

**INCIDENT MANAGEMENT SITUATION REPORT**  
**THURSDAY, JUNE 29, 2006 – 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was moderate nationally with 262 new fires reported. Twenty new large fires (\*) were reported, eight in the Northern California Area, five in the Northwest Area, four in the Western Great Basin Area and one each in the Rocky Mountain, Southern and Southern California Areas. Fourteen large fires were contained, three each in the Western Great Basin, Northern California and the Southwest Areas, two in the Rocky Mountain Area and one each in the Southern California, Eastern Great Basin and Southern Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Montana, Nebraska, North Dakota, Nevada, New Mexico, Oregon, South Dakota and Utah.

The National Interagency Fire Center has deployed two Modular Airborne Fire Fighting Systems (MAFFS) C-130 air tankers from the 145th Tactical Airlift Wing based in Charlotte, North Carolina. Mission Commander Lieutenant Colonel Mike Luckie, the air tankers and support personnel are based in Mesa, Arizona.

**NORTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:**

OBSERVATION COMPLEX, Northern California Resource Area, Bureau of Land Management. A Type 2 Incident Management Team (Kaage) is assigned. This Complex is 30 miles northeast of Susanville, CA in grass, sagebrush and juniper. Wildlife habitat and range areas remain threatened. Thunderstorms produced active fire behavior.

BOULDER COMPLEX, Plumas National Forest. This Complex is eight miles southwest of Susanville, CA in timber. Recreation sites remain closed. Several residences, commercial properties and out buildings remain threatened. Structure protection is in place. Thunderstorms produced high winds over the fire. Active fire behavior with torching and crowning was reported.

HAPPY COMPLEX, Modoc National Forest. A Type 2 Incident Management Team (Paul) is assigned. This Complex is three miles northwest of Adin, CA in logging slash. Critical infrastructure remains threatened. Active fire behavior with wind driven runs, torching and spotting up to a quarter mile was observed.

MILLER COMPLEX, Modoc National Forest. This Complex is in Modoc County, CA in timber and grass. Residences, powerlines, endangered species habitat and Highway 299 are threatened. Active fire behavior with wind driven runs and spotting was reported.

4-11, California Department of Forestry and Fire Protection (CDF), Lassen-Modoc Unit. This fire is east of Adin, CA in heavy timber. Favorable weather conditions allowed crews to make considerable progress.

BATTALION 3 LCA, California Department of Forestry and Fire Protection (CDF), Lassen-Modoc Unit. This fire is 15 miles west of Adin, CA in timber, brush and grass. The Timber Jacks Lake Area is potentially threatened. Remote access is hampering containment efforts.

3-9. California Department of Forestry and Fire Protection (CDF), Lassen-Modoc Unit. This fire is southwest of Adin, CA in juniper, sagebrush and grass. Rocky and inaccessible terrain is hampering containment efforts.

PLUMAS LIGHTNING, Plumas National Forest. This fire is in Plumas County, CA in timber. Several residences and outbuildings are threatened. Residents have been evacuated. High winds from thunderstorms are hampering containment efforts.

S-5, Northern California Resource Area, Bureau of Land Management. This fire is 16 miles south of Eagleville, CA in sagebrush and grass. Smoldering fire behavior was reported.

#### WESTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

SIERRA TAHOE COMPLEX, Carson City Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Muir) is assigned. This complex, consisting of the Balls Canyon, Palimino, Oregon, Linehan, Olinghouse, Copper Mountain and Virginia fires, is ten miles northwest of Reno, NV in grass, sagebrush, pinyon pine and juniper. Several structures, communications towers, and power lines are threatened. Structure protection is in place. Favorable weather conditions moderated fire behavior. Limited torching and isolated crown fire were reported.

SUZIE, Elko Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Stanich) is assigned. This fire is three miles northeast of Carlin, NV in grass and sagebrush. Smoke and visibility are causing concerns for the city of Elko and motorists on Interstate 80. Active fire behavior was reported on all fronts, with running and spotting observed. The fire was spreading primarily to the northeast and backing towards Interstate 80. The significant increase in acreage is due to more accurate mapping.

