

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, May 3, 2007 - 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	192 (Light)
New large fires:	5 (*)
Large fires contained:	3
Uncontained large fires:	14
Area Command Teams committed:	
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4
Fire Use Teams committed:	

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southern Area (PL 4)

New fires:	122
New large fires:	4
Uncontained large fires:	10
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Sweat Farm Road, Georgia Forestry Commission. IMT 2 (Floyd) and NIMO (Ferguson). Started on private land 10 miles southeast of Waycross, GA. Southern rough and timber. Spotting with 100 foot flame lengths. City of Folkston remains threatened. Voluntary evacuations remain in effect. U.S. Highway 1 remains closed.

Big Turnaround Complex, Okefenokee NWR. IMT 1 (Ruggiero) and IMT 2 (Wilder). Ten miles southeast of Waycross, GA. Southern rough, timber and gallberry. Moderate fire activity. Evacuations and school closures remain in effect. Private timber plantations remain threatened.

Roundabout, Georgia Forestry Commission. Started on private land four miles west of Pearson, GA. Southern rough and timber. Spotting. Residences and sewage treatment plant threatened.

Pinnacle, National Forests in North Carolina. IMT 2 (Raley). Fifteen miles east of North Cove, NC. Hardwood litter and timber. Running and crown fire.

Knee Knocker Swamp, Georgia Forestry Commission. One mile northwest of Nahunta, GA. Southern rough. Moderate fire activity. Numerous structures remain threatened.

Airport Road, Florida DOF. Three miles southwest of Ormond Beach, FL. Hardwood litter. Long range spotting and running. Residences threatened and evacuations in effect.

Red Oak, Florida DOF. Two miles west of Pine Lakes, FL. Brush and palmetto. Spotting and short duration crown fire. Residences and outbuildings threatened.

Chestnut Ridge, George Washington & Jefferson NF. Ten miles west of Bridgewater, VA. Hardwood litter. Running and backing fire.

Lewis Peak, Shenandoah NP. Five miles northeast of Grottoes, VA. Timber. Trails closed. No further information.

Army Trail, Daniel Boone NF. Nine miles southwest of Hyden, KY. Hardwood litter. No new information.

CNF - Coronado NF

Predictive Services Discussion: Windy and dry conditions will continue today over portions of southern California and the Southwest. Winds will also increase over the northern Plains moving into the western Great Lakes. Dry conditions will develop in the Northeast associated with high pressure, however dry conditions in the Southeast will begin to improve.

HAZARD MITIGATION THROUGH RISK MANAGEMENT

“Risk management doesn’t get in the way of doing the mission – it is the way we do the mission.” The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision making. Good risk management utilizes a five-step process:

● Step 1—Situational Awareness:

- Obtain information.
- Scout the fire.
- Identify hazards—those likely to result in a negative impact.
- Consider all aspects of current and future situations.
- Consider known historical problem areas (Apply information from the Fire Danger Pocket Card.).
- Recognize the need for action.
- Demonstrate ongoing awareness of fire assignment status.
- Note deviations.
- Attempt to determine why discrepancies exist with information before proceeding.

● Step 2—Hazard Assessment:

- Assess hazards to determine risks (e.g., fire behavior, snags, unburned fuels, work/rest).
- Use the Look Up, Down, and Around; and the Tactical Watch Outs (both located in the Incident Response Pocket Guide) to identify high-risk tactical hazards.
- Assess the impact of each hazard in terms of potential loss, cost, and mission/operational degradation based on probability and severity (probability—how likely an event will occur; severity—consequences if the event occurs). Keep in mind that increased exposure time increases probability.

● Step 3—Hazard Control:

- Determine the best approach to mitigate or control the risk from the hazards assessed.
- Establish controls (e.g., anchor point, LCES, utilize downhill checklist, limit exposure time).
- As control measures are developed, reevaluate each risk until it is reduced to a level where benefits outweigh potential costs.
