Incident Management Situation Report
Tuesday, September 11, 2007 – 0530 MDT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (120 new fires)
New large fires:	3 (*)
Large fires contained:	5
Uncontained large fires:	24
Area Command Teams committed:	1
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	7
Fire Use Teams committed:	1

** Uncontained large fires do not include WFU or confine/contain incidents. **

Eastern Great Basin Area (PL 4)

New fires:	19
New large fires:	0
Uncontained large fires:	2
Area Command Teams committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1
Fire Use Teams committed:	1

Area Command Team (Ribar) will be released today.

Cascade Complex, Boise NF. IMT 2 (Whalen). Twenty-seven miles east of Cascade, ID. Timber. Creeping and smoldering with isolated torching. Structures, power lines, cultural sites and historical cabins are threatened. Evacuations and road closures in effect.

East Zone Complex (3 fires), Payette NF. IMT 1 (Broyles). IMT also managing Donnelly zone of the Grays Creek fire and the Big Creek portion of the Krassel Complex WFU. Twenty-five miles northeast of McCall, ID. Timber. Isolated torching and short uphill runs. Structures threatened. Road closures and evacuations in effect.

Krassel Complex (4 fires), Payette NF. Transfer of command from FUMT (Hahnenberg) back to local unit yesterday. Forty-four miles northeast of Yellow Pine, ID. Timber, grass and heavy dead and down fuels. Active fire behavior with isolated torching and spotting. Structures threatened.

CAD – Carlsbad Field Office, BLM

Predictive Services Discussion: Warmer and drier conditions in combination with higher Haines Indices in the Great Basin and eastern portions of Washington and Oregon. Cooler conditions as well as higher relative humidity is expected today with a return to onshore flow along the West Coast. The Southeast will see shower and thunderstorm activity.

http://www.nifc.gov/sixminutes/dsp_sixminutes.php

Downhill Fireline Construction Checklist

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:

- Crew supervisor(s) and fireline overhead will discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with job until completed.
- Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- LCES will be coordinated for all personnel involved.
 - Crew supervisor(s) is in direct contact with lookout who can see the fire.
 - Communication is established between all crews.
 - Ensure rapid access to safety zone(s) in case fire crosses below crew(s).
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crew(s) building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