SNEEKEE, Elko Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Berndt) is assigned. This fire is 20 miles southwest of Spring Creek, NV in grass, pinyon pine and juniper. Rough terrain and difficult access are hampering containment efforts. Passing thunderstorms are a concern. Moderate fire behavior with short runs and spotting was reported.

ELBURZ 1, Nevada Division of Forestry, Northern Region. This fire is 17 miles east of Elko, NV in grass and sagebrush. No new information was reported.

NORTH ANTELOPE, Elko Field Office, Bureau of Land Management. This fire is 15 miles southeast of Midas, NV in grass and sagebrush. Cattle grazing allotments and wildlife habitat are threatened. Passing thunderstorms resulted in wind driven fire runs and extreme fire behavior.

SHERWOOD, Ely Field Office, Bureau of Land Management. This fire is 15 miles north of Adaven, NV in grass and sagebrush. Erratic winds continue to make containment difficult. Interior torching was observed.

VEGAS, Desert National Wildlife Refuge. This fire is 50 miles northeast of Las Vegas, NV in grass and brush. The fire is actively burning on all fronts.

POITO, Winnemucca Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Garwood) will assume command today. This fire is 20 miles southwest of Gerlach, NV in grass and brush. Highway 447 was temporarily closed. Very active fire behavior was reported.

MM 168, Winnemucca Field Office, Bureau of Land Management. This fire is eight miles west of Winnemucca, NV in grass and brush. Interstate 80 was temporarily closed. Residences and commercial property are threatened. Strong winds hampered containment efforts. Very active fire behavior with spotting and running was observed.

## **SOUTHWEST AREA INCIDENTS/LARGE FIRES:**

An Area Command Team (Loach) is assigned to manage the Reserve, Skates and Bear fires on the Gila National Forest.

WARM, Kaibab National Forest. A Type 2 Incident Management Team (Reinarz) is assigned. This fire is three miles south of Jacob Lake, AZ in ponderosa pine and hardwood litter. Highway 67 from Jacob Lake to the North Rim of the Grand Canyon remains closed to the public. The Jacob Lake development area, administrative sites, a historical Ranger Station and private and public campgrounds remain threatened. Steep terrain is hindering containment efforts. High relative humidity and some precipitation moderated fire behavior, with low intensity ground fire reported.

BEAR, Gila National Forest. A Type 1 Incident Management Team (Dietrich) is assigned. This fire is 15 miles northeast of Glenwood, NM in mixed conifer. Numerous residences, wildlife habitat and historical cabins remain threatened. Evacuation order for Willow Creek subdivision remains in effect. The fire received widespread precipitation. Smoldering was reported.

BEAR PAW, Santa Fe National Forest. A Type 2 Incident Management Team (Raley) is assigned. This fire started on State land three miles northeast of Regina, NM in ponderosa pine and litter. High winds from passing thunderstorms are a concern. Smoldering was reported.

HOSPITAL, San Carlos Agency, Bureau of Indian Affairs. This fire is 20 miles northeast of San Carlos, AZ in grass, juniper and timber. Difficult access, steep terrain and high winds continue to hamper containment efforts. Moderate fire behavior was reported.

COF – Coconino National Forest

FAD – Farmington Field Office, Bureau of Land Management

## **EASTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:**

KOLOB, Zion National Park. A Type 2 Incident Management Team (Brunner) is assigned. This fire is five miles north of Virgin, UT in pinyon pine, juniper and mixed brush. All trails in Zion National Park west of the Virgin River are closed and the Kolob Terrace Road is closed south of Kolob Reservoir, to Highway 9. Limited access into remote areas continues to impede containment efforts. Isolated torching and interior creeping were reported.

JARVIS, Southwest Area, Utah State Division of Forestry Fire and State Lands. A Type 2 Incident Management Team (Thomas) is assigned. This fire is 11 miles southwest of St. George, UT in pinyon pine, juniper and mixed brush. Burn out operations continue. Short runs, spotting and smoldering were reported.

JUNIPER BUTTE, Twin Falls District, Bureau of Land Management. This fire started on military land in Elmore County, ID in sagebrush and grass. No new information was reported.

