

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, April 12, 2007 - 1000 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: 111 (Light)
New large fires: 1 (*)
Large fires contained: 1
Uncontained large fires: 3
Area Command Teams:
Type 1 IMTs committed:
Type 2 IMTs committed:
Fire Use Teams:

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southern Area (PL 2)

New fires: 100
New large fires: 1
Uncontained large fires: 3

Darkness, Florida DOF. Seventeen miles west of Weston, FL. Tall grass. Alligator Highway reopened. High rates of spread.

Big Snag, National Forests in Florida. Thirty miles southwest of Tallahassee, FL. Southern rough. Minimal fire activity.

Potato Hill, Ouachita NF. Fourteen miles west of Danville, AR. Pine and hardwood litter. Running and spotting.

CONSTRUCTING LINE WITHOUT A SAFE ANCHOR POINT

When deciding where to build fireline, the following considerations must be weighed:

- Can you hold the line without the fire hooking under/around you? How do you protect against losing the line and ensure your safety if there is a danger of the fire hooking around you?
- Are there adequate safety zones and escape routes? Review what constitutes an adequate safety zone and escape route. Who has the responsibility to designate them and continue to make sure they are adequate?
- Can you develop your starting point into an anchor point? List some good anchor points. Describe how you would develop your starting point into an anchor point.
- Have you posted good lookouts? Where should the lookout(s) be posted? Who can be a lookout?
- Do you have good communications? Who do you need to be in contact with? If the communications are not good, what can you do to improve them?
- To reduce the risks, start the line in another location. Talk about fires where you have had to relocate the line because your anchor point did not hold the fire.
