

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, April 3, 2007 - 1000 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (179 new fires)
 New large fires: 2 (*)
 Large fires contained: 0
 Uncontained large fires: 3
 Area Command Teams:
 Type 1 IMTs committed:
 Type 2 IMTs committed:
 Fire Use Teams:

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southern Area (PL 2)

New fires: 149
 New large fires: 2
 Uncontained large fires: 2

April Fool, Florida Division of Forestry. Four miles south of South Bay, FL. Sawgrass. Moderate rates of fire spread.

Boiling Springs, Oklahoma Division of Forestry. Five miles northwest of Wilburton, OK. Logging slash. No further information received.

Predictive Services Discussion: Warm and dry conditions will develop today under a high pressure system from the Mid-Atlantic States to Florida. The high pressure system will weaken this evening with the approach of a storm system that will bring precipitation to the Mid-Atlantic States tonight into Wednesday; most of Florida will remain dry.

TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

When fighting wildland fires, it is often easy to get committed to areas that put you in Watchout Situation #17. As firefighters progress along the fireline, it is imperative to constantly keep the following considerations in mind:

- Does the crew's condition allow for fast travel? Discuss physical and mental conditions that could interfere with a crew's ability to travel quickly.
- Will you get adequate warning to make it to your safety zone? Who will you rely on to warn you? How will you ensure that everyone gets the word?
- Can escape routes be improved to make travel to safety zones faster? Are escape routes marked? Review what you have done on past fires to locate, mark, and improve escape routes.
- Will posting more lookouts give adequate warning? Talk about situations where there was more than one firefighter assigned to be lookout.
- To reduce the risks:
 - Consider other tactics that will allow you to be in a safer location. Review fires where you have had to change tactics because escape to safety zones was not adequate.
