Predictive Services Discussion: Gusty winds are expected today over the southern Sierras and Great Basin along with localized night and morning winds over Santa Barbara and Ventura counties in southern California. Warmer and drier weather is on tap for most of California while widely scattered wet and dry thunderstorms are forecast for the Southwest, Utah and Rockies. The eastern portions of Washington and Oregon will see mild and generally dry weather. Showers will cover much of the Southeast.

Initiate All Actions Based On Current And Expected Fire Behavior

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
 - Post lookouts.
 - Check communications.
 - Retreat if you have doubts about your escape routes or safety zones or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.
