Predictive Services Discussion: A low pressure system will move across the Northwest into the panhandle of Idaho today with mainly wet thunderstorms. A mixture of wet and dry thunderstorms is expected in the Great Basin and Arizona; however, coverage of storms will be less than in previous days. Wind speeds will remain elevated across southern California and the southern Great Basin.

Escape Routes

An escape route is a preplanned and understood route to reach a safety zone.

- What are the primary concerns in choosing an escape route?
 - - Select the closest, least obstructed route.
 - Plan for more than one escape route.
 - Avoid an uphill escape.
 - Scout and clearly mark the route for visibility (aids during smoky situations or night operational periods).
 - - Determine escape time--consider slowest person, fatigue, and temperature factors.
 - Continuously reassess the situation with regard to work progress and additional resource arrivals.
 - Assure all line personnel are familiar with escape routes.
