Predictive Services Discussion

Mild weather is expected in southern California with increasing humidity. Southern California will see near normal temperatures the next few days with increasing humidity. Northern California will be warm and dry the next couple of days. Gusty north winds this morning will become light this afternoon and Tuesday. Rain is expected late Wednesday and Thursday.

AVIATION WATCH OUT SITUATIONS

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions.

Is the flight necessary?

Who is in charge?

Are all hazards identified and have you made them known?

Should the operation or the flight be stopped due to a change in conditions? Consider the following:

- Communications
- Confusion
- Personnel
- Weather
- Turbulence
- Conflicting priorities

Is there a better way to do it?

Are you driven by the task and sense of urgency?

Can you justify your actions?

Are there other aircraft in the area?

Will the pilot accept the mission?

Are any guidelines being ignored or policies being broken?

Are communications getting tense?

Are you deviating from the assigned operation or flight?
