

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, MARCH 27, 2006 0800 MST
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally with 34 new fires reported. Three large fires were reported, two in the Southern Area and one in the Southwest Area. Very high to extreme fire indices were reported in Arizona, Arkansas and Florida.

MAFFS Mission Commander Lieutenant Colonel Jeff Perryman, two MAFFS C-130 air tankers and support personnel from the 145th Tactical Airlift Wing have repositioned to Charlotte North Carolina on 48-hour availability.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

WEST TEXAS IA, Texas Forest Service. A Texas State Type 2 Incident Management Team (Hanneman) and a Minnesota Interagency Type 2 Incident Management Team (Hinds) are assigned in Midland, TX. The Teams are assisting local jurisdictions with managing initial and extended attack fires within the 140 million acre fire management response area. Acres, structure losses and costs represent cumulative fire activity for the response area.

SYCAMORE SPRINGS, Oklahoma Division of Forestry. This fire started on private land seven miles southeast of Locust Grove, OK in timber. Strong winds increased the fire activity. Extreme fire behavior along the ridges was observed.

WEST 311, Okmulgee Agency, Bureau of Indian Affairs. This fire is two miles east of Gypsy, OK in grass. Extreme fire behavior was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
WEST TEXAS IA	TX	TXS	3,843	NR	UNK	312	0	16	5	0	7.3M	N/A

WEST 311	OK	OMA	550	90	3/27	0	0	4	0	0	18K	BIA

SOUTHWEST AREA INCIDENTS/LARGE FIRES:

BURRO, Coronado National Forest. A Type 2 Incident Management Team has been ordered. This fire is 34 miles north of Douglas, AZ in timber. Structures in Cave Creek Canyon and threatened and endangered species habitat are threatened. Steep terrain, limited access, and heavy fuels are hampering containment efforts.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
BURRO	AZ	CNF	350	0	UNK	98	6	0	3	0	35K	FS

OUTLOOK:

Weather Discussion: Dry weather and low humidity is again on tap for the Southeast as high pressure blankets the region. High pressure will also prevail over the Southwest.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southwest Area Mostly cloudy, much less windy and not as dry across Arizona, New Mexico and west Texas. Isolated light rain or higher elevation snow showers across Arizona and western New Mexico.	60 to 80 lower elevations of Arizona, New Mexico and west Texas. 40 to 60 across the higher elevations.	15 to 25% lower elevations of Arizona, New Mexico and much of west Texas. 25 to 40% higher elevations and parts of west Texas.	South to southwest 10 to 20 mph across Arizona and western New Mexico. South to east 10 to 20 mph across eastern New Mexico and west Texas.
Southern Area No information was reported.

NFDRS POCKET CARDS

An aid to identifying local fuels conditions that might contribute to severe fire behavior is the NFDRS Pocket Card. The Pocket Card displays a general assessment of the fire potential compared to local fire occurrence and historical fire danger. It is a tool that can be used to track daily outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season for a local area.

The Pocket Card provides:

- A general indicator of the potential for extreme fire behavior and difficulty of control.
- A graph to show the trend and status of the current year's fire season.
- A comparison of current year's conditions to historical worst and average conditions.
- Fire danger values related to past large fires.
- Locally significant values for temperature, humidity, wind speed, and more.

Discuss the following ways to use the Pocket Card:

- Use it primarily before fires occur, before arriving to a fire, and during initial stages of fire events, such as initial fire size-up, initial attack, and extended attack.
- Use the Pocket Card to track local fire danger and in so doing increase the safety of your firefighters through increased awareness of fire danger conditions. NOTE: If fire danger is running at or above seasonal highs, be alert to those weather conditions that can lead to extreme fire behavior; e.g., low RH, 1-hour fuel moisture less than 5%, high temperatures, moderate to high winds.
- Use it to track daily fire dangers so that there are no surprises when extreme fire behavior occurs.
- Use it to supplement local experience.
- Use the Pocket Card as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive your fire assignment outside your local area, visit the National Pocket Card website at <http://famweb.nwcg.gov/pocketcards/>. Click on the map and locate a Pocket Card for the area to which you are going.
- Put the Card in the Pocket of all your firefighters and keep a copy in your fire vehicle.
- Post the card in dispatch. Use them in briefings. Provide them to incoming crews.
- Do not use the Pocket Card for site specific fire behavior predictions and fireline actions.