SLD - Salt Lake Field Office, Bureau of Land Management

### NORTHWEST AREA INCIDENTS/LARGE FIRES:

THOUSAND VIRGIN, Burns District, Bureau of Land Management. This fire is 9 miles southwest of Fields, OR in sagebrush and grass. Torching and short, wind driven runs were reported.

JERRY WELLS, Vale District, Bureau of Land Management. This fire is 30 miles south of Burns Junction, OR in grass and brush. No further information was recieved.

STEMLER RIDGE, Vale District, Bureau of Land Management. This fire is four miles northeast of Juntura, OR. Steep, rugged terrain is hampering containment efforts. Moderate fire behavior with wind driven runs was reported.

ROCK CREEK, Burns District, Bureau of Land Management. This fire is 16 miles southwest of Frenchglen, OR in grass and sagebrush. Wind driven runs were reported.

RED MOUNTAIN, Burns District, Bureau of Land Management. This fire is two miles north of Fields, OR in grass and sagebrush. Residences and wildlife habitat are threatened. Active fire behavior through the night was reported.

TROUT, Southeast State, Washington Department of Natural Resources. This fire is 15 miles west of Naches, WA in grass, brush and timber. Powerlines are threatened. Steep terrain and poor access are making containment difficult. Creeping and smoldering were reported.

## SOUTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

GOODALE, California Department of Forestry and Fire Protection (CDF), San Bernardino Unit. This fire is 11 miles north of Independence, CA in chaparral. A power plant remains threatened. Limited access due to difficult terrain are hampering containment efforts. The fire received wetting rain which moderated fire behavior.

SMITH, Sequoia National Forest. A Type 2 Incident Management Team (Smith) is assigned. The fire is burning in the Kiavah Wilderness Area six miles southeast of Onyx, CA in grass, pinyon pine and juniper. Limited access and steep, rugged terrain are hampering containment efforts. Rapid rates of spread, torching and spotting were observed.

## DRIVING SAFETY

Driving is one of the most hazardous tasks that we perform when assigned to fires. Because of the fact that we perform the task literally hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause. Vehicle operators need to recognize their own poor driving habits and strive to develop proper defensive driving techniques.

- A good starting point is attitude. A positive attitude towards improving your defensive driving skills will help you achieve the necessary changes in your driving habits. Most of what you do in operating vehicles is performed from habit. You do not consciously think about every thing you do when you drive. Rather, your subconscious performs most techniques. It's important to remember that a bad habit is as easy to develop as a good one. Take a good, hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?

- Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Because driving is such a common component of our lives, it is difficult to realize that it requires 100% of our attention. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on the task at hand, operating a motor vehicle safely. There are many forms of inattentive driving; fatigue, telematics, daydreaming, eating, drinking, reading, writing, and talking. Here are some techniques for maintaining your attention while driving.

Drive only when you are well rested and alert; avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10 to 15 minute break after every 2 hours of driving.

Practice situational awareness when driving; be aware of what is happening in front, behind, and on both sides of your vehicle. Never drive when taking medications that make you drowsy.

Avoid using cell phones, radios, GPS units, CD players or computers while driving. Have a passenger operate them, or pull off the road and park.

By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.

Avoid eating or drinking while driving. Take frequent breaks to perform these activities.

Do not attempt to read maps or write directions while driving pull over and park.

When talking with passengers, keep your eyes on the road and both hands on the steering wheel.

Keep conversations causal and limited to small talk. Avoid conversations of a serious or technical nature. Do not engage in confrontational or argumentative conversations.

Do not be in a hurry, be patient. The more impatient you are, the more agitated you can become.

Agitation will only magnify other inattentive driving behaviors.

- Safe driving starts with a safe vehicle. While mechanical failure is rarely a contributing factor in motor vehicle accidents something as simple as under inflated tires can have serious consequences. Before operating any vehicle, you must be sure the vehicle is in safe operating condition. Not only should you perform a pre-operation inspection, some vehicle defects can only be detected while the vehicle is operating. The vehicle operator is also responsible pre-operation, during operation, and post-operation inspections.
