

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, October 14, 2006 - 0800 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (57 new fires)

New large fires: 0(*)

Large fires contained: 0

Uncontained large fires: 2

Area Command Teams:

Type 1 IMTs committed:

Type 2 IMTs committed:

Fire Use Teams:

** Uncontained large fires do not include WFU or confine/contain incidents. **

Northern California Area (PL 2)

New fires: 12

New large fires: 0

Uncontained large fires: 2

Bar Complex (three fires), Shasta-Trinity NF. Fourteen miles northwest of Weaverville, CA. Timber and brush. No further information received.

Uncles Complex (three fires), Klamath NF. Eighteen miles northeast of Orleans, CA. Old growth timber and brush. Active burning.

Predictive Services Discussion

Dry weather with low humidity is on tap for Florida this weekend. Florida and the southeastern states will be dry with very low humidity Saturday and Sunday with rain moving into the area late Sunday and Monday. Dry weather in northern California today will give way to cooler and windy weather Sunday and Monday as a cold front moves through the area. This cold front will also bring a chance of precipitation to the extreme northern portion of the state. Southern California will have scattered showers today with warmer and drier weather Sunday and Monday.

HAZARDOUS MATERIALS ENCOUNTERS

Employees who may encounter hazardous materials in the field should be trained as mandated by OSHA 1910.120 (q), First Responder Awareness Level. However, employees should always recognize that hazmat encounters require special precautions.

● Hazardous materials in the field include, but are not limited to:

- Clandestine drug waste – waste as a result of “meth” labs, etc., which may look like common household trash at first glance. Drug lab waste can be identified by the presence of gallon plastic jugs, large plastic bags, 5-gallon buckets, and laboratory equipment (tubes and beakers).
- Midnight dumping – may be recognized by the presence of barrels or other containers, discoloration of land, plants, or water, and/or dead vegetation and animals.
- Transportation accidents – truck, rail, or pipeline accidents may result in the spillage or release of hazardous materials that may result in danger to life, property, or resources.

● In all instances, self-protection is your primary responsibility.

● Respond to all encounters by implementing the Three Rs:

- Recognize: Attempt to identify the substance using the North American Emergency Response Guide, occupancy/location, placards/labels, container shapes/colors, and/or MSDS shipping papers.
- Retreat: Move upwind, upgrade, or upstream; isolate the material; and deny entry to the site. Guidelines for isolation distances include: 150 feet for a minor incident (1 drum, 1 bag, etc.); 500 feet for a major incident (more than 1 drum, etc.); 300 feet for a residential and light commercial incident; 1,000 feet for an open area; 2,500 feet for an incident with BLEVE potential; 2,500 feet for the staging area (must be upwind with vehicles in a headed-out position)
- Report: Notify your supervisor and agency dispatcher. Request hazmat assistance via a safe route.
