

**National Interagency Coordination Center
Incident Management Situation Report
Friday, June 1, 2007 - 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	240 (Moderate)
New large fires:	2 (*)
Large fires contained:	1
Uncontained large fires:	14
Area Command Teams committed:	
NIMOs committed:	2
Type 1 IMTs committed:	3
Type 2 IMTs committed:	3
Fire Use Teams committed:	

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southern Area (PL 5)

New fires:	124
New large fires:	0
Uncontained large fires:	11
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	3

Big Turnaround Complex, Okefenokee NWR. Transfer of command from IMT 1 (Oltrogge) to IMT 1 (Ruggiero) today. Ten miles southeast of Waycross, GA. Southern rough and timber. Backing fire with active interior burning. Structures, historic sites and recreation facilities remain threatened.

Sweat Farm Road, Georgia Forestry Commission. North Carolina IMT 2 (Hildreth). Started on private land ten miles west of Waycross, GA. Southern rough and timber. Moderate fire activity with isolated torching. Numerous residences remain threatened.

BICY Complex (five fires), Big Cypress National Preserve. IMT 1 (Whitney). Fifty-one miles west of Ft. Lauderdale, FL. Southern rough. Active surface fire with short runs, torching and spotting. Structures remain threatened.

Florida Bugaboo, National Forests in Florida. Unified Command between NIMO (Ferguson) and Florida IMT 2 (Beauchamp). Thirty miles northeast of Lake City, FL. Southern rough. Ground fire and isolated reburning. Numerous structures remain threatened.

Big Starr Complex (eleven fires), Cherokee NF. IMT 2 (Wilder). Seven miles east of Etowah, TN. Hardwood litter. Minimal fire activity. Several residences remain threatened.

Okeechobee Complex (three fires), Florida DOF. Eight miles southwest of Okeechobee, FL. Tall grass. Minimal fire activity. Numerous residences remain threatened.

Deland Complex (seven fires), Florida DOF. Six miles west of Ormond Beach. Southern rough. Active interior burning. Residences threatened.

Dairy Road, Florida DOF. Seven miles northwest of Keystone Heights, FL. Southern rough. Increased interior burning. Numerous structures threatened.

Kerry Tully, Florida DOF. Eight miles east of Dade City, FL. Southern rough. Minimal fire activity. Monitor status.

Buck Shank, Great Smoky Mountains NP. Ten miles south of Maryville, TN. Hardwood litter. Creeping and backing fire. No further information received.

Paterson, Florida DOF. Eighteen miles east of Lehigh Acres, FL. Southern rough. Moderate fire activity. Residences remain threatened.

Predictive Services Discussion: Thunderstorms, some of them dry, are expected today across the Sierra Mountains, Northern California, western Nevada, and Oregon. Otherwise, hot and dry conditions will prevail across the West. The Southeast will see some relief with increased humidity and scattered showers. Interior Alaska will have scattered showers and isolated wet thundershowers with gusty winds along the Alaska Range.

AVIATION COMMUNICATIONS

Discuss the following information in terms of effective communication with aircraft.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.
- Consider using national air-to-ground frequencies.
- Discuss Guard frequencies:
 - How they work.
 - What frequencies are established for aircraft in your area?
- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to.
- Do not use local slang.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.
- Know what you want to say before you key the microphone.
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- Give only meaningful information on the radio.
- Give accurate and descriptive ground information when describing a specific place on the ground.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
