

**INCIDENT MANAGEMENT SITUATION REPORT  
MONDAY, MAY 15, 2006 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 25 new fires reported. One new large fire (\*) was reported in the Southern Area. One large fire was contained in the Southern California Area. Very high to extreme fire indices were reported in Arizona, Oklahoma, New Mexico and Texas.

**SOUTHERN AREA INCIDENTS/LARGE FIRES:**

BARR LITE, Texas Forest Service. This fire is 25 miles south of Marfa, TX in grass. Minimal fire activity was reported.

RASELY ROAD, Florida Division of Forestry. A Type 2 Incident Management Team (Beauchamp) is assigned. The team is also managing the WF New Smyrna 44/95 fire. No new information was reported. This will be the last report unless new information is received.

ARECA, Florida Division of Forestry. This fire started on private land six miles northwest of Sharpes, FL in southern rough. No new information was reported. This will be the last report unless new information is received.

WF NEW SMYRNA 44/95, Florida Division of Forestry. This fire is one mile west of New Smyrna, FL in southern rough. No new information was reported. This will be the last report unless new information is received.

BERG, Florida Division of Forestry. This fire is 14 miles south of Belle Grade, FL in grass. No new information was reported. This will be the last report unless new information is received.

TOSOHATCHEE, Florida Division of Forestry. This fire is six miles southwest of Titusville, FL in timber and southern rough. No new information was reported. This will be the last report unless new information is received.

BIG BEND, Florida Division of Forestry. This fire is in Osceola County, FL in southern rough. No new information was reported. This will be the last report unless new information is received.

29 POWELL, Florida Division of Forestry. This fire is in Hillsborough County, FL in grass. No new information was reported. This will be the last report unless new information is received.

## OUTLOOK:

**Weather Discussion:** Beneath a large high pressure ridge in the West, thunderstorms will develop from Texas across the Four Corners region, and into portions of California and Oregon. Dry thunderstorms are possible near the Arizona and New Mexico border, and over the Great Basin.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southwest Area</b> Partly cloudy, hot and dry across most of Arizona and far western New Mexico with isolated to widely scattered dry thunderstorms. From the continental divide eastward, variable clouds, cooler and more humid with widely scattered to scattered showers or storms.	60s to 70s across the mountains, as well as much of central and eastern New Mexico into west Texas. Upper 70s to near 105 across far western New Mexico into Arizona.	5 to 15% across Arizona into far western New Mexico, 15 to 45% from western New Mexico eastward into west Texas.	Variable 5 to 15 mph across Arizona and far western New Mexico. East to southeast at 10 to 20 mph and gusty across the rest of New Mexico and west Texas.
<b>Rocky Mountain Area</b> Scattered showers and afternoon thunderstorms in southern Colorado, with a few afternoon thunderstorms in the far eastern plains. Dry elsewhere.	70s, with mid 50s and 60s in the mountains.	15 to 25% in northwest Colorado and southwest Wyoming, with 25% to 40% elsewhere.	North or east 10 to 18 mph.
<b>Southern California Area</b> Night and morning low clouds and fog coastal areas, otherwise mostly sunny.	75 to 90 mountains. 85 to 95 valleys. 90 to 100 upper deserts. 100 to 110 lower deserts.	10 to 20%.	Southeast to southwest 5 to 15 mph.
<b>Southern Area</b> No information was reported.			
<b>Eastern Great Basin Area</b> No information was reported.

### **ATTEMPTING A FRONTAL ASSAULT ON A FIRE**

Attempting a frontal assault on a fire is recognized as Watchout Situation #10 and is a potentially dangerous tactic.

If your tactics include a frontal assault, the following checklist must be adequately addressed before engaging the fire:

- Has the fire been scouted and sized up? Who will scout and size up a fire and what are they looking for?
- Is your position defensible? List what makes a firefighter's position defensible. (Anchor points, safety zones, escape routes, etc.)
- Are escape routes and safety zones adequate? Review what constitutes an adequate safety zone and escape route.
- Do you have an anchor point? How would you establish an anchor point for a frontal assault on a fire?
- Do you have adequate resources to complete the assault? Discuss things you need to consider; for example, if the frontal assault fails, do you have backup?
- Are you informed on strategy, tactics, and hazards? Consider what could happen if someone has a different approach than you; i.e., the IC has a burnout operation planned while you are attempting frontal assault.
- Is the terrain favorable to holding the fire? Discuss ways the terrain will influence where you will make a stand.

In order to reduce the risks, reassess your tactics, post lookouts, identify situations in which firefighters may be enticed to attempt frontal assault on a fire. Review why this may or may not be a good idea.
