complex is ten miles northwest of Heber-Overgaard, AZ in pinyon pine, juniper and grass. No new information was reported. This will be the last report unless new information is received.

NAVAJO MOUNTAIN 1, Navajo Regional Office, Bureau of Indian Affairs. This fire is northeast of Page, AZ in timber. No new information was reported. This will be the last report unless new information is received.

## ROCKY MOUNTAIN AREA INCIDENTS/LARGE FIRES:

COOLBROTH, Rio Grande National Forest. A Type 2 Incident Management Team has been ordered. This fire is 13 miles north of Del Norte, CO in timber and grass. Numerous structures are threatened and an evacuation order is in place. Significant amounts of insect and disease killed trees are contributing to rapid rates of spread.

MATO VEGA, Costilla County. A Type 2 Incident Management Team (Blume) is assigned. This fire is 12 miles northeast of Fort Garland, CO in timber, logging slash and grass. Numerous residences, an FAA communication site and commercial resources remain threatened. Evacuation orders are in place. Highway 160 is open to traffic via pilot car with delays. The fire spread to the north with creeping and smoldering reported.

ISABELLE, Southern Medicine Bow National Forest. A Type 2 Incident Management Team (Mullenix) is assigned. This fire is 25 miles southwest of Laramie, WY in timber, sage and grass. Numerous residences and other structures remain threatened. Poor access continues to hamper containment efforts. Road and area closures remain in effect. Smoldering, creeping and occasional single tree torching were reported.

JOLLY MESA, Glenwood Springs Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Reid) is assigned. This fire is four miles southeast of Silt, CO in pinyon pine, juniper and grass. Numerous structures, natural gas lines, high voltage powerlines and Colorado State Wildlife Area are threatened. Minimal fire activity with interior burning and single tree torching was observed. Decrease in acreage is due to more accurate mapping.

LITTLE VENUS, Shoshone National Forest. A Fire Use Management Team (Weldon) has been ordered. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire is burning 30 miles west of Meeteetse, WY in timber. Structure protection is being established for one cabin. The fire received some precipitation which limited fire activity.

## WESTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

OLINGHOUSE, Western Region, Nevada Division of Forestry. This fire is 20 miles east of Reno, NV in grass and sagebrush. Isolated structures and secondary powerlines are threatened. High temperatures and low relative humidity contributed to active fire behavior. Short fire runs were reported in the flashy fuels.

### **EASTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:**

LION CREEK, Manti-Lasal National Forest. A transfer of command from a Type 2 Incident Management Team (Thomas) back to the local unit has occurred. This fire is five miles northwest of Paradox, CO in ponderosa pine, pinyon pine, brush and grass. Road closures have been lifted. Minimal fire behavior was reported.

POT HOLE, Northeast Area, Utah State Division of Forestry Fire and State Lands. This fire is 25 miles northeast of Vernal, UT in sagebrush, grass and timber. Pot Creek Road remains closed. Steep terrain is impeding containment efforts. Creeping, running and torching fire behavior was reported.

### **SOUTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:**

PERKINS, Los Padres National Forest. A Type 1 Incident Management Team (Feser) is assigned. This fire is south of Cuyama, CA in brush and grass. Limited access and rugged terrain continue to impede containment efforts. Closures for portions of the Los Padres National Forest remain in effect. Minimal fire activity with occasional interior flare-ups was observed.

### **SOUTHERN AREA INCIDENTS/LARGE FIRES:**

GLASS MOUNTAIN COMPLEX, Texas Forest Service. A Type 2 Incident Management Team (Hannemann) is assigned. This complex is 15 miles northwest of Marathon, TX in grass, brush and timber. Crews made good progress in line construction in areas with steep rugged terrain. Minimal fire activity was reported.

AIRBOAT, Everglades National Park. This fire is 15 miles northwest of Homestead, FL in saw grass. The fire will be monitored from the air while suppression action on the northern flank occurs. The fire made a significant run to the northeast, before receiving considerable precipitation.

SCOTTS FERRY, Florida Division of Forestry. This fire is 20 miles northeast of Panama City, FL in southern rough. No new information was reported.

DEERFLY, Florida Division of Forestry. This fire is 15 miles northwest of Coral Springs, FL in pine and grass. No new information was reported.

RENTIESVILLE, Oklahoma Division of Forestry. This fire started on private land three miles east of Rentiesville, OK in hardwood timber and litter. No new information was reported. This will be the last report unless new information is received.

#### ALASKA AREA INCIDENTS/LARGE FIRES:

PARKS HWY, Fairbanks Area Forestry, Alaska Division of Forestry. This fire is one mile southeast of Nenana, AK in black spruce, tundra and grass. Numerous residences, native allotments, recreational cabins, commercial property and utility infrastructure remain threatened. Fire behavior moderated due to decreased winds and higher humidity. Smoldering and isolated torching were reported.

## OUTLOOK:

**Weather Discussion:** A large high pressure ridge will bring continued high temperatures with much above normal temperatures to much of the West. Moisture in the West will increase from the south and east today with thunderstorm activity spreading in coverage. In Alaska, a warming and drying trend is expected.

| Geographic Area<br>Weather                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | High<br>Temperatures                                                                                                                                                                                                        | Minimum Relative<br>Humidity                                                                                                                                                                          | Wind                                                                                                                                                                                                                                     |
