HELICOPTER LANDING AREA SAFETY

The following points should be considered when operating around an unimproved landing site:

- Always wear your personal protective equipment (PPE) when working around an operating helicopter.
- Always get the approval of a flight crewmember or the pilot before approaching a starting or operating helicopter.
- Only approach and depart a helicopter as directed, in a slightly crouched position, and in full view of a crewmember.
- When approaching or departing an operating helicopter, never approach or depart uphill and do not hold equipment overhead.
- Always approach and depart an operating helicopter on the downhill side.
- Remove or secure loose articles when working around an operating helicopter.
- Be aware of the dust abatement conditions of the landing area, as blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous.
